Fight against US troops is holy war, claims Khamenei

By Our Foreign Staff

AYATOLLAH Ali Khamenei, Iran's spiritual leader, yester-day condemned the US military build-up in the Gulf and said fighting against US policy in the region was tantamount to a jihad or holy war.

His speech, broadcast on Tehran Radio, was the first open challenge to the US by a senior Iranian official since the start of the Gulf crisis. It quickly revived fears in the west of an Iragi-Iranian alliance and unsettled European financial markets.

His statement, however, stopped short of calling for immediate action against the US, nor are his views endorsed by President Hashemi Rafsanjani or other more cautious members of the Iranian Gov-"Anyone who fights Amer-

ica's aggression, its greediness and its plans to encroach on the Persian Gulf region has ad in the ca of Allah and anyone who is killed on that path is a mar-tyr," Ayatollah Khamenei said. "We will not allow the Americans to gain a foothold in an area where we are pres-

ent and turn it into their sphere of influence." His speech came amid signs that the US and its allies are preparing to increase the momentum of the military build-up to confront President Saddam Hussein of Iraq following his invasion of Kuwait last

On Monday Mr Sadeo Khalk-

parliament and former judge, called for an alliance between Iran and Iraq to oppose Israel and the US.

President Rafsanjani, Iran's

executive leader, has taken a more subtle view of the US forces, accepting the need to drive Iraq out of Kuwait. But he and his colleagues are concerned about US plans to prolong its stay in the Gulf. Ayatollah Khamenei's speech coincided with a me ing in Tehran between Mr Ali Akbar Velayati, the Iranian Foreign Minister, and Mr Clan-

dio Lenoci, a European Com-munity envoy charged with improving Iranian-EC rela-Western nations, even if they discount an alliance between Iran and Iraq in the aftermath of the 1980-88 Gulf war, are concerned about the possibility of sanctions-busting to bypass the United Nations embargo

Yesterday the Tehran Times, which is close to Mr Rafsan-jani, said Iran was considering supplying food and medicine to Iraq and offering Baghdad an unspecified "outlet" in return. In New York, the UN Sanctions Committee failed to resolve differences on how and when to allow food supplies to enter Iraq and occupied Kuwait. The question was referred to the full Security Council for consideration.

Mrs Marjatta Rasi of Finland, the committee chairman, reported the 15-nation panel's hali, the Iranian member of inability to reach a consensus after several days of intense private discussions.

These followed a proposal by India to send a relief ship to

Kuwait with food for an estimated 100,000 Indian workers and their families stranded Pakistan says it is sending food and drugs to Kuwait as

diplomatic baggage for some 30,000 Pakistanis still stranded The US military build-up in Saudi Arabia is expected to be boosted in the next few days with a "significant" increa

allied military assistance, according to Mr Richard Che-ney, US Defence Secretary. Mr Cheney told Congress on Tuesday that the contribution would substantially increase the military capability of allied forces in the Gulf.

The US build-up has reached more than 100,000 troops but military planners remain conmechanised forces to protect US troops inside Saudi Arabia as well as the failure of Nato allies to send ground forces.

British Cabinet ministers will meet tomorrow to decide the composition of extra forces expected to be deployed in the

Bush, Congress close to accord on budget deficit

By Peter Riddell, US Editor, in Washington

EARLY agreement on a five-year package to reduce the soaring US budget deficit looks increasingly likely following signs of compromise between the Bush administration and

Expectations rose after the gloom of the weekend as negotiators held a sixth day of talks yesterday at Andrews Air Force Base, south of Washing-ton. The White House said there was "a more hopeful environment," while Mr Tom Foley, Democratic Speaker of the House of Representatives, said he was optimistic an agreement could be reached

In his address to Congress late on Tuesday, President George Bush said he was pleased with recent progress. However, he warned that "with or without an agreement from the budget summit," he wanted both houses to allow "a straight up-or-down vote on a complete \$500hn deficit reduction package [over five years] not later than September 28."

mise will involve about \$130bn in higher taxes over five years, including a tax on energy consumption, a new tax on luxury goods and higher taxes on alcohol. Defence spending will be reduced by between \$170bn and planned levels and domestic expenditure will be cut by up to \$126bn, with the better-off elderly having to pay more toward Medicare health programmes. Savings on debt interest would account for the

rest of the \$500bn.

month, will avoid the need for across-the-board spending cuts of nearly \$106bn which would

reduction law. The main obstacles are the extent of cuts in domestic spending and the administration's renewed call for a cut in capital gains tax, which the Democrats want offset by higher income taxes at the top

the Gramm-Rudman deficit

end of the scale. Nevertheless, the likely package of around \$50bn in the coming 1991 fiscal year will make only a small dent in the projected deficit of \$230bn to 250bn and will involve dropping the \$64bn deficit target for

The estimated size of the deficit has risen sharply in the last few months because of the slowdown in the US economy, larger than expected costs of the savings and loan rescue and, most recently, because of the Gulf crisis.

The General Accounting Office, the investigatory arm of a deficit of \$237bn for fiscal 1991. It warned that it could go much higher if there is a recession. The Congressional Budget Office also revised its 1991 deficit estimate upwards by \$30bn-\$35bn, to \$262bn-\$267bn, as a result of the weakening of the economy. Nevertheless, President Bush

and Congressional leaders are expected to present any budget deal as a sign of their intention to tackle the deficit problem and to urge that the Federal Reserve should offset any fis-cal contraction by an immedi-A budget deal, if passed by cal contraction by an immedi-Congress by the end of this ate lowering of interest rates. taries, now open to wealthy visitors from the west. It was concluded after a bare seven months of negotia tions, which have seen the Soviet Union concede the right for a united Germany to belong to the Nato alliance, and West Germany agree to pay a hefty DM12bn (\$7bn) to meet the cost of repatriating Soviet troops from East Ger-

At the same time the Germanys have declared that their present borders are final leaving no outstanding claim on former German land in Poland - that "only peace will emanate from German soil," and that the future nation will renounce the pos-session or use of nuclear, biological and chemical weapons.

In further concessions to reassure Soviet anxiety at reunification, the Germanys have agreed to cut their troops to 370,000 within three to four timetable for Soviet troop withdrawal from East Germany, by the end of 1994.

The western allies have also agreed that what was East used for the stationing or deployment of non-German Nato forces, nor nuclear-capa-ble missile launchers, even after the departure of Soviet troops.

Apart from those, however. virtually all the main conces sions have been on the Soviet side, in spite of deep popular Continued on Page 16

UK examines anti-competitive practices in photocopier sales

BRITAIN'S Monopolies and Mergers Commission is to investigate the photocopier industry for the second time. Sir Gordon Borrie, Director General of Fair Trading, has asked for a report within 12 months from the Commission, which is charged with oversee-ing competition issues in Brit-ish business, including those arising from takeover bids.

The Commission last investigated the photoconier market in 1976, when Rank Xerox, jointly owned by Xerox Corporation of the US and Rank Organisation of the UK. was the dominant supplier to the UK market. Since then, Rank Xerox has

lost its dominant UK position to Canon of Japan. Of the five leading suppliers of photocopiers last year, three are Japa-

The new enquiry will investigate the possible existence of a "complex monopoly" in which manufacturers and importers would tie the sale of toner, the "ink" used in the copying process, to the supply of machines.

Total machines placed in UK (%) 40,000 26,000 15,000 11,000 9,000

The Commission will also examine the refusal by some manufacturers to supply spare parts and manuals to third paries who maintain their

Following the last Commission report, Rank Xerox gave a series of undertakings. It was released from most of these in 1983 because of changes in the market, notably the growing presence of imported Japanese

Rank Xerox was told, however, that it still had to give all customers the option of purchasing toner from other sup-

The Office of Fair Trading, a government watchdog, said yesterday that "while Rank Xerox continues to be bound by this requirement, other manufacturers and suppliers are not, and a number of them, accounting for a significant proportion of UK supplies, appear to tie the supply of toner to the supply of

This may restrict the ability of independent manufacturers and suppliers of toners to compete and raises the possibility that a complex monopoly may exist," the OFT said. The OFT said it understood

that at least one supplier was unwilling to allow other comnies access to spare parts and manuals so that they could maintain its machines. Mr Roger Riseley, of consul-

tants Dataquest, estimated that 165,000 photocopiers were sold or rented in the UK in 1989, generating revenues of £491m (\$900m). There were a large number of third party vendors making parts and toner cartridges for other makers' machines.

THE PLANNED escalation of Britain's military presence in the Gulf is unlikely to fracture a broad parliamentary consensus, in spite of a recognition of the risks involved.

The decision to send a subtroops, possibly with tanks, will be backed by the main UK political parties, it became clear yesterday. Increasing Britain's commitment would Britain's commitment would be a logical extension of the government's policy as set out
– and supported with few
qualifications – in the House of Commons last week.

"We have taken a view that if the military feel that there is a need for an increased commitment we will support it, said Mr Martin O'Neill, Labour's defence spokesman. "At the moment we are talking about a commitment to a part of the world where there are something like 40,000 British people living and work-

ing. . We are a major player is this," he said. Reflecting the mood on the Conservative backbenches, Sir Ian Gilmour, Tory MP for Chesham and Amersham, said: Once you have decided to send troops, the sending of more of a different sort doesn't seem to be a qualitative differ-

Mr Paddy Ashdown, the Liberal Democrat leader, said the government was right to consider sending more troops if militarily or politically neces-

Mrs Margaret Thatcher, however, knows there are limits to

Commons last week for taking the steps necessary to force

By David White, Defence Correspondent

SENIOR US defence officials have made it

clear they would be disappointed if addi-

tional British deployments to the Gulf failed to include heavy armour.

Britain already has about 3,000 service-

men in the Gulf, with a further 2,000 either

on their way or otherwise directly involved. Most are RAF and navy person-nel, and they do not include army combat

The US is expected soon to pull out its 82nd Airborne Division, which headed the US deployment, since it is considered to

NEWS IN BRIEF

Nato prepares for call-up of

more civil aircraft and ships

NATO emergency planners have asked alliance governments to inform them of all civil aircraft and ships which could be used to

transport military forces to, and refugees away from, the Gulf region, David Buchan reports from Brussels.

Activated at Washington's request for almost the first time in its decades long existence, Nato's Senior Civil Preparedness Committee (SCEPC) will meet today for the second time this week to

The US has already brought 39 wide-body Boeing 747s into its Civil Reserve Air Fleet to transport its troops to Saudi Arabia, but more aircraft are now needed, chiefly to evacuate refugees

from Jordan, Mr Paul Krueger, the US representative on SCEPC said yesterday. Furthermore, the US was particularly short of roll-on, roll-off ships for moving tanks, he said.

Saudi Arabia clashed with Iraq at a United Nations conference yesterday after an Iraqi envoy accused Kuwait of conspiring to hurt Baghdad's economy, Reuter reports from Paris.

co-ordinate the growing calls on civil transport.

Saudi-Iraqi verbal crossfire

so far cannot be taken for granted. Labour has refused to give a blank cheque to the gov-ernment. And Mr O'Neill emphasised that decisions on additional forces in the Gulf should be taken in accordance with UN resolutions.

A decision to send signifi-cant numbers of ground forces is much easier to sell to MPs and the public when the Britain's effort still centres around economic sanctions. At this stage the main political parties agree that the threat to use military force should be unequivocal.

But if the military strategy switched from the defence of Saudi Arabia to offensive action with the threat of casualties, the political arguments could change dramatically.

"Until then this is merely a further step in the same strategy which is the internationalisation [of the Gulf forces] and creation of a grand coalition," said Mr David Howell, Conservative chairman of the Commons' foreign affairs commit-"We must never give Saddam Hussein any doubt that the military option will be

Mr Nigel Forman, Conserva-tive MP for Carshalton and act firmly, and be seen to be acting firmly."
At Westminster, many

believe that stepping up Britain's commitment would increase Britain's part in determining the next stages of the confrontation. Mrs Thatcher has already had warm support from President George Bush for her stand, the argument goes. Further British troops Iraq from Kuwait. will increase
The near-universal support over US policy. will increase her influence

Americans want Britain to send tanks

have fulfilled its function of getting into place quickly and holding the ground for

heavier forces to arrive.

The bulk of the planned US armoured force, with about 1,000 tanks, is expected

to have arrived in Saudi Arabia by mid-Oc-

tober. But they face an estimated total of more than 2,000 Iraqi tanks in Kuwait and

Sending armoured units would change both the scale and nature of the UK's

commitment. It could involve several

thousand men, including logistical sup-port. Deployment of Challenger tanks from the British Army of the Rhine, using dif-ferent ammunition and spares from the

British consensus Bush hints at heavy human price

By Lionel Barber in Washington

IN HIS speech to Congress on Tuesday night, President George Bush came closer than ever before to conceding that the Gulf crisis may have to be olved by military force.

Using tough language to demonstrate his resolve in removing Iraqi forces from Kuwait, Mr Bush hinted strongly that the eventual price could be heavy bloodned as well as American casu-

In words which might have been borrowed from Mrs Mar-garet Thatcher's speeches in the run-up to the Falklands conflict, Mr Bush declared: "If we do not continue to demon we do not continue to demon-strate our determination, it would be a signal to actual and potential aggressors around the world." Moments later in the spe

Mr Bush went so far as to quote the British Prime Minister berself, making clear that his future course of action would not — and could not — be determined by concern over the fate of western hostages in

Throughout, Mr Bush appeared determined to make clear to Mr Saddam Hussein, the Iraqi President — just as he did earlier in his presidency in dealing with General Man-uel Noriega of Panama – that the US would neither be intimidated nor blackmailed and would stand up to aggression on behalf of the Kuwaiti royal family. "Let no one doubt our

staying power," he said. But the President was short on specifics on how and when he would achieve his goals in the Gulf. "I cannot predict just how long it will take to convince Iraq to withdraw from Kuwait," he admitted. At the same time, he conceded that sanctions would take time to work against Baghdad, and that Americans should steel themselves for a long-term US military presence in the Guif. Mr Bush drew applause when he made clear that the

usional support for its stand against Iraq. Lawmakers seemed impressed, too, with the new-style US-Soviet co-operation which Mr Bush described as heralding a "new world order" of peace, justice and myriad other ideas which, presumably, Mr Bush thought might add up to "the vision

thing".

The more striking sections

onne when Mr of the speech came when Mr Bush drew an explicit link between America's ability to act as a Great Power overse and her fiscal conduct at home. "We must get America's

howitzers which would be compatible with

There is burning resentment in Congress at the moment about the slack response by West Germany and Japan on "burden-sharing".

This week, US senators approach out the discount of the slack response out the discount of the slack research out the slack research research

expressed outrage over the dis-closure that West Germany is paying more than \$8bn (£4bn) to the Soviet Union to support Soviet troops remaining in east Germany as a means to solving one of the Soviet obstacles to German unifica-

Overall, the speech suggested that Mr Bush — and Overall. his administration - are still groping their way forward on the Gulf crisis. The tactical crisis management appears first-rate, but the means to attaining the goal of removing Iraqi forces remains unclear.

What must be clear, how-ever, is that the President appears, at this stage, to have no hesitation about the use of force - whatever the reservations among some of America's closest allies.

Israel keen to mend fences in Moscow

By Hugh Carnegy in Jerusalem

A TEAM of senior Israeli diplomats yesterday flew to Moscow to prepare a meeting between Mr David Levy, the raeli Foreign Minister, and Mr Eduard Shevardnadze, his Soviet counterpart, at the United Nations later this

This is highest level delegation invited by the Soviet government since relations were severed by Moscow during the 1967 Arab-Israeli war.

Mr Levy announced the trip at a news conference on his return from talks in Washing-

Israel has traditionally regarded the Soviet Union as hostile but yesterday Mr Levy said the Soviet Union would be a "welcome partner" in Middle East peace efforts if it stopped supplying arms to Arab states and urged them to make peace with Israel.

However, he reiterated Israel's rejection of any move to convene an internadle East, the longstanding policy of Moscow and an idea which has gained some cur-rency in the light of the crisis in the Gulf.

Mr Levy's remarks reflected a series of delicately balanced Israeli concerns arising from

events in the Gulf. It is anxious to squash attempts by Saddam Hussein of Iraq to link any solution of Iraq's occupation of Kuwait to the resolution of other Middle East conflicts such as the Israeli-Palestinian issue. This approach, which has strong appeal to many Arabs and has found echoes in Moscow, inevitably points to some kind of multilateral conference to produce a compre-

At the same time, Israel is keen to restore relations with Moscow (consular ties were resumed in 1987). As Mr Levy indicated, it sees the chance under Mr Gorbachev to woo the Soviet Union from its support for hostile Arab states such as Syria and Iraq. The government also needs to have contact at the highest level in Moscow to discus the question of Soviet Jews wanting to go to

Another development of vital interest to Israel is the rapprochement between Washington and Syria produced by their common hostility to President Saddam. Until the Gulf crisis erupted, Israel regarded Syria, which wants to regain the Golan Heights captured by Israeli forces in 1967, as its chief military threat.

Saudi Arabia's Shias now face test of loyalty

n the road to the Shia Moslem towns of Qateef and Saihat, a Saudi National Guard checkpoint stops every car and asks motorists for identity papers and the purpose of their visit. "They are looking for terror-ists," the taxi driver says.

With Iraq menacing Saudi Arabia's northern border and up to 170,000 American servicemen transforming the desert men transforming the description a vast bivouac, Saudi leaders must be asking themselves whether they can count on the loyalty of half a million Shia Moslems concentrated in the oil-rich eastern province.

Those concerns were redou-bled yesterday when Ayatollah Ali Khamenei, the Shia Moslem Iranian spiritual leader. bitterly condemned the US military build-up in the Gulf and echoed the Iraqi line that fighting against the Americans was equivalent to a jihad or holy

ar. Saudi Shias have little sympathy with President Saddam Hussein of Iraq - himself a Sunni who rules Iraq's Shia majority with a rod of iron -but many of them maintain close ties with friends and relatives in Iran and Lebanon and feel discriminated against by the Sunni rulers of Saudi

The past decade has provided ample grounds for concern. Nine months after the Shah was toppled in Iran in 1979, riots broke out in Qateef when Saudi authorities attempted to stop a Shia religious procession. The National Guard, composed of fervently loyal Sunni tribesmen, sealed off the area and at least 17 peo-

ple were killed.

The National Guard's highly visible presence in and around the crescent of Shia towns north of the oil centre of Dhahran did not prevent the recur-rence of similar unrest in 1985 and the sabotage of a petro-chemical plant at Jubail by Saudi Shias in April 1988. Forty eastern province Shia

Muslims suspected of belong-ing to the pro-iranian Hizbollah of Hijaz were arrested fol-lowing the Jubail explosion and four were beheaded in September 1988.

The clashes between Iranian pilgrims and Saudi security forces in Mecca in 1987 and bombs placed in Mecca by Kuwaiti Shias in July 1989 increased the Saudi govern-ment's mistrust of its Shia. minority. Hizbollah of Hijaz held a press conference in West Beirut in September 1989, 15 Kuwaiti Shias beheaded for the Mecca bombings.

Less than two months later a retired Saudi diplomat was assassinated in West Beirut, At least six other Saudis have been murdered in Thailand

Official repression has cowed the Saudi Shias in recent years, and in any case Western and Saudi officials alike are hoping that the new found common interest in opposing Iraq will diminish the hatre felt by some Shias towards the Saudi Royal family and the US. This week Sheikh Hassan al-Saffar, a Syrian-based Shia opponent of the Saudi ruling family, was reported to have ordered his supporters to rally behind the Saudi government

and join the army to fight

hi-----

Called Maria Control

Hundreds of young Shia men. have already responded to King Fahd's appeal for army volunteers, although Saudi leaders may be beautied by the fear that the new Shia recruits could turn their weapons and training against the govern-ment. The Saudi government does not publicly acknowledge any difference between Shlas and the majority Sunnis.
"They are citizens like us. We don't even think about it."

said Prince Fahd bin Salman bin Abdulaziz, the vice-gover-nor of the Eastern province. Conditions in the Shia areas of the eastern province have improved since Prince Mohammed, the second son of King Fahd, was appointed governor in 1985. The government has financed roads, a hospital, new schools and a new market in Qateef and Saihat "Prince Mohammed is a former businessman," a Western diplomat said. "He sees that trouble is bad for business, that there are ways to bring Shias to your side without shooting them." Qateef is still visibly less

"There are ways to bring Shias to your side without shooting them'

affluent than nearby predomi-nantly Sunni areas, but is by no means poverty stricken. "If you compare us Shias in Saudi Arabia to Shias anywhere else in the world, we are better off," said Mr Abdul Hanid al-Mutawa, a wealthy Shia businessman who lives in

"If Shias came now and told me they wanted a Shia govern-ment, I would not agree. They would be angry and destruc-tive. That is the experience of all revolutions."

But some of Mr Al-Mutawa's

Shia compatriots do not share his enthusiasm for the government, and there are continuing reports of the arrest of Shias. Amnesty International, the London-based human rights group, reported the arrest and dreds of Shias from the eastern province throughout the 1980s. At I t 100 arrests reported in 1989 and only a smali number have been released, according to the organisation. Prince Fahd dismissed the Amnesty report as "fantasy". He said: "Ours is an open society. For instance the

people who put bombs in Jubail - do you expect us to give them flowers and croissants every morning?"
In the long term, Saudi Shias will cease to pose a threat to the government only when they no longer regard themries of a handful of Shia busi-

selves as second-class citizens. The rags to riches success stonessmen owes more to hard work and the policy of non-dis-crimination practised by the former Arabian American Oil Company between 1935 and the mid-1980s than the munificence of the Saudi government.

Venezuela agonises over taking advantage

Joseph Mann reports from Caracas on the debate on future oil export policy

"Does he think he is addressing a bunch of simpletons?" the Saudi Ambassador to Paris Sheikh Jamil al-Hegelan asked. "Iraq has trampled Kuwait... It has squandered its wealth on war," he told a UN conference on the world's Least Developed Countries (LDCs). The envoy was called to order for taking the floor out of turn after Iraqi Ambassador Abdul Razzaat al-Hachimi tried to justify his country's annexation of Kuwait, Russians urge breaking of ties The Russian parliament yesterday urged the Kremlin to suspend

the Soviet Union's 1973 friendship treaty with Iraq and withdraw immediately all military specialists still serving there, Tass news agency said, Reuter reports from Moscow. A parliamentary committee said in a document to the Supreme Soviet that it should suspend the treaty because maintaining such contacts after Iraq's August 2 invasion of Kuwait was "unacceptable and amoral".

White House tape for Baghdad President George Bush has taped a message to the iraqi people, explaining in just under 10 minutes his motives and reasons for the US military build-up in the Gulf, an aide said, AP reports

Mr Bush stood in front of his desk in the Oval Office for the taping, which was to be delivered to Iraqi officials for broadcast on Iraqi television, said Mr Sig Rogich, the President's media adviser. The text of his message was not disclosed.

Arafat meets King Hussein

The Palestine Liberation Organisation leader, Mr Yassir Arafat, on a previously unannounced trip to Jordan, met King Hussein yesterday, Reuter reports from Amman. The official news agency Petra said they discussed "efforts to achieve a settlement of the Gulf crisis within an Arab framework".

Jordan urges curbs on refugees Jordan, expecting a new influx of Gulf crisis refugees, has urged Iraq to limit the flow across the border to 14,000 a day, officials

said yesterday, Reuter reports from Amman. "We have asked the Iraqis to allow across a maximum of 14,000 people a day, half of them Egyptians and half Asians," said a senior Jordanian official.

RAQ'S annexation of Kuwait has underlined Venezuela's position as the only nation outside the Gulf capable of a significant and sustained increase in crude oil exports over the long term without incurring prohibitively high costs for developing new petroleum reserves.

This privileged position has provoked considerable debate

announced that it is to with-

tember.

as to how Venezuela can best take advantage of the Gulf crisis. Venezuela, whose economy is in serious trouble, clearly could use additional income this year from oil exports to new commercial clients. The government, however, seems to be limiting new business opportunities for Petroleos de enezuela SA (PDVSA), the national oil company, in order to meet commitments to Third

The government in late August announced PDVSA would raise crude production by more than 25 per cent to make up for part of the deficit caused by the loss of petroleum from Iraq and Kuwait. PDVSA currently is producing just over 2m b/d, and plans to reach 2.5m b/d by December.

This decision was only reached after much confusing soul-searching. Soon after Iraq invaded Kuwait, President Carlos Andres Perez told US Vice-President Dan Quayle that Venezuela would be willing to help ease any future oil shortage in the US, using 500,000 b/d of additional production. President Perez later

CRUDE OIL RESERVES Saudi Arabia 255.0 iraq Kuwait Abu Dhabi Venezuelat

'United States

claimed he had made no such pledge, angering US officials nies who believed Venezuela had tried to strengthen its image in the US as a reliable oil supplier. The US is cur-rently Venezuela's most important market, last year absorbing 66 per cent of its 1.62m barrels per day crude and refined products exports.

For their part, executives at PDVSA argued the country should begin increasing crude production and building inven-tories immediately after the invasion of Kuwait. They were thus extremely frustrated to see Saudi Arabia, Iran and other oil-producers raise output, as the Venezuelan government waited for an Opec decision. President Pérez and Mr Celestino Armas, the pro-Opec Minister of Energy and Mines, insisted on acting within the

US crude oil and refined products stocks showed an unexpected increase last week, according to the American Petroleum Institute, writes Steven Butler.

The stock movements indicate that the cut-off of Kuwaiti and Iraqi exports has yet to make a significant impact on stock positions and reinforced criticism that prices are being driven higher by efforts of oil com-panies to maintain stocks. They rose by 2.07m barrels to 374m barrels, 36m barrels higher than a year ago.

organisation's framework. Even now it is not clear what the Venezuelan government will do with its additional crude output

Several governments — including Spain and India — have asked Venezuela to supply oil. While the Pérez Administration will probably target most of its new production to the US, it also has said priority will be given to supplying Third World countries, especially in Latin America and the Caribbean. PDVSA, therefore, could lose a potential market share in the US to some Middle Bast suppliers, as it shifts new petroleum production to other

markets. At heart there are two unresolved contradictions between President Pérez's desire to play the role of cham-pion in Opec and the Third World, while simultaneously

trying to convince the US of his country's long-term support - and between political and purely market decisions that determine PDVSA's role.

For instance, the Venezueian president praises his nation's commercial ties with the US. and is actively seeking American financial backing for multi-billion dollar projects, such as increasing oil production, building new refineries and establishing a so-called strategic petroleum reserve in Veneral destablishing and projects and establishing a so-called strategic petroleum reserve in Veneral destablishing a so-called strategic petroleum reserve in Veneral destablishing as project destablishing a so-called strategic petroleum reserve in Veneral destablishing as project destablishing a so-called strategic petroleum reserve in Veneral destablishing a so-called strategic petroleum reserve in Venera ela that could be used by the

US during an emergency.

Equally, Mr Pérez has allowed open conflicts to occur between his Energy Minister, a mining engineer turned politician, and the professional managers at PDVSA. The latter see Opec as being responsible for steadily reducing Venezuela's share of the organisation's total production over the last two decades.

They also blame some Venezuelan politicians for placing a strait-jacket on Venezuela, while other Opec members regularly and openly flaunted their production quotas.

anagers, in short, want to raise the per-formance of the company which last year recorded a net profit of \$2.1bn (£1.13bn) on a turnover of \$13.7bn. In the past, the impressive scope of Venezuela's oil industry has tended to be eclipsed by the Middle East producers. Yet Venezuela's national oil company is one of the world's larg-

est diversified energy concerns. PDVSA has the largest proved reserves of crude oil in the Western Hemisphere, esti-mated at just over 59bn bar-rels, as of year-end 1989. In contrast, the US has proven reserves of 34.1bn barrels, Canreserves of 34.10th marieus, can-ada 8.3bn, and the UK 3.8bn.
PDVSA has also discovered
and is developing – large
deposits of light and medium

crude oil in eastern Venezuela and other sectors. PDVSA has extensive oil and gas produc-tion facilities at home, six oil refineries, a sea-going tanker fleet, petrochemical plants, and a coal mine. In the Orinoco Belt, a region

lying north of the Orinoco river, Venezuela possesses the world's largest deposits of heavy oil and bitumen. PDVSA estimates that the Orinoco Belt contains 1.2tr barrels of hydro-carbons, of which 271bn barrels can be recovered economically. The situation has prompted

renewed calls for the govern-ment to quit Opec and to abolish the Ministry of Energy. The latter was set up decades ago to monitor and control foreign oil companies in Venezuela, but all foreign oil operators were nationalised in 1976. It is not likely that either of these suggestions will be heeded.

President Pérez has responded to criticisms by asserting he was misinterpreted, or that no contradictions exist. In fact, Venezuela clearly has not reneged on any oil contracts and is finally raising crude oil production.

Thomson CSF denies Iraq sale Thomson CSP, the French state-owned defence electronics

company, yesterday denied that it had supplied Iraq with any equipment capable of jamming US Awacs surveillance aircraft in the Gulf, George Graham writes from Paris in a statement issued vesterday, Thomson said that the FFr900m (£91m) contract it signed with Iraq in January was in no way related to sur-veillance or counter-measures

equipment, and that in any case, it had not been followed by any deliveries. It added that the contract was now covered by the United Nations

Bhutto faces new S African violence fails to dim business cheer charges before special tribunals

THE PAKISTAN Government yesterday intensified its cam-paign against Ms Benazir Bhutto, the former Prime Minister. It accused her of involvement in a widely publicised scandal involving alleged cor-ruption during her 20-month

administration. It said it would prosecute her before a special tribunal in Lahore on allegations that she helped business interests close to her husband, Mr Ali Asaf Zardari, in attempts to secure planning permission and land at below market rates for a proposed five-star hotel com-plex near Islamabad. The Lakeview Resort Hotel would have included an 18-hole golf course

A second charge involved the award of contracts for the sale of liquefied petroleum gas. The fresh charges against Ms Bhutto come at a time when the election campaign is mov-ing into higher gear. Yesterday was the final day for candidates nominations. Ms Bhutto is standing for constituencies in Sindh and the Frontier province while Mr Zardari is con-testing a seat in Sindh, the

family's home province. The conservative Islamic Democratic Alliance (IJI), a coalition of Moslem and rightist parties, will be putting up a single candidate against Ms Bhutto's Pakistan People's

Party in most constituencies But their agreement on a com-mon list has come after much wrangling, and rivalry over the leadership has damaged their

public image.
At one point Mr Nawaz Sharif, the president of the alli-ance, sought the intervention of President Ghulam Ishaq Khan to smooth differences among them. The President, who has come under increas ing personal attack from Ms Bhutto for overthrowing her government, declined to inter-

Indicative of the divisions within the conservative alliance, the Jamaat-i-Islam - one of the more extremist mem-bers - has criticised the government for bringing itself into ridicule for failing to bring solid proof against Ms Bhutto.

The PPP is entering the election campaign in stronger shape than either the govern-ment or the party itself had expected two weeks ago. • A special court in the Pun-

jab provincial capital Lahore dismissed the case against Mr Jahangir Badar, Ms Bhutto's former Petroleum and Natural invest. You can't grow without expanded capacity to produce."
Recent events, says Mr
Osborne, have been inimical to
investor confidence and this is Resources Minister, for lack of evidence, Reuter adds from borne out by statistics from the Lahore. Mr Badar's case involving an alleged unlawful Reserve Bank, the country's central bank, which show that real gross domestic fixed refund to a company, is the first dismissed by one of the 11 investment declined at an annual rate of 1.5 per cent in the five quarters to mid-1990.

A disturbing element was that the private sector was largely responsible for this decline. Private sector fixed investment decreased over the period at an annualised rate of 3 per cent, double the overall rate. The Reserve Bank also warns against the danger of

prospects for growth.

Local businessmen are largely inured to the vicissi-tudes of the political climate. Says Dr Strauss: "The business community expects the socio-

abrasive moments." Mr Warren Clewlow, chief executive of Barlow Rand, the country's largest industrial company, adds: "The problems we are experiencing at the moment are those of people who are learning to exercise increasing freedom, not those

Some would consider that an unduly sanguine gloss on the township devastation, but Barlow is putting its money where its mouth is. Mr Clewlow says social unrest and labour turbulence bas not affected Barlow's investment plans and that significant investment is taking place in every area of the group. Capital projects in excess of R2bn are being

undertaken in the 1990-91 year. Although there is consider-able anecdotal evidence of increased foreign investment interest, some of it from quar-ters conspicuously absent in recent years, this has yet to translate into much money An explosion at Anglo American's Vaal Reefs gold mine yesterday killed 19 miners and injured 22, Our Foreign Staff writes. The cause of the blast, about 2,000 metres underground at Vaal Reefs' east mine, was not immediately known, "Preliminary investigations are taking place at present," an Anglo statement said. The incident was one of the worst in the country's mining industry this year. Vaal Reefs produced 75.5 tonnes of gold in 1989, about 12 per cent of South

Africa's output. Anglo gave no estimate of the impact on production.

flowing into the economy.

There are definite signs of a "wait and see" attitude, a function of instability, but also relevant is the sluggishness of the economy which hardly promises a good return on invest-

There are, however, definite signs of the sanctions climate thawing. South Africa recently cemented trade relations with Hungary and Mr Kent Durr, Minister of Trade and Industry, led a high-level trade delegation to Moscow last month which is expected to lead to the establishment of trade links. Analysts believe that export-oriented companies are, if anything, speeding up investment plans on the assumption that a sanctions-free environ-ment is imminent.

Mr Louis Kriel, managing director of Unifruco, the country's international deciduous fruit marketing arm, reports a dramatically improved atmosphere in Europe since Febru-

China and UK bicker over bases

By John Elliott in Hong Kong

> BRITAIN and China have failed to agree on the siting of Chinese army and navy establishments in Hong Kong after the colony returns to Peking's sovereignty in 1997.

> But there were some signs during two days of talks in Hong Kong that relations, strained since last year's Tananmen Square massacre, are beginning to improve and that China is willing to resume detailed discussions on the

1997 handover. Last week senior Chinese leaders conducted a Hong Kong policy review in Peking. This is believed to have authorised a more co-operative approach, which British diplomats hope will emerge in London early next month at a meeting of the Sino-British joint liaison group preparing for 1997 for 1997.

The location of defence establishments is specially sen-sitive because of local opposition to the stationing of China's army in Britain's existing barracks in the central area of

Hong Kong island.
The UK last year annoyed China by announcing a plan, now being implemented, to move Hong Kong's naval base to Stonecutters island in the harbour. This will make way for a big waterfront redevelopment project. The naval basin involved forms part of the Tamar garrison headquarters which the UK would also like to redevelop. The whole site could be worth anything from HK\$15bn (£1.04bn) to HK\$30bn, when put up for auction.

 More than 500 have been executed in China so far this year in the country's biggest crackdown on crime since 1983, according to the human rights group Amnesty International.

Role seen for foreign investment in India

By K.K. Sharma in New Delhi

THE Reserve Bank of India, the country's central bank, favours an increase in direct foreign investment as a way of reducing pressure on the bal-ance of payments, a pressure which it expects to grow because of the Gulf crisis.

In its annual report published yesterday the bank did not elaborate on how it expects foreign investment to grow but, in view of the restrictive policy of the Indian government, its suggestion is signifi-

The report points out that the inflow of foreign invest-ment into India is "very small" at \$200m a year compared with much higher inflows into other Asian countries.
The bank's recommendation

on foreign exchange has been made in the context of the current heavy strains involved in financing the current account deficit mainly through foreign aid, commercial borrowings and bank deposits by non-resident Indians.

The bank points out that the outlook for concessionary aid is not bright and terms are hardening at a time when India must exercise caution in making commercial borrow-ings from the world capital markets. It has also pointed out that the cost of interest paid to non-resident Indians for their bank deposits is also

The government's present policy is to allow direct foreign investment in selected areas with the emphasis on high technology and export-oriented ventures. The policy is being liberalised but an announcement has been delayed because of differences within the goverument.

The Reserve Bank has drawn attention to the growing cur-rent account and budgetary deficits in the last few years and urged that these be brought down to safer levels. It has asked the government to aim at reducing the budgetary deficit to just 1 per cent of gross domestic product from the 1.5 per cent projected for the current financial year.

Despite these warning signals, the Bank is cautiously optimistic about the growth prospects of the economy. It says many indicators suggest that real GDP growth in 1990-91 will be about 5 per cent after registering a growth of 4.5

per cent in the previous year. The report says that the monsoon rains this year have been good and so the high foodgrain target of 176.5m tonnes is likely to be achieved. Industrial growth is projected to be high at 8 per cent.

Japan's trade surplus grows

By Robert Thomson in Tokyo

JAPAN'S trade surplus for August increased by 3.7 per cent from a year earlier to \$3.49bn (21.88bn), as exports continued their third successive month of growth and trade with European Commu-nity increased sharply. Customs-cleared exports

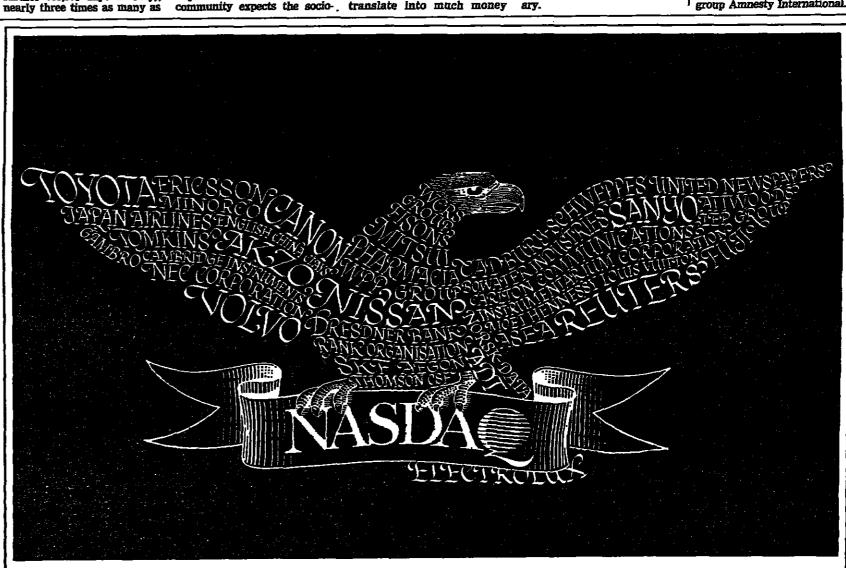

rose 2.6 per cent to \$22.4bn, to \$18.9bn. The bilateral sur-plus with the US fell 6 per cent to \$2.83bn, with exports to the US falling 3.2 per cent and imports from the US down 1.3 per cent from a year earlier.

Imports from the EC rose 22.9 per cent, and exports to the EC rose 9.2 per cent, with Japan's surplus down 16.2 per cent to \$1.13bm. Japan's Ministry of Finance suggests that the higher sur-plus, the second monthly

fall in aircraft imports.

Officials said the impact of the Middle East crisis on trade figures would be more obvious in the September accounts.

increase since June, is an exception because of a relative

An ADR listing? You'll be in good company on

More and more of the world's major companies are gaining valuable access to US investors by listing their shares in the form of American Depositary Receipts.

And when it comes to choosing an exchange to list on, most have chosen NASDAQ-the third-largest stock market in the world today.

Already, nearly 100 major international corporations are quoted on NASDAQ screens. Including Akzo, Reuters, NEC and Nissan.

But why NASDAQ?

First, because NASDAQ offers them very

substantially reduced listing costs.

Second, because it offers them the proven efficiency, liquidity and regulatory standards of a screenbased electronic market.

And third, because it is directly compatible with the London SEAQ system.

To find out what NASDAQ could offer your company, contact Lynton Jones, Managing Director, NASDAQ International, 43 London Wall, London EC2M 5TB; telephone: London 374 6969 or 374 4499.

US bank insurance fund 'may run out of money'

By Peter Riddell, US Editor, in Washington

THE US Federal fund which insures bank deposits is "very vulnerable" and could easily run out of money if a weaker economy produces continued substantial losses or if one very large bank fails, the Congressional Budget Office (CBO)

warned yesterday.

The CBO's gloomy assessment follows similar warnings on Tuesday from the General Accounting Office, the investi-gative arm of Congress. Both reports were immediately taken up yesterday by Senator Don Riegle, the Democratic chairman of the Senate Banking Committee, in support of legislation to give the Federal Deposit Insurance Corporation (FDIC) whatever authority it ums from member banks. The senator said that Con-

gress's first priority must be to protect the bank insurance fund – guaranteeing deposits up to \$100,000 – and action should be taken this autumn. The CBO yesterday estimated that bank failures could amount to between 600 and 700 could represent calls on the

"The uncertain economic outlook, exacerbated by declines in real estate values and sharp increases in oil prices, raises concerns that spending from the fund could be greater during the next few years than estimated," Mr Rob-ert Reischauer, the CBO direc-

The FDIC has already proposed increasing the assessment from the current 12 cents per \$100 to 19.5 cents next year in view of the continuing high level of losses, estimated at \$2bn this year. Such a loss would reduce the fund balance of \$13.2bn well below the cur-rent level of around 70 cents per \$100 of deposits, compared with the official target of \$1.25

per \$100. Congressional leaders support a further increase in insurance premiums above the level already proposed since maintaining the solvency of the fund would avoid the same kind of huge call on taxpayers seen in the savings and loan rescue. But bankers have warned that a further rise in remiums would be damaging. In parallel testimony to the

Senate Banking Committee. Mr Michael Destefano, vice presi-dent of Standard and Poor's Corporation, said that in the last six months the agency has lowered ratings on 36 US bank holding companies, some more than once, and upgraded only He said most of the down-

grades were driven by deteriorating asset quality in real estate portfolios and concern over loans to high leveraged

Political novice scores surprise win in Washington mayoral race

By Lionel Barber in Washington

MRS Sharon Pratt Dixon, a political novice with a touch of Margaret Thatcher to her campaign style, scored a surprise victory in the race for the Democratic party's mayoral nomination in Washington DC.

Mrs Dixon's win means that Washington DC could elect a woman as mayor in the November mid-term elections, a nota-ble first and a stunning rebuke to the city's entrenched political establishment, dominated for the past decade by Mayor Marion Barry.

Since 90 per cent of registered voters are Democrats in Washington DC, Mrs Dixon ranks as the favourite against Mr Maurice Turner, the amia-ble former DC police chief recruited by the Republican party to campaign on a law and

order ticket. Mrs Dixon, how-ever, expressed concern yester-day that gender could be an

issue in the general election.

Voters in the primary appeared dillusioned with the "politics as usual" offered by Mrs Dixon's opponents, particularly Mr John Ray, whose fund missing skills made him. fund-raising skills made him the favourite. With one exception, all candidates, including Mrs Dixon, are black. With a budget deficit of \$100m (£54m) looming and a akening local economy, Mrs Dixon, a lawyer and former middle manager with the local electric company, came across as a candidate willing to cut the

restore its finances. The Dixon campaign was helped by ringing endorsements

city's bloated payroll and

from the Washington Post which touted her as the candidate to clean up city hall. The intervention echoed the 1978 campaign in favour of Mr Barry in his first run for mayor.

Mr Barry's subsequent fall from grace and drugs and perjury trial this summer was the unspoken theme of the campaign. Mr Ray suffered from his failure to criticise Mr Barry; Mrs Dixon scored by coming out early against the mayor

on a drug possession count.
In a separate DC race, the
Rev Jesse Jackson, who is to
host a TV talk show this autumn, was easily nominated for one of two newly created shadow" seats to the US Senate, aimed at lobbying for DC

who is now awaiting sentence

Mexico

permitted to join Pacific economic conference

By Alan Robinson in Mexico City

Conference on Economic Co-operation (PCEC) this week, after the 15 member nations approved its request for membership of the group, the Foreign Relations Ministry

announced in Mexico City.
"Mexico will now participate
in the most important multilateral organisation of the Pacific Rim," a ministry spokesmen said.

The PCEC, which meets annually but does not have a

up in 1980 to co-ordinate efforts to improve trade

among members.

Mexico has been an observer at PCEC meetings since 1983 and is now represented on nine subcommittees.

The move, which comes only a few days after Mexico's formal request for an opening to negotiations on a US-Mexico free trade pact, reflects Mexico's campaign to sell itself to foreign investors as an

ideal export platform.

Mr Claudio X. Gonzalez,
President Carlos Salinas de
Gortari's special adviser on
foreign investment, said: "We are right next to the US and Canada, the world's largest market; we have a long Pacific coastline, we have coasts facing Europe, and Mexico is the gateway to Latin America." Close to 70 per cent of Mexico's total foreign trade is with the US, while the Asian Pacific Rim nations account

for roughly 7 per cent.
Although Japan accounts for the majority of this, its investment in Mexico is only about 6 per cent of the total foreign investment figure of \$24bn. Mexico's ardent wooing of Japanese investment over the last few years has not had spectacular results.

Only 40 of the approximately 1,400 in-bond process-ing (maquiladora) plants are Japanese-owned, in spite of the fact that these plants gen-erally have 100 per cent for-eign capital, and Japan has been remarkably cautious about direct foreign invest-

Brazil moves to protect exports

usual amounts.

By Christina Lamb in Rio de Janeiro

MR IBRAHIM ERIS, head of lars in almost double their yesterday demanding pay the Brazilian central bank, has admitted that the dramatic fall of the dollar exchange rate caused by the Government's latest liquidity squeeze has forced it to buy \$800m in dollars in the last 10 days to prevent Brazilian exports being priced out of the market

priced out of the market.

Mr Eris told a seminar in
São Paulo: "We are facing a dilemma between our mone-tary policy and the exchange rate... We have created a simation of panic in the market through our mistake of predicting a monetary adjustment in September."
The prospect of a \$14bn

squeeze this month caused a run on the cruzeiro. Banks have been using foreign exchange to buy cruzeiros to pay rising interest rates, which have reached an annual 670 per cent and meet increased com-pulsory reserve levels. Exporters too have been selling dol-

increases of up to 297 per cent. Oil workers, demanding a 104 To prevent the dollar rate falling so low as to make exports uncompetitive Mr Eris said the bank had bought about the battle had bodght about the usual \$300m per month and going against the Government's tight monetary policy. "It was an abnormality, going against our principles. Since March we have been not

NDP doubles its representation

By Bernard Simon in Toronto

CANADA'S left-leaning New Democratic Party has made a strong showing in elections in the prairie province of Mani-toba, less than a week after gaining control of the provin-cial government in Ontario.

Although Manitoba voters returned the province's Progressive Conservative govern-ment with 30 of the 57 seats in the legislature, the NDP almost doubled its representation from 12 to 20. The NDP thus becomes the province's official opposition, ousting the Liberals, who lost two-thirds of their seats. The NDP's win in Ontario last week was also at the expense of the Liberals. Although Canadian voters

often switch allegiances in pro-vincial and federal elections, the results in Ontario and Manitoba bring little comfort to either of the main federal parties, the ruling Progressive Conservatives or the opposition Liberals.

Manitoba's Conservative Premier Mr Gary Filmon has distanced himself from Mr Brian Mulroney, Canada's Prime Minister, especially through his opposition to the failed Macch Lake constitutional Meech Lake constitutional accord. The Liberals' poor showing in the two provinces will deprive the federal party of badly needed resources, and

Manitoba Premier Gary Filmon retains power reduces the influence of some environment organisation said

of its most charismatic provincial politicians. However, the NDP's strong performance at this stage appears to reflect more a protest vote than an endorsement of its interventionist policies. The party is still not seen as a serious threat to the Tories or Liberals.

 Greenpeace said on Tuesday its flagship, The Rainbow Warrior, was blocking shipments from Canada's largest chlorine producer as part of a protest against the manufac-ture of the "deadly" chemical, Reuter reports from Vancou-

THE need for a closer economic and political union in Europe has been made all the more urgent by the Gulf crisis, Mr Jacques Delors, pres-ident of the European Commis-

sion, said yesterday.

During a debate in Strasbourg on the Gulf, Mr Delors said Europe must become an "actor on the world stage, which is prepared to assume its full responsibilities." Fallure to do so would mean jeop-ardising all the work done towards building a new Europe, he said. His views were echoed by

MEPs from most parties, who argued that events in the Gulf proved that the European Com-munity lacked the mechanisms to allow it to act quickly and decisively enough to protect its

The point was put more directly earlier in the week by Sir Leon Brittan, the EC competition commissioner, who argued that the existing mechanism of political co-operation between member states was no longer enough. He put forward the notion of a European Secu-rity Community which would provide a forum for a common European defence strategy.

Sir Geoffrey Howe, the Brit-ish deputy Prime Minister, expressed scepticism about whether member states were ready to go beyond the current security institutions of Nato and the Western European Union or WEU. But he did agree with the general feeling in Strasbourg that the EC's response to the Gulf crisis had not been enough.
"There is a hankering for

ways that would make more impressive the community's response," he said, adding that the crisis "underlined the need to give Europe a stronger for-eign policy identity."

Mr Delors attempted to put a brave face on last weekend's meeting of finance ministers in Rome, during which member states expressed their doubts about a rapid move towards

In an unusually direct attack on member states - Spain in particular - and the gloomy impression they had given to reporters, he said: "Some people prefer to impress the journalists by acts all of their own making."
He said that while the pessi-

mists talked of the strains imposed by high oil prices making monetary union more difficult, in fact the opposite was the case. The crisis had made monetary union "all the more necessary as there is a risk the economies will take separate paths otherwise," he

However, Mr Delors expressed anxiety about the effects of high and unstable oil prices. "We are considering how we can curb excessive speculation and find a price

Spain's view on EMU is 'unchanged'

By Tom Burns in Madrid

STUNG by accusations that Spain has shifted its position and is attempting to delay moves towards European monetary union, senior officials in Madrid yesterday claimed that compromise proposals on the process tabled by Mr Carlos Solchaga, the economy minister, at a meeting of EC finance ministers in Rome last weekend had been misrepre-

We have not changed our "We have not changed our position," said Mr Pedro Perez, the junior economy minister. "We are proposing dates and concrete ideas that will make EMU, which is a revolutionary process, possible for all members of the community."

The Solchaga plan was a sur-prise move at the Rome meet-ing and was welcomed by Mr

in Strasbourg

John Major, the UK Chancellor of the Exchequer, every bit as much as it angered Mr Jacques Delors, the European Commis-

sion president. The plan suggested delaying the start of the second phase of the three-part Delors plan for EMU by a year until January 1

It also called for the creation of a European Monetary Fund issuing a "hard Ecu" on the lines proposed by Mr Major, during a second stage that would last for between five and six years — a period longer than that envisaged by Mr

European Commission offi-cials later implied that they expected Mr Felipe Gonzalez, Spain's Prime Minister and a known enthusiast of the Delors plan, to overrule his finance minister. Such suggestions have intensely irritated Madrid officials, who insist that Mr Solchaga has the Prime Minister's total support.

One substantive ingredient of the Solchaga plan is the creation of a monetary institution, much like Mr Major's Euro Fund, which would be independent of national governments and which, at the end of the second stage, would transform itself into the European Sys-tem of Central Banks. A second element is the

manner in which this institution would issue a "hard Ecu." This would would not be devalued against any national currency in any potential alignment and after a period of irreversibly locked bilateral

exchange rates, would become the single currency of Europe. The fundamental concern expressed by Madrid officials is that present thinking in the commission, with the specific backing of France, on the tim-ing of EMU leads inexorably towards a two-track monetary union in which Spain and Britain would be losers in the

slower lane.

They said the spirit of the Delors plan, calling for all EC members to move towards a single European currency, a central European bank and a common monetary policy at the end of the third stage, is incompatible with the timing that Mr Delors and the commission now appear to be sug-

gesting. Economic Viewpoint, Page 23

Yugoslavian president proposes poll

Paris Club reschedules Morocco's debt

Morocco has won a major debt rescheduling agreement from the Paris Club of creditor nations, George Graham writes from Paris.

The agreement breaks new ground in encouraging Paris Club countries for the first time to convert part of their Moroccan debt into local curance projects including envirency projects, including envi-ronmental protection, aid and

equity investments.

The 11 creditor countries, estimated to be owed around \$7.5bn out of Morocco's total debt of \$21bn, agreed to accept a rescheduling of repayments on development aid loans over 20 years, and of other official loans over 15 years.
The rescheduling period is

longer than most past Paris Club agreements for lower middle income countries like Morocco, which last rescheduled \$1.05bn of debt payments in October 1988 over 10 years. One of the most heavily indebted middle income countries, Morocco's total debt ser vice in 1989-90 has been esti-mated at \$5.6bn. Its outstanding debt amounts to 106 per cent of GDP.

EC delays Saab probe The European Commission said yesterday it had delayed an investigation into French

plans to grant Sweden's Saab-Scania a FFr300m (\$56.6m) subsidy for a truck-making plant in France, Reuter reports from A commission spokesman said the European Communi-ty's executive would meet French government officials

within two weeks to discuss fresh information they had supplied on the state aid. The commission would then decide whether to open a formal enquiry, he added.

France sought clearance in June for its part in a FFr1.7bn Saab-Scania investment in a plant at Angers in western France. EC competition rules introduced in 1989 require advance commission approval of all motor industry subsidies over Ecul2m (\$15.6m).

Romanian forex sales Romanian companies will be able to auction their surplus hard currency from next month as a step towards creating a new foreign exchange market, a senior bank official said yesterday, Reuter reports

Mr Dan Pascariu, the vice-president of the Romanian Bank for Foreign Trade, said passed on Tuesday, Romanian companies could retain 30 per cent of the hard currency they earned from the exports for

their own use.

At the present official rate,
Romanian banks give 20 lei to
the dollar, while the black market rate is at least 100 to the dollar.

Aibanian wage rises Communist Albania has

announced wage rises of up to 20 per cent to help boost pro-duction and its stagnating economy, Europe's poorest, Reuter reports from Vienna. The state news agency ATA said that measures approved by the Council of Ministers would raise average monthly pay to about 570 leks (\$57) from 523 leks and ensure a minimum monthly income of 450 leks. The rises, of up to 20 per cent for those on the lowest

High risks for the western alliance in a Gulf conflict

seems to be unfolding towards a major tragedy. The chance of war is high; if so, the costs in terms of human life will be fearful; the prospects of victory are more than uncertain; and yet the ratchet of events seems to be driving inexorably towards

War is not America's declared policy, of course. But among US strategic analysts there seems to be an almost universal assumption that war is coming because it cannot be avoided. The forces are being built up; they cannot be with-drawn while Saddam Hussein remains in control of Kuwait: they cannot sit there for long, so they must be used soon after deployment allows, say from mid-October.

It is the prospect of war which is releasing a flood of old US complaints that the allies are failing to pull their weight; but the prospect of war is also, no doubt, the reason why the allies are hanging back.

By a remarkable achievement of international solidarity, the United Nations has managed to agree on a static policy of denial, in the embargo. But a war would be a moving process, conducted by the Americans, at a time and in circumstances which are uncertain, and with military and political objectives which may not be defined in advance. By hassle and persuasion, the US has got the allies to step up their military contributions to the enforcement of the embargo. But if war breaks out, all bets will be off, and the almost universal consensus behind the UN Security Council resolutions will fly apart. ed there is also a serious potential threat to the general cohesion of the western alli-

In the past, Americans have tended to argue that the Euro-pean allies owed them a debt of solidarity, at the very least: in return for the US commitment to the defence of Europe, the Europeans should back up the US when it was defending western interests outside the Nato area. The unstated threat. and it is not always unstated, is that if the Europeans are unco-operative, the Yankees

might go home. In the new era of peace and disarmament, however, this is

unlikely to be a one-sided debate. No western European government wants the government wants the Americans to get out of Europe. On the other hand, it is now widely admitted that, for the foreseeable future, there is no meaningful Soviet military threat to western Europe, because the Warsaw Pact has effectively ceased to

This week, the US and the Soviet Union scrapped their February agreement to limit their forces in Europe to 195,000 men each (plus a bonus

IAN DAVIDSON ON EUROPE

of 30,000 for the Americans), because it had simply been overtaken by events. The new unofficial target figure for US forces is now around 70,000-100,000, but no figures are sac-

rosanct any more.
Indeed, doubts remain whether Nato itself can survive the disappearance of the Soviet threat, or in what form. At the London summit earlier this year, Nato leaders made a declaratory stab at the rethink-ing of western military doctrine, and that process is still under way. It seems probable that a steep cut in American forces in Europe would reduce America's military role in the alliance. But the political debate over the future of the alliance, the doctrine of Nato, and the role of the US, would inevitably become much more heated if it were being con-ducted against the backdrop of a war in the Gulf.

The debate would no doubt be particularly acute in Ger-many, President Mikhail Gorbachev made an important symbolic concession earlier this year, when he agreed that the unified Germany should remain a full member of Nato. But the really new fact after unification on October 3, is that Germany will become a fully sovereign member of Nato, with a potentially greater influence over the evo-lution of the alliance.

An early test of German atti-tudes, will be the stationing of foreign troops in Germany. The conclusion yesterday of the "2 plus 4" process means that the rights of the Second World War victors will fall

eign troops will have to be found. President François Mitterrand has assumed that the new Germany would not want French troops to stay, and has set about pulling them home

over the next four years.

In reality, the German attitude is bolder and more assertive than that. Next Monday, at the bilateral Franco-German summit in Munich, Chancellor Helmut Kohl is likely to ask President Mitterrand to keep French troops in Germany, but only on condition that they are integrated with allied (probably German) forces. One idea would be the formation of a Franco-German corps.

The first implication is that the Bonn Government is drawing the natural conclusion from the likely reduction in US forces, and believes that Nato will become more of a European affair. But a reduced Nato can only have a plausible defence posture if all members contribute on an equal footing. Therefore, the time has come for France to abandon its antique pretensions to an autonomous defence policy, separate from the rest of the alliance. In other words, the German Government is turn-ing on France the integrationist logic in the defence field which France has turned so long and so intensely on Bonn, in the fields of economic and monetary union and political

The logic of European integration is likely to remain powerful, whatever happens; there is no plausible case to imagine that the new Germany will lurch off into dreams of national expansionism. On the other hand, a war in the Gulf would almost inevitably provoke a debate over the transatlantic facet of European security, especially in Germany, but also in other European

The question here is not one of right and wrong, but of politics. Perhaps, if all else falls, the principles at stake in the Gulf will require resort to war, despite the tragic consequences. Perhaps, one day, the logic of integration would make it a feasible option for Europe as well. But for the moment we only know that a war in the Gulf would be deeply damaging for the Atlandeeply damaging for the Atlan-tic alliance.

Soviet tussle over reform plan brings anger and bewilderment

By Anthony Robinson in Moscow

THE debate in the Soviet parliament on economic reform moved into closed session vesterday, leaving deputies angry and foreign businessmen bewildered over the confusing turn of events.

The deputies were annoyed at the Government's delay in providing full texts of the rival economic programmes of Prime Minister Nikolai Ryzhkov and Professor Stanislav Shatalin. The debate moved to special committees and the next plenary session is expec-ted on Monday.

Meanwhile, worried foreign businessmen, especially those used to the old system of foreign trade monopolies and a foreign trade bank which always paid promptly, were chasing payments.
"Up till three months ago

delays were apologised for. Now they are simply being told that there is no money in the bank," said a trader with long experience in Moscow. "When pressed, Soviet banks now sugest that foreign businessmen should follow the German example and ask their governments to grant big trade credits if they want to be paid."
In June a DM5bn (£1.7bn)

loan, guaranteed by the West German government, was immediately used to wipe out accumulated trade debts. Moscow will receive a further DM12bn from West Germany to help finance the repatriation of its forces from East Germany by 1994 and is also benefiting from higher oil prices and the sale of minerals and other sur-

But with the republics and individual enterprises now demanding control over their own foreign trade and hard currency earnings, debt financing and hard currency transactions are entering uncharted waters.
Indeed, the debate over the

speed and extent of moves

towards a market system has become inseparable from the wider debate over the country's future political shape. Mr Ryzhkov has warned that

adoption of different economic programmes by the centre and individual republics would lead to the disintegration of the Soviet Union. In fact, the delay in working

out an agreed joint economic programme has already accelerated this process, with the Russian parliament on Monday adopting the Shatalin plan, irrespective of any subsequent decision by the all-union parliament, the Supreme Soviet.

• Dun & Bradstreet, the US information group, said yester-day that it had signed a deal with Goskomstat, the Soviet Union's state committee on statistics, to disseminate the latter's data on Soviet busines to the west, writes Nikki Tait

Final settlement for Germany at '2 plus 4' negotiations

FOLLOWING are excerpts from the "Treaty on the final settlement with respect to Germany" agreed yesterday

THE Federal Republic of Germany, the German Democratic Republic, the French Republic, the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland and the United States of America... Convinced that the unification of

Germany as a state with definitive borders is a significant contribution to peace and stability in Europe... Recognising that thereby, and with the unification of Germany as a democratic and peaceful state, the rights and responsibilities of the Four Powers relating to Berlin and to Germany as a whole lose their function . . .

Have agreed as follows:

ARTICLE 1 1. The united Germany shall com-prise the territory of the Federal Republic of Germany, the German Democratic Republic and the whole of Berlin. Its external borders shall be the borders of the Federal Republic of Germany and the German Democratic Republic and shall be definitive from the date on which the present treaty comes into force. The confirmation of the definitive nature of the borders of the united

The Commission has justi-Germany is an essential element of the peaceful order in Europe. fied this on the grounds that the measure concerns health and safety. The UK argues that 2. The united Germany and the Republic of Poland shall confirm the as most of the measure is actually focused on employment and pay, the correct legal basis requires majority backing. existing border between them in a treaty that is binding under inter3. The united Germany has no ter-ritorial claims whatsoever against other states and shall not assert any in the future.

4. The governments of the Federal Republic of Germany and the German Democratic Republic shall ensure that the constitution of the united Germany does not contain any provision incompatible with these principles ...
5. The governments of the French

'The united Germany has no territorial claims whatsoever against other states and shall not assert any in the future'

Republic, the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland and the United States of America take formal note of the corresponding commitments and declarations by the governments of the Federal Republic of Germany and the Germany Democratic Republic and declare that their implementation will confirm the definitive nature of the united Germany's borders.

ARTICLE 2 The governments of the Federal Republic of Germany and the German Democratic Republic reaffirm their declaration that only peace will emanate from German soil. According to the constitution of the united Germany, acts tending to and undertaken with the intent to disturb the peaceful relations between nations, especially to prepare for aggressive

war, are unconstitutional and a punishable offence...

1. The governments of the Federal Republic of Germany and the Ger-

man Democratic Republic reaffirm their renunciation of the manufacture and possession of and control over nuclear, biological and chemi-cal weapons. They declare that the united Germany, too, will abide by these commitments. In particular, rights and obligations arising from the treaty on the non-proliferation of nuclear weapons of 1 July 1968 will continue to apply to the united Ger-

many.
2. The Government of the Federal Republic of Germany, acting in full agreement with the Government of the German Democratic Republic, made the following statement on 30 August 1990 in Vienna at the negotiations on conventional armed forces in Europe:

The Government of the Federal Republic of Germany undertakes to reduce the personnel strength of the armed forces of the united Germany to 370,000 (ground, air and naval forces) within three to four years. This reduction will commence on the entry into force of the first CFE agreement. Within the scope of this overall ceiling no more than 345,000 will belong to the ground and air forces which, pursuant to the agreed mandate, alone are the subject of the negotiations on conventional armed

forces in Europe. The Federal Government regards its commitment to reduce ground and air forces as a significant Gercontribution to the reduction of conventional armed forces in Europe. It assumes that in follow-on negotiations the other participants the negotiations, too, will render their contribution to enhancing security and stability in Europe, including measures to limit person nel strengths.

The Government of the German Democratic Republic has expressly associated itself with this state-

1. The governments of the Federal Republic of Germany, the German Democratic Republic and the Union of Soviet Socialist Republics state that the united Germany and the Union of Soviet Socialist Republics will settle by treaty the conditions for and the duration of the presence of Soviet armed forces on the territory of the present German Demo-cratic Republic and of Berlin, as well as the conduct of the withdrawal of these armed forces which will be completed by the end of 1994...

1. Until the completion of the with-drawal of the Soviet armed forces from the territory of the present German Democratic Republic and of Berlin in accordance with Article 4 of the present treaty, only German territorial defence units which are not integrated into the alliance structures to which German armed forces in the rest of German terri-tory are assigned will be stationed in that territory as armed forces of the

united Germany. During that period and subject to the provisions of paragraph 2 of this

will not be stationed in that territory or carry out any other military activ-

2. For the duration of the presence of Soviet armed forces in the territory of the present German Demo-cratic Republic and of Berlin, armed forces of the French Republic, the United Kingdom of Great Britain and Northern Ireland and the United States of America will, upon German

"The governments of the Federal and Democratic Republics reaffirm that only peace shall emanate from German soil'

request, remain stationed in Berlin by agreement to this effect between the Government of the united Germany and the governments of the states concerned ...

3. Following the completion of the withdrawal of the Soviet armed forces from the territory of the present German Democratic Republic and of Berlin, units of German armed forces assigned to military alliance structures in the same way as those in the rest of German territory may also be stationed in that part of Germany, but without nuclear weapon carriers. This does not apply to conventional weapon systems which may have other capabilities in addition to conventional ones but which in that part of Germany are equipped for a conventional role and designated only for such. Foreign armed forces and nuclear weapons or their carriers

will not be stationed in that part of Germany or deployed there.

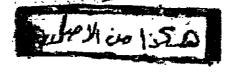

The right of the united Germany to belong to alliances, with all the rights and responsibilities arising therefrom, shall not be affected by the present treaty.

ARTICLE 7
1. The French Republic, the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland and the United States of America hereby terminate their rights and responsibilities relating to Berlin and to Germany as a whole. As a result, the corresponding, related quadripartite agreements, decisions and practices are terminated and all related Four Power institutions are dissolved. 2. The united Germany shall have accordingly full sovereignty over its internal and external affairs.

1. The present treaty is subject to ratification or acceptance as soon as possible. On the German side it will be ratified by the united Germany. The treaty will therefore apply to the united Germany...

ARTICLE 9

The present treaty shall enter into force for the united Germany, the French Republic, the Union of Soviet Socialist Republics , the United Kingdom of Great Britain and Northern Ireland and the United States of America on the date of deposit of the last instrument of ratification or acceptance by these states...

What does it take to build a car that is both relaxing to drive, yet can make the world fly by? A car that combines the comfort of a luxury car with the handling of a sports car?

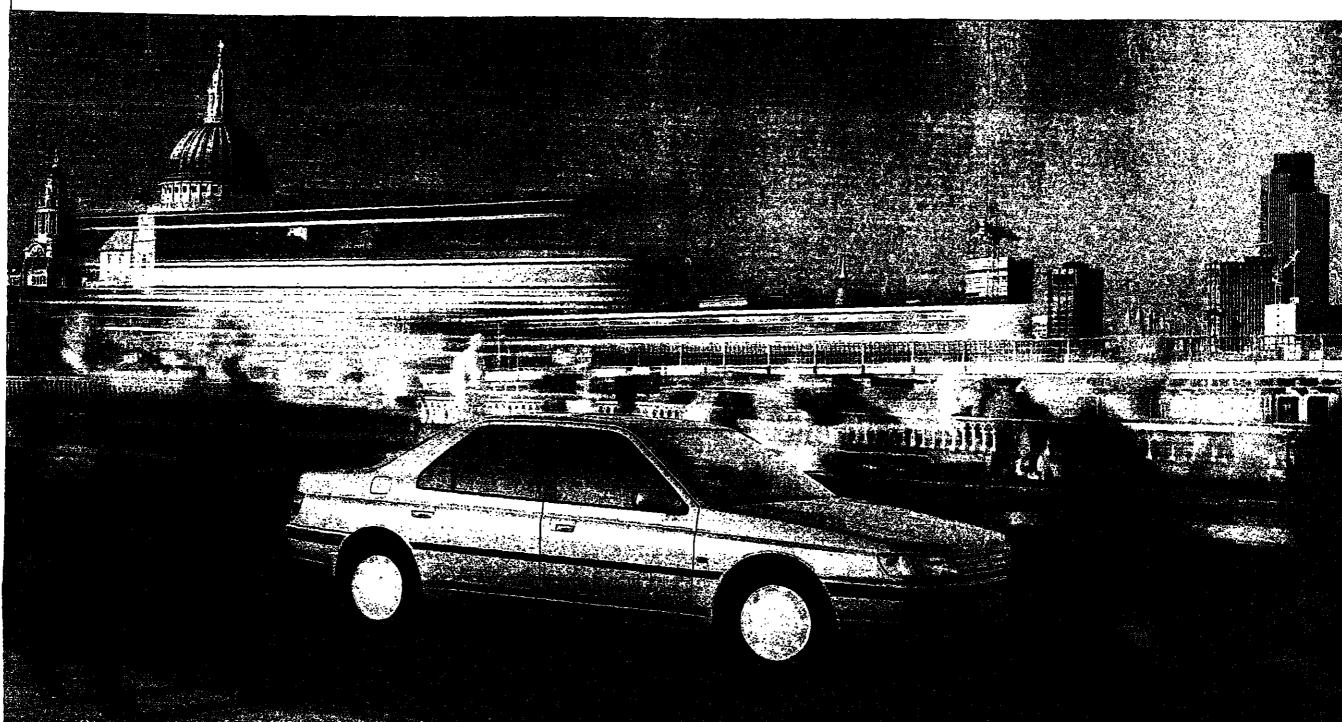

A lot more than just fitting it with leather, walnut and air conditioning.

In fact, it's taken four years and over six hundred million pounds to create the new Peugeot 605 range.

sophisticated suspension systems fitted to a production car. It adjusts itself to road conditions, switching each shock absorber from firm to soft in just 150 milliseconds. This suspension can absorb a bump so quickly that the driver hardly senses it, yet it still keeps him in perfect control of the car.

And finally, we've even revolutionized the way your 605 is cared for,

n pian

ermen

THE NEW PEUGEOT 605. RELAX AS THE WORLD FLIES BY.

First, we built a factory, with a paint shop so clean no particle of dust more than 5 thousandths of a millimetre thick can get inside. And where every body panel is precisely positioned according to a computer model consisting of 12,000 reference points.

We created a revolutionary 24 valve, 3 litre V6 engine with a variable length inlet manifold, enabling the engine to breathe deeper as it goes faster. This extends its optimum torque curve, making it smooth and refined in town, yet a free revving performance engine on the open road.

Then we designed one of the most

by creating Lioncare Gold. As well as giving you all the benefits of AA Relay, it makes servicing your car a more relaxing experience. For instance, we'll pick up and return your car, or even lend you another Peugeot whilst yours is being serviced.

All 605s are fitted with a three-way catalytic converter, anti-lock braking system and an ultrasonic alarm as standard. If you'd like more information on the seven car 605 range, call 0800 678 800 for a free information pack.

Or even better, visit your Peugeot dealer and take a test drive in the new Peugeot 605. Then you can relax as the world flies by.

THE LION GOES FROM STRENGTH TO STRENGTH

Jaguar tries to leap the Korean tariffs wall

By John Ridding in Seoul

THE LAWN of the British embassy in Seoul yesterday provided the unusual venue for the launch of Jaguar cars in Korea.

A crane operator carefully winched a shining XJ6 over the garden wall, where it was pored over by hundreds of dignitaries.

Entering the Korean motor mar-

ket is unlikely to be much easier. Tariffs and taxes double the cost of imported vehicles between port and showroom and foreign cars have captured less than 1 per cent of local car sales.

But the Korean market also represents a unique obstacle to import-ers of high-quality products such as Jaguars. Public campaigns against excessive consumption, particularly luxury imports, have soured the prospect for those hoping to exploit Korea's rising disposable incomes.

The resulting problems for exporters have provoked concern from trading partners. "One of our objectives in letting Jaguar use the embassy for their launch is to give a message to the Korean govern-ment that the type of campaign against so-called luxury imports which we saw earlier this year is not acceptable or sustainable," says Mr David Wright, UK ambassador.

Responsibility for the campaign is hard to pinpoint. Korean officials deny involvement and argue that the series of articles carried in the local press and actions by agents and importers to restrict high qual-ity imports reflect a broader concern about tension between the haves and have-nots in Korea's fiercely egalitarian society and worries about the country's slower economic growth and deteriorating bal-

ance of payments. Whatever the motivation, the effects have been clear. Outlets for foreign fashion companies such as Gucci and Burberry have been forced to close while several trading companies have stopped importing

campaign from 250 to 100 a month. eign cars the biggest disincentive for prospective purchasers has been

the near certainty of a tax audit.

That the market is difficult is readily accepted by Mr Sam Kim, managing director of Jaguars Korea. But he argues that Jaguar's entry into the Korean market is a long-term strategy and that attitudes to foreign cars will improve.

"The situation is similar to that of foreign cigarettes," he says. "When foreign brands started entering the market a few years ago no one wanted to be seen smoking them. But now it doesn't matter at

For the moment, however, Jaguar sales targets are modest. Mr Kim hopes to sell 20 cars in Korea by the end of the year and 40 in 1991. More important, he argues, is to create the right image for the product for

exclusive niche. We have to estab lish a strong brand name and target our customers through selective

advertising," says Mr Kim.

There is certainly room for growth. Only 2,000 imported cars were sold in Korea in 1989 and the sharp increase in disposable incomes over recent years means that there are enough people who can afford won 60m (£45,000) for the cheapest Jaguar range

Unless the aircraft subsidies row is settled soon, a new trade war may break out, writes Paul Betts torted trade in civil aircraft by pro-viding huge subsidies for Airbus. HE three year controversy between Europe and the US over government subsidies The Europeans have retorted that US commercial aircraft makers have benefited from as much if not for the European Airbus consortium is about to reach make-or-break more indirect government support point. If the latest round of negotia-

through military R&D funding as

sels fails to secure a compromise, Airbus could be the subject of a new well as direct support from civil government budgets like Nasa. The current talks centre on the trade war like those over cars, soya and pasta a few years ago.

During the last six months there redrafting of two key articles in the Gatt civil aircraft agreement. The first, on which there now appears to were signs of substantial progress in the negotiations to revise the be consensus, is a ban on govern-Agreement on Trade in Civil Aircraft under the General Agreement on Tariffs and Trade (Gatt). Mr ment inducements to foreign countries to help sell aircraft. This has involved, for example, offering air Jean Pierson, the Airbus chairman, suggested last April in Toulouse traffic rights to a foreign national airline or the supply of other goods that the two parties were getting closer. This summer, the US agreed to allow the deadline for the talks to and services in exchange for a big

aircraft order. The second and more contentious article concerns subsidies. On this, the Europeans claim they have gone a long way in meeting US demands by agreeing to reduce gov-ernment support for new aircraft programmes from 70 per cent to around 40-45 per cent. But the US insists on a cap of 25 per cent, which the Airbus partners have

found unacceptable.

Moreover, the Europeans want

the new Gatt civil aircraft code on indirect government support for commercial aircraft programmes. The French and the West Germans are also pressing for some form of language in the revised code on exchange rates to enable the Airbus partners to hedge themselves against the US currency falling too

Airbus antagonists head for a showdown

At the Farnborough Air Show last week. Mr Pierson claimed the Europeans had gone as far as they could. "We would rather have no agreement at all than one which is unbalanced. Enough is enough." Mr Henri Martre, chairman of the French Aerospatiale group with a 37.9 per cent stake in Airbus, said the low level of the dollar was distorting trade. And Mr Erich Riedl, the West German state secretary in charge of aerospace called on Airbus partners to examine all aspects of the dollar exchange problems facing the European aircraft pro-

The Europeans have since leaked an Airbus document claiming that the US government has provided about \$23bn in identifiable direct and indirect support to Boeing and McDonnell Douglas through various mental agencies over the last ten years. The Airbus study also ends with a sting by referring to testimony at Congressional hearings on the future of aviation in 1976 by Dr Aaron Gellman.

The president of Gellman Research Associates said then: "Because the overall benefits to society are so great from the retention of a favourable balance of payments, it is quite proper for the public sector to sponsor substantial R&D to support an implicit rational objective to lead in the field of avia-

The Europeans argue that if Airbus had not been formed, the US would have enjoyed a monopoly in the large civil airliner market. Airbus also insists that breaking into the airliner market "in face of a totally dominant, firmly entrenched competitor takes determination, investment and a long term view. The costs, risks and timescale involved constitute such a barrier to new entrants that government

support is mandatory". At this stage, the biggest sticking point in the negotiations are the US objections to West German govern-ment support for Deutsche Airbus when the dollar drops below a cer-

tain level against the D-Mark. The US sees this as setting a potentially dangerous principle, and Washington is worried about an attempt by some Airbus partners to introduce for aircraft sales a currency support system similar to the EC's controversial system of monetary compen-satory amounts for farm products.

The Germans retort that this state support is the only way of complying with an earlier American demand to transfer aircraft production to the private sector. Indeed, the Germans are in the front line of the debate because of all the Airbus partners they had to invest the most when they joined the programme. Unlike France and the UK. Germany had to rebuild virtually from zero its aerospace industry

after the war. Failure to secure an agreement on the Gatt civil aircraft code could jeopardise the chances of a successful resolution of the Uruguay Round of international trade talks at the end of this year. This, coupled with the fact that the US probably stands to lose from an aircraft trade war since it sells more to the Europeans than it buys from them, would appear to argue for a compromise in the Airbus dispute.

complaint to Gatt.

MR MICHAEL FARREN, the US Commerce Under-Secretary for International Trade, last week acknowledged he was risking prog-ress in the contentious US-EC talks over Airbus subsidies when he made public a consultants' report on the European consortium.

The report — by Gellman Research

Associates - sent a message to US officials and industry which Mr Farren believed necessary: that an examination of even the sparse evidence publicly available, using the most conservative modelling possible, revealed such a big threat to US aircraft producers by Airbus that it could no longer be ignored.

Mr Farren said West Germany, the HE France and Spain had to

Airbus companies, even if it meant bringing another quarrel to Gatt. In its key findings, the report

• The success of the most recent

the recent strong market for transport aircraft. However, with Airbus cash flows turning positive towards the mid-1990s, there was no reason to continue government support. Airbus would remain a force in

the aircraft market because of the

high political and social costs

involved in reducing its activities and the small absolute costs to the 20vernments ~ up to \$1bn per year of continuing support.
 The US industry, competing against aircraft sold below cost, would lose market share and profits, which would discourage the introduction of new advanced American aircraft. The US compa-

partners and to agree to significant technology transfers overseas. The US government has been reluctant to threaten sanctions. According to Mr Farren, the negative impact of subsidies is often not learly understood until too late for policymakers to reverse them.

nies might be forced to seek foreign

The outcome of a Gatt case against the subsidies is by no means certain. While export subsi-dies are a clear violation of international trade rules, domestic subsidies are not. It is not clear at what point a domestic subsidy becomes

an export subsidy.

However, if no agreement is reached by September 30, the US will ask a Gatt panel to condemn the currency guarantees given by West Germany to Deutsche Airbus on the grounds that they violate the industrial country agreement that exchange rates float freely. The contention is that Germany, with its large trade surplus, is not playing by the rules of the game if it subsidises a competitor of the country with the largest deficit.

The US has been reluctant to take the matter to Gatt as long as there has been hope of an overall solution. The EC argued that negotiations would be made more difficult by the case.

US industry, unions and govern-ment could follow an alternative course of filing a countervailing duty case with the Commerce Department and International Trade Commission. This would have an impact only on Airbus sales to the US, but that is 50 per cent of the world market.

American officials scoff at EC contentions that the US subsidises its own industry and insist that there is nothing comparable to the launch aid and production support

Averag Price Cash Flow (15,426)‡ (7.854)A300-800 1977 60.0 (12,899)‡ (5,868) А310 ф 1977 (4,920)(3,528)A321 409 41.0 831 78.8 (3,701)

VIABILITY OF AIRBUS PROGRAMMES

The net present value of the cash flow is the best single measure of a project's overall profitability, it shows the value, in 1990, of a project's stream of expenditures and receipts over time, after allowing for the opportunity cost of capital. According to this procedure, a receipt (or expenditure) in an earlier year is worth more (or costs more) in 1990 than would an equivalent sum in a subsequent year. The figures in column four thus represent Geliman's estimates of the losses on Airbus production which the European partners have had to cover by subsidies.

provided to Airbus.

Although US companies profit from Pentagon contracts, these are conducted on an arms-length trans-action basis and actually bring a lower rate of return than civil contracts. Besides, Airbus gets an even larger pay-off from EC government contracts, officials say. Similarly, they dismiss the argu-ment that the US companies benefit

unfairly from space agency research and development. US com-

panies join with government agencies on research projects, but Euro-pean government laboratories work with Airbus too, officials say. Research funded solely by the Nasa is available throughout the world and was in fact made use of by Airbus in the development of the A320's supercritical wing, they contend. Nasa wrote to Airbus requesting payment for its contri-bation and reportedly received a

disparaging rejection.

Arriving in new markets more quickly and comfortably than your competition is the whole reason behind owning a Cessna Citation.

And particularly suited to meeting the challenges of the fast-changing European business world are the Citation III, the Citation VI, and the Citation VII. Together, they make up the widest product range in this category of aircraft.

Each offers a stand-up cabin, without sacrificing efficiency. Mission versatility without losing speed. Outstanding performance and comfort that is remarkably affordable.

Citation. A name synonymous with performance. Safety. And affordability.

Citation business jets do more than simply get you from here to there. They allow you and your business associates to travel in comfort, stretch out and work in flight, and arrive at your destination fresh and ready to do business.

The Citation III, VI, and VII all feature passenger cabins a full 70 inches high - tall enough to stand up and walk around in.

There's also a private, fully equipped toilet.

A refreshment center lets you enjoy hot or cold beverages, even hot food from a warming oven.

But whilst they are filled with size and comfort, these business jets are also built for speed. They cruise at 543 mph, and are certified to fly at altitudes of

above turbulent weather without detours or delays. Even more importantly in congested European air space, the outstanding speed, climb capabili-ties, and high altitude cruise of

51,000 feet, allowing them to fly

these Citations often gains them traffic clearance and airport slots not available to other aircraft.

Whichever you choose, the choice is clearly Citation.

While all of these Citations share outstanding interior space and performance characteristics, each offers distinct qualities.

The Citation VI – As the lowest priced aircraft in its category, the VI makes the outstanding performance of Citation business jets affordable to more businesses than ever before.

The Citation III - As the first business jet in its category to take advantage of new technology in aerodynamics, systems, struc-ture, and propulsion, the III quickly became the world's best seller in its class, and remains so today.

The Citation VII - With even more powerful engines than the III and VI, the Citation VII offers even greater cabin comfort and mission flexibility.

Find out more about which Citation model best matches the needs of your business.

Your Citation representative will be pleased to provide you with any additional information you may require. Please contact Ernest J. Edwards, by calling 0344-873222, or by writing Cessna Aircraft

AS AN ENTREPRENEUR, YOU SEE OPPORTUNITIES IN THE SINGLE EUROPEAN MARKET. You have plans which extend across borders.

BUT ESTABLISHING OPERATIONS IN FOREIGN COUNTRIES ALSO MEANS COPING with cross-border insurance issues.

NOT TO WORRY. The Zurich Group can now solve these issues through a new pan-European service concept.

THROUGH ZURICH INTERNATIONAL in the UK, Belgium, France, Germany, Italy and the Netherlands, a multilocal concept ensures on-site risk analysis wherever your operations are located. This internationally coordinated service enables you to control, reduce and insure your risks ... all in English and you won't even have to leave your office!

THIS CONCEPT, TOGETHER WITH A FULL RANGE OF PRODUCTS AND SERVICES, underlines our objective to be a professional market leader.

THE ZURICH EUROPOLICY PROVIDES coordinated coverage for all your risks in Europe. It complies with EC and domestic regulations and specifically addresses EC market needs.

SHOULD YOUR REQUIREMENTS EXTEND BEYOND EC BORDERS, you can still stay with us. The Zurich is one of the world's leading insurers. We serve all major industries in some 80 countries. Zurinet, our computerised worldwide data network, gives us instant access to crucial information.

EVEN IF YOUR INTERESTS are still primarily national, we are the ideal partner. The Zurich Group is backed by capital investments worth nearly £21 billion – just one of the reasons why all major financial analysts regularly give us an AAA rating. Another is the commitment to personal service given by all our 33,000 employees.

OVERSEAS RESEARCH

Universities 'may drive' contracts out of UK

By Norma Cohen, **Education Correspondent**

UNIVERSITIES efforts to force industry to pay for the full cost of research overheads could drive private research contracts overseas, the Association of the British Pharmaceutical Industry warned

yesterday. Dr John Griffin, director of the Association, compared some UK universities to "Robin Hood", who sought to steal from wealthy private cor-porations in order to bail out their unprofitable academic departments that cannot gener-ate research funds on their own. "If companies find them-selves mistaken too often as being robed by Robin Hood administrators, they are very likely to look abroad to where fairer principles may be applied." Dr Griffin said.

Dr Griffin's remarks come amid rising tension between universities and private industry over how much should be charged for research and how profits from intellectual prop-erties should be shared. While government funding for universities was plentiful, institu-tions admit that they virtually gave away their research services, charging only for ancil-lary costs such as additional staff. But current government regulations now require universities to charge for ancillary staff, building maintenance, telephones and sundries. Dr Griffin complained that

now, some companies are being asked to pay as much as 140 per cent of direct overhead

However, Dr David Thomas, chairman designate of the University Directors of Indsutrial Liaison and Pro Rector in charge of research contracts at Imperial College, dismissed Dr Criffin's charges as possesses. Griffin's charges as nonsense. "Treasury rules when we work with industry are quite clear — we are not part of the welfare state. We have to charge industry what it costs." He said that his institution regularly asks industry to pay for 120 per cent of overhead costs "and we're still losing money."

"If they want to go abroad, let them," he said, adding that in some countries, such as the US, university research costs are likely to be even higher.

Dr Thomas said that university-based research is still cheaper than industry-based research, with industry over-heads generally at 250 to 400 per cent of costs. British companies are more reluctant than panies are more reductant than foreign ones to agree to pay the full costs of research, partly because they had been receiving services for so long for virtually no charge at all.

COMPANIES should be compelled by law to provide all 16-18 year old employees with training leading to a recognised qualification, a cross party House of Lords Commit

tee said yesterday. It also called for increased spending on training, despite Government opposition to European Community measures which add to employment costs.

In a report on vocational training the Lords Select Committee on the European Com-munities said a long history of failure marked the voluntary approach to training in the UK.
Fresh legislation should start
by increasing training opportu-

nities for young people The committee welcomed the training credits system being piloted by Training and Enter-prise Councils and said it could be extended to provide the uni-versality needed. However, it still allowed employers and employees to agree not to provide the expected training. Fresh legislation should there-fore be introduced to oblige employers to provide appropri-

ate training. Such a measure would guarantee training or education to all 16-18 year olds and give them a grounding along the lines operating in West Germany and France.

The committee also called for a substantial increase in the quality and quantity of training in the UK to bridge the skills gap between Britain and its competitor countries. The experience of Britain's

main industrial competitors demonstrated that effectively managed vocational training should be viewed as an investment rather than a cost. Unless the commitment to

training was increased there was a severe risk of a steady and accelerating relative decline in the British economy, the report said. The committee called for this to be based on a called for this to be based on a national strategic framework for training, agreed by both sides of industry. This would analyse future

training requirements, set tar-gets for improving training performance, establish a single system of vocational qualifications, propose new means of monitoring training quality and improve access to training, especially for women re-enter-ing the labour market. John MacGregor, the Educa-

tion Secretary, called on poly-technics to expand their emol-ment still further, rejecting claims that government spend-ing cuts have harmed the qual-try of education ity of education. He said that polytechnics

could be even more efficient than they already were with-out harming quality if they use existing resources creatively.

Old Bailey trial hears charges of corporate manslaughter

Zeebrugge disaster jury told of 'gross negligence'

P&0 European Ferries and seven of its former employees seven of its former employees were guilty of "gross negli-gence" which caused the Zee-brugge disaster, in which 192 people died, the Old Bailey was told vesterday told yesterday.

The company, three officials and four crew members all deny a speciman manslaughter charge arising from the tragedy on March 6, 1987, when the ferry Herald of Free Enterprise capsized less than a mile from Zeebrugge harbour on its way to Dover with 454 pessengers. to Dover with 454 passengers

and 80 crew on board.

Charges contained in a 12-page indictment centre on the "obvious and serious risk" posed by sailing with the bow doors open and the alleged rea-

n pia

jerme

sons why they were not closed.
Opening the prosecution
case, Mr David Jeffreys, QC,
told the jury of 10 men and two women: "It hardly needs to be said that once she sailed with those doors open, the almost inevitable consequence was at least personal injury and, of course in reality, death. The Crown's case is that the cap-size was avoidable. We contend that this is a case of manslaughter - the unintentional killing of another person by gross negligence.
"The Crown's case is that

each of the defendants who you are trying is responsible in law for the deaths that occurred."

Townsend Car Ferries which, in January 1987 was taken over by P&O. After the disaster, Townsend's name was changed to P&O European Ferries.

Mr Jeffreys said that in law, a company may be guilty of a criminal offence but only through the conduct of people acting on its behalf. These people, who must hold responsible positions, were described in law as "the directing mind and will of the company".

They could not be mere

employees but had to have a degree of independence and autonomy to act on their own without having to seek supe-rior instructions or approval. it was alleged that Mr Wal-

lace Ayers, the company's technical director, Mr Jeffrey Develin, the chief marine superintendent, Mr John Alcindor, his deputy, Mr John Viehu the sonior mester and Kirby, the senior master, and, in certain respects Mr David Lewry – in particular in his ability to issue orders and instructions on his ship – fell

into this category.

Mr Jeffreys told the jury:

"The guilt of the company can
only be established through its directing minds or one of its controlling officers. Hence, if you find that some one of those mentioned must have commit-ted an offence of manslaughter in the capacity of a person aw for the deaths that directing or managing the com-coursed." directing or managing the com-pany, then the company like-wise should be found guilty of

rate manalaughter. Mr Jeffreys said Mr Ayers had failed to order the installa-tion on vessels in the fleet of bridge indicator lights showing whether the bow doors were open or closed, "and in particular failed to respond to two requests for indicator lights on the bridges of ships."

marine superintendent, he said: "The orders in force which were supposed to be fol-lowed on board ship were unclear and inadequate. Com-munications between ship and shore were inadequate."

done nothing to implement the suggestions that warning lights be installed on the bridge to show whether the bow doors were open or closed. Mr Jeffreys said Mr Kirby, although not on board, was responsible "for orders, instructions and the safe operation of the ship which went to sea with her bow doors open". Of the other people men-tioned in the indictment, he said Mr Mark Stanley, the

manslaughter." P&O European Ferries is only the second company to face a charge of corpo-

in the UK - grew by 2 per cent, against a growth rate of He said Mr Alcindor had 4.5 per cent in 1988.

• Surplus on invisible trade between April and June all but vanished, according to government figures. They indicate that the UK's current-account deficit is significantly worse than previously thought.

Plans for public sector land assistant bosun, had not car-ried out his job of closing the Mr Michael Spicer, planning Herald's bow doors "because he was asleep in his cabin." and it had been the duty of Mr minister, set out proposals to encourage development of disused public sector land. The plans would force public groups in England and Wales to improve their registration of Leslie Sable, the chief officer, to supervise the closing of the bow doors. The case continues.

vacant land in an effort to make it more readily identifi-able to potential developers.

"Our proposals are based on our view that extra pressure needs to be put on holders of public sector vacant land which will release more land for building and house build-ing in particular," said Mr Spi-

The proposals would bolster legislation passed in 1980 which set up a register of unused and underused land belonging to public sector bodies, such as local authorities or nationalised industries. Since then 80,000 acres of land has been sold, leaving \$3,000 acres of land remaining on the regis-

Investment to be spread

Water companies are likely to be allowed to spread the cost of big capital projects in stages under proposals dis-closed by Ofwat, the industry's

economic regulator.

The aim of the plan, announced by Mr Ian Byatt, Director General of Water Services, is to reduce uncertainty and facilitate the orderly planning and management of capi-tal investment, which will amount to more than £26bn over the next decade.

Accountants' green audit

Cooper & Lybrand Deloitte, the UK accounting group, launched a programme to include an environmental audit and a review of how well potential risks are managed as part of its annual report on company accounts.

A Gallup survey commissloned by Coopers Deloitte this month showed that 56 per cent of UK companies do not have formal environment policies and only slightly more than half have given detailed board consideration to environmental issues.

Prudential profits ahead

Prudential Corporation, the UK's biggest life insurer, recorded profits of £126.7m, for the half year ending 30 June, somewhat above analysts expectations. Losses in Prudential's general insurance business, which accounts for business, which accounts for less than 20% of the group's total premium income, were largely responsible. Although the poor perfor-

mance of general insurance operations is the most eyecatching feature of the interim results, a possible slowing down in the rise of life insurance profits after over a decade of steady, seemingly relentless growth is more significant

was built in Italy to a revolutionary design by Renzo Piano, who helped create the Pompidou Centre in Paris.

RAF pilot killed as jet crashes off Scottish coast

An RAF pilot was feared dead after his Jaguar jet crashed into the sea off south-west Scotland. The aircraft was from RAF Coltishall in Norfolk and happened just before 11am. An RAF spokesman said the circumstances of the crash were not known, but the aircraft was not armed. The Solway Firth area between Scotland and Cumbria is used extensively for low-flying exercises. Four RAF jets have been lost in accidents in the last mouth. A MoD spokesman confirmed later that the body of the pilot, who was based at RAF Coltishall, had been recovered.

Investors concerned over lack of power sell-off information

By David Thomas, Resources Editor

MANY institutional investors are increasingly concerned about the lack of independent information about the electricity companies which are to be sold in the biggest and most complex privatisation yet.

Their concern about the tight control on information emerged yesterday as the Gov-ernment launched the marketing campaign for the 12 regional electricity companies, which are due to be sold in late

Government advisers said that the Gulf crisis would not that the Gulf crisis would not interrupt the privatisation plans. Electricity privatisation has proved to be particularly fraught, but has been rescued this year by Mr John Wakeham, Energy Secretary.

However, Government advisers also accept that the Gulf crisis could knock 10 per cent off previous estimates of the

crisis comma knots to be test off previous estimates of the flotation price, reducing the equity proceeds from the 12 companies to about £4.5bn. Mr Frank Dobson, Labour's energy spokesman, accused the Gov-ernment of preparing to sell the industry for a third of its true value.

Concern among institutional concern among institutional investors about controls on information is likely to be exacerbated by the disclosure of confidential guidelines on how to communicate with City of London analysts and the media. The guidelines were sent to the electricity companies by Dewe Rogerson, the City public relations firm in charge of marketing the sale.

charge of marketing the sale.

The guidelines advise electricity companies to "head off questions that are too detailed (or difficult!)"; to be "positive in your attitide towards the new contractual and regulatory regime, and the regulator. Do not focus on areas of particular concern"; and not to "get ular concern"; and not to "get caught up with commenting on the wider political implications and policy issues of privatisa-

A majority of leading investment institutions contacted yesterday by the FT com-plained of insufficient, unsu-

pervised contact with the electricity companies. "They have tended to be gagged. They have told us that they can only meet us with the Government broker," one institution said.

The institutions are also concerned about the scarcity of independent analysts covering the industry.

Some institutions questioned the suggestion that the controls are required by the Finanan excuse. They hope that all the companies will be equally attractive and equally sub-scribed and that we will find out their differences only after privatisation," one fund manager said.

Dewe Rogerson said last night that its guidelines either reflected the Financial Services Act or were common sense. Mr David Clementi, director of Kleinwort Benson, financial advisers to the Government,

said that "a healthy debate has already started on the merits of the companies as invest-ment opportunities."

He was speaking on the announcement of the first broad details about the sale of the 12 regional electricity com-The 12 companies will be floated with a common price in

November. Publication of the pathfinder prospectus is likely to be on November 2, impact day on November 21, closure of the offer on December 5 and first dealing on December 11. Individual shareholders will be offered incentives if they register with the electricity share information office and buy shares in their local company. Incentives are likely to take the form of discounts on electricity bills worth about 8 per cent of the minimum

Overseas investors are likely to be offered up to a quarter of the shares in the companies, although the exact amount will probably be set in late October after initial indications of UK interest.

Fast food outlets found to be prone to accidents

By Diane Summers, Labour Staff

YOUNG workers in fast food outlets are particularly vulnerable to accidents, a study of the catering industry con-

the catering industry conducted by the Health and Safety Commission has found. The high staff turnover of young people in hamburger bars, fish and chip shops and the first fixed outlets means similar fast food outlets means special attention needs to be pald to the training and super-vision of young people from the moment they start work,

the HSC warns. Almost 20 per cent of 855 reported kitchen accidents happened in the rapidly expanding fast food establishments. The catering industry overall employs about 776,000

people.
The analysis, which shows young workers are over 50 per cent more likely to have accident when alder coldents than their older col-leagues, forms part of a wider study of accidents in service

industries published yester-

Overall, there was a total of 21,800 accidents and 34 fatalities reported in the service sector - an 8 per cent increase over the previous year. According to the HSC all the fatalities were preventable and were mainly caused by failures in safe systems of work.

Retail was the most hazardous environment, followed by wholesale, consumer/personal service, hotel and catering, and, finally, office. However, looking at trends, the greatest increase in serious accidents over the last three years has been in catering, with major accidents up by over 50 per

repare yourself for a new figure in the stock of characters regularly used by cartoonists, leader writers, politicians and sundry other commentators. Frank is about to join Sid in the common parlance of late twentieth century capitalism.

That, at least, is the hope of the small army of people paid to sell the electricity industry, the biggest and most complex of the Government's privatisations to date. Frank made his debut on television screens yesterday. He is set to become a prominent feature of prime-time viewing as the late November target date for selling the 12 regional electricity companies in England and Wales approaches.
Friends of the Earth, a vociferous

opponent of electricity privatisation, had fun yesterday dragging up quotes from Mary Shelley, creator of the

Frankenstein story.
Unsurprisingly, the Frank who will sell electricity is only distantly related to Shelley's creation. More Munster than Hammer horror, Frank, the archetypal electricity user, is intended by his creators to be big, bolted and lovable.

Frank will spearhead a marketing campaign that will have two dimensions. It will be partly local. The television adverts will tell viewers the names and details of their local electricists. tricity company; where ITV regions straddle electricity company borders, up to three local companies will be atured in each ad.

Next week, electricity company chairmen will write to all their customers giving details of how to regis-ter with the share information office. the form of discounts on electricity bills - will encourage individuals to buy shares in their local companies. The flotation prospectus will high-light an individual's local company, although everyone will also be sent brief details on the other 11 concerns heading for the stock market. This approach will build on the high wareness levels which people have of

their local electricity company. At the same time, the marketing exercise will be heavily centralised. A common set of adverts, featuring

A monster campaign to sell electricity

David Thomas reports on Frank's efforts to outdo Sid

Frank, will be used throughout the country. It is thought that any other approach - involving, for example, separate campaigns for each company — would result in utter confusion. If all this sounds familiar, then it should. It has been masterminded by Dewe Rogerson, the marketing and communications group which has made its name out of privatisation. British Telecom, the water companies, British Gas, BP, British Steel, Britoil and TSB are among the Government sales to have passed through its hands. Dewe Rogerson feels sufficiently confident of its track record to take total control of the marketing of electricity, even to the point of stipulating that none of the advertising agencies involved in the campaign must speak to outsiders.

Last year's flotation of the 10 water companies is the model for electricity privatisation. Not only was it the first simultaneous privatisation of a group of regionally based concerns, it was also a complex sale which had to overcome a high degree of initial scep-ticism among the general public. Water was in a sense the pathfinder for electricity," says Tony Carlisle, Dewe Rogerson's chief executive. Carlisle says that the water model needs only to be fine-tuned. Indeed, he argues that electricity starts with some advantages over water, the public already regards electricity as an industry and a business, rather than a public service, and as a relatively modern and efficient business to boot.

If Dewe Rogerson is wrong on this score, then it is too late to do much

about it. A drive to improve electricity's corporate image has been part of the run-up to privatisation. But that phase is broadly over, Frank will take the marketing of electricity onto a different plane. Frank has to convey three main

messages. The 12 regional electricity companies are to be sold on a date to be announced. Everyone can buy shares in them. And these are the actions which people must take to acquire the shares. The information may appear simple, but Frank has to ensure that it is understood by almost the entire adult population in England and Wales.

Response rates were high in previous privatisations; approximately 4.5m people applied for British Gas shares, 2.7m for water and 2.3m for British Telecom. Dewe Rogerson will not disclose its hopes about where electricity will fall in this spectrum. But it plans to foster awareness among more than 90 per cent of the population - an extraordinarily high target for most advertising cam-paigns. "We will be judged by Whether Acacia Avenue, as well as Park Lane, knows to ring the share information office or respond to the (regional electricity company's) letter," Carlisle says.
The Frank campaign, devised by

the WCRS advertising agency, is designed to communicate these messages in two ways. First, it aims to establish widespread popular identifi-cation with Frank and his companions — Frank's vampy wife, his dog with bolt-on head and his trusty ser-vant, Igor. It then intends to use these characters to convey the information people will need to buy the shares. There is a fine line between using Frank to convey the message and Frank becoming the message. In retrospect, there is some dissatisfaction on this score with Sid, the character who spearheaded the British Gas sale. Polls towards the end of the Sid cam-Polls towards the end of the Sid cam-paign suggest that more people knew about Sid than had grasped the infor-mation he was supposed to impart. Partly to avoid this problem, WCRS

has devised a large number of short, sharp ads, each designed to dissemi-nate a single piece of information. Conscious of the attacks which will be launched on the effort by privatisation opponents, Tony Carlisle says that this approach also has the virtue of economy. He estimates the total spend on advertising space for the 12 regional companies to be £17-£18m

compared with £19.5m for water. Dewe Rogerson acknowledges, however, that Frank can convey only one part of the message - the details of the sale. The other aspect is whether the issue is worth buying, here the common perception that the Government will have to under-price the stock issue will come into play. Whether first day premiums for electricity will average 45 per cent, as they did with water, is another matter, for that, watch the markets -and Saddam Hussein.

'The youth market is not dying' David Churchill reports on the various opportunities within the sector

ashionable marketing wisdom at the start of the 1990s seems increasingly directed towards the more mature consumer with higher disposable income and away from the influence of the young who, because of demo-graphic changes, will be markedly fewer in number during the decade ahead.

Yet some marketing experts believe that in the general enthusiasm to target "grey" consumers, companies may forget that the 16 to 24 age group will still account for some 14 per cent - or 6.4m - of the adult population by the turn of the century.

"The youth market is not dying as current wisdom would have it," asserts the Henley Centre for Forecasting, the market research group, in its latest look at the future of leisure markets. "In fact we think it will be in good health in the

While admitting that there will be some 3 per cent fewer 16 to 24 year olds by the end of the decade than at its begin-ning, Henley points out that the young consumers of the 1990s will be far more attractive as far as marketers are concerned than their counter-

parts of the past decade.
"As opposed to the late 1970s and 1980s when the unemployment rate was highest among 16 to 24 year olds, in the 1990s it is likely that unemployment levels will be low for this age group; employers will have to offer higher wages in order to keep their staff," it says.

The youth market, moreover, is less vulnerable to fluctuating interest rates. Its members are less likely to have mortgages than the 25 to 54 age group hard-hit by current high mortgage rates; they also have less savings in comparison with the 55-plus age group and therefore disposable income is relatively unaffected by decreases in interest rates.

Thus most of the members of the 16 to 24 age group will have money, security of employment or future employment if in further education and the freedom to spend their money as they wish," con-cludes Henley. The market researchers

it. Based on a survey of how consumers spend their time, Henley not surprisingly found that the 16 to 24 year olds were not one homogeneous group but broadly split into two categories at the age of 20.

"These are classically years of great change," it points out. Years of movement from dependence to independence.

often overlooked is how much leisure time these consumers

have - and what they do with

irresponsibility to responsibility and economic inactivity to activity. main conclusion The

reached by Henley's analysis was that the over-20s had less time for laisure than the 16 to 20s. This was apparently because the older group spent more time on household chores, since many will have left home by this time. The 16 to 19 year olds, as a result, had an average 14.4 hours more leisure time a week. But the over-20s, Henley

points out, have more dispos able income arising from being in work and earning more than their younger counterparts.

The result in marketing terms is that the 20 to 24 year olds spend less time on the cheaper, time-intensive activi-ties such as watching television and listening to records than do the under 20s. But the over-20s spend more time on such areas as car maintenance and home improvements, reflecting their greater afflu-ence in actually owning a car

Henley's research also found that while going to a pub was generally more popular with the over-20s, the 16 to 20 group actually visited pubs more fre-quently than their older counterparts, despite the fact that it is illegal for the 16 - 18 year olds to consume alcohol.

The younger end of this market also were more likely to go to the cinema or a disco than the over-20s. But as this group grew older, the greater was the propensity to participate in more sociable and expensive leisure pursuits, such as eating

Computers go tube spotting

By Della Bradshaw

SQUASHING into one of London Underground's tube trains during the rush hour may make commuters feel that the proverbial sardine had an easy life. But as the crowds of people using the underground system continue to grow, so too do worries about safety a worry compounded by the

To help prevent the recur-ence of such a tragedy, London Underground is turning to computer-based monitoring systems, which could be installed in all of its stations over the next few years.

A trial system is now in operation in Green Park, which was selected for the

King's Cross fire in 1987.

trial because it is one of the Underground's 10 most complex stations, says Doug Wilson, Engineering Information Manager for London Under-

The station has three inter-changes and more under-ground tunnels than any other. About 40,000 people use Green Park every day, and there are two to three daily incidents — a passenger being taken ill, say, or robbed. The system in Green Park centres around twin computer

screens, installed by Intergraph, the digital mapping specialists. On the screens can be displayed historical data and live video pictures. On the right-hand screen is a schematic map of the sta-tion, showing the underground

walkways, escalators and plat-forms. Specific areas can be highlighted, and zoomed in on, using a mouse. The diagram can show such things as which escalators are moving - and in which direction - and whether the electronic gates are letting people into the station or out. Information is sent to the screen by sensors built into the equipment.

A column on the screen is linked electronically to the dot matrix indicator boards on the station platforms. As the passengers on the platform are updated on the arrival time of the next train, so is the controller in the office.

The left-hand screen displays ordnance survey maps with the location of the station overprinted in relation to the

main utilities, so that in an emergency the Underground staff, fire brigade and police could easily launch an evacua-In addition, the screen car switch to moving video pictures of any of the station platforms. If a passenger presses the emergency button on the platform the video cameras on

automatically.

A terminal which can display the same information is also installed in the office of the line controller in charge of the station and in London Underground's central control centre. London's fire brigade is also being linked via a data line, so that in the case of a fire they can call up the live video pictures plus the digi-tised maps without leaving their headquarters.

the station record the scene

With the full-scale system the police will also have a terminal installed, but the £600,000 budget for the trial system meant this was not feasible, says Wilton. The first operational system will proba-bly be in Bank station in 1991.

The package also gives the station staff more information about what is happening in the station, says Munir Sadi-ket duty station measure. kot, duty station manager. The combination of the video film and the information on the arrival boards enables them to indge how many people should be allowed into the station while maintaining safety lev-els. If a platform is crowded and the next train is not and the heat train is not expected for several minutes, the staff might limit the num-ber of barriers allowing travel-lers into the station. Re-direct-

people away from the platform helps to avoid the crush when a full train arrives.

The system's potential will take time to exploit fully, says Wilton. One future application involves transmitting information from the property of the tion from the newer tube trains which use air bag suspension systems. This suspension can gauge how many peo-ple are on the train, and the information sent to stations along the line. The station controller would then be able to tell when the next train is due

and how crowded it is.

ing the escalators to carry

review of the future of controlled thermonuclear fusion – the harnessing of H-bomb reactions — prepared for the EC Commission will cause con-siderable disquiet within the

British Government.
This independent critique, by senior scientists not involved with the research, has proved remarkably supportive of a particularly expensive research activity, at a time when the Government hoped it might cut back on very long-term investment. The scientists want the EC to keep fusion at high priority in its

research strategy.

The European Communities are spending about Ecu 450m (£300m) a year on the science of fusion. The goal is to demonstrate that nuclear reactions in which light atoms such as helium and hydrogen are fused can be controlled, so that they release energy steadily instead of explosively, in order to gen-erate electricity.

The science is known as

plasma physics – understanding the behaviour of gases so hot they have cracked into nebulous cocktails of electrified atomic fragments called plasmas. Such conditions are responsible for the heat and light of the sun. On earth, whenever such a plasma touches its surroundings, it dumps all its energy and disap-pears, leaving only the kind of scars left by lightning.

For nearly half a century plasma physics has held prom-ise of a new source of energy, of almost inexhaustible supply because the fuels needed are so abundant. The problem was and still is - how to keep a fusion reaction running safely, so that it yields a steady flow

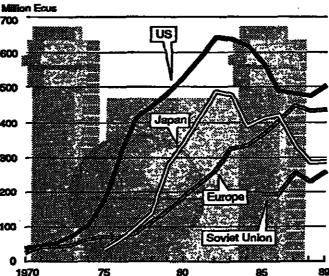

Apparatus intended to create and sustain the right condi-tions grew bigger and more complex as the scientists wrestled with these plasmas. The Joint European Torus (JET), focus of the European Fusion Programme, at Culham near Oxford, is a machine weighing tonnes, which generates plasma in a doughnut-shaped torus six metres across. The overriding aim of the scientists is to stop plasma ever touching this vessel's wall.

The European fusion programme is one of four world-wide, the others being in the US, the Soviet Union and Japan. The financial commitment last year totalled about £1bn, and occupied 6,400 scientists and engineers. Europe started up JET in 1983, with the intention of com-

David Fishlock on why scientists believe the EC must continue research in thermonuclear fusion

Looking for a safe reaction

Worldwide spending on fusion R&D

pleting its research programme by 1990. It has been reprieved until 1992, and is seeking a further extension to 1996, after which it would be abandoned. Whether to grant this, and what to do next, were among the questions addressed in the report by Umberto Colombo, chairman of ENEA, the Italian energy research commission,

They endorse the programme's objective – "nuclear fusion has a great potential for the future of mankind" - but reckon that as an energy source it is 50 years away. They advocate moving towards this goal in three giant strides 15-year steps, each focused on another big apparatus like JET. These are Next Step (an experimental fusion reactor), Demo (a demonstration reac-

and his team of scientists.

tor), and the prototype commercial fusion reactor. The cost of the first two steps alone, with the first fusion electricity from Demo around 2025, is put at Ecu 30bn, rising to Ecu 50bn by 2050.

They conclude that, through JET, Europe is closer to the goal than any of the other countries' programmes; and that a great part of the success is attributable to the EC's R&D organisation of 12 national associations uniting under Buratom. As for JET itself, they believe the project can yield more data for designing Next Step, so they want its life extended to 1996.

This last point could be crucial in coming political discussions. Tritium injection will make JET radioactive for the Government has argued lately that because fusion power is so far away the scientists should ahandon plans to use tritium. The Next Step machine, says

Colombo's team, must be designed to reach ignition and sustain long burn times. It must solve all outstanding problems of plasma physics and plasma technology – and these are severe enough to make the experts themselves say only that they are "90 per cent certain" of solving them.
Colombo's team looked at Surope's two options for Next Step: either the Next European Torus (Net) or the International Thermonuclear Experimental Reactor (Inter), a concept produced by all four fusion programmes. Both plans envisage a torus twice the diameter of JET's, containing seven times as much plasma. They prefer Inter because it will spread the considerable

costs more widely, and also for what it could achieve in terms of wider international collaboration. But they stress that Europe must be fully commit-ted not just to Inter but to all three steps leading to a commercial reactor. Environmental and safety

aspects of a commercial fusion reactor should take high priority in the future programme. The team also insists that European industry be brought into a programme which so far has been managed exclusively by fusion physicists. All the chnologies crucial to fusion must be made available in Europe so it is essential for companies to get experience in making and testing the novel parts. They also advocate a more industry-oriented project management. They see no need yet for Europe to be spending more

than at present, and recom-mend that the current level of 450m Ecu annually be maintained for the next five years. But they call for a further eval-uation no later than 1995 to weigh progress and justify any case for a big increase to pay for Next Step. The European Net project is envisaged as needing 700m Ecu annually from the end of the century. Fusion physicists are now holding their breath while the review is scrutinised by Europe's Council of Ministers. Its advice for the politicians is clear and unequivocal about last year's claims of "cold fusion". It finds no evidence that cold fusion will lead to a new source of energy and states that it should not be instead, they are individually funded from Europe's fusion scrutinised by the US State Department's Office of Muni-

Data encryption a new munition

By Alan Cane and Louise Kehoe

ROWS are developing on both sides of the Atlantic over technologies used to encode information in computer and data communications systems to render it safe from eavesdroppers and wrongdoers.

The disputes concern: The freedom with which the coding - or encryption -techniques can be exported from one country to another. • The effect which the adop-tion of common encryption standards by one group of countries will have on imports of computers manufactured

International Business Machines last week launched a new design of mainframe computer, the System/390. Among the chief selling points of the new range was built-in encryp-tion. IBM now admits that UK and US Government restrictions on the export of sensitive technologies including encryp-tion methods means that the encryption option will only be available in the UK to special classes of user - financial institutions, some subsidiaries of US companies and government departments.

ment departments.

The IBM technology involved uses special software – the Data Encryption Standard or DES algorithm which can be embedded in a silicon chip to provide built-in data encryption. IBM's problem in exporting the technique with its new range is the latest example of the difficulty European companies have had in obtaining licences to ship and use DES chips from the US. US security experts complain that the interests of computer manufacturers are being sacrificed to those of the intelligence community. "Cryptographic systems are included on the munitions list." explains James Bidzos, president of RSA Data Security, which has developed a widely used encryption method. "We are treated like arms dealers." US export licence applications for data encryption systems do not go through the usual US Government channels (Commerce or in sensitive cases Defence Department).

tions Control and the National tions Control and the National Security Agency, an intelli-gence agency, which has final veto power. The process can take months or even years, and there is no right of appeal.

The UK Government is also unwilling to see the DES algo-tibus aged width. Let the

rithm used widely. In at least one case, according to IBM offi-cials, the UK Government has blocked the sale of one of its new mainframes to a UK customer despite prior approval from the US authorities. Europe is, in any case, begin-

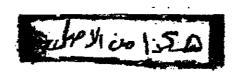

ning to develop its own stan-dards of computer security. The most widely accepted set of criteria for computer secu-rity is the US-developed Orange Book, which defines levels of security in terms of grades - A, B1, B2 and so on. European computer manufacturers, however, believe that the Orange Book is too closely identified with military interests and offers the business user an inflexible pattern. As a consequence, over the past two years France, Holland, West Germany and the UK have been developing their own set of security criteria, known as ITSEC (Information Technology Security Evaluation Criteria).

UK involvement has been chiefly through the Department of Trade and Industry and the government communi-cations centre at Cheltenham with the help of companies including ICL and the software security specialists Admiral The European Commission has now taken a leading role in now taken a leading role in driving the programme for-ward. On September 25 a draft of the ITSEC proposals will be put forward for inspection and

Already a number of US computer suppliers are warning that the provisions of the ITSEC proposals could make it harder for them to sell comput-

ers in Europe.

The fact remains that security of computer-based information is now as great a concern for commercial users as it is for those in the intelligence services and the armed forces. Inability to supply properly secure systems is likely to prove a powerful deterrent to

CINEMA

Dudley's commercial breakdown

hich brand of beer does a film hero drink? Which airline does he fly? It is common knowledge that manufacturers pay to have their products shown in films, but such placement is generally used in a fairly positive way. So a film about advertising which features real brand names and tures real brand names, and aspires to tell the truth about them, suggests some interest-ing diplomatic problems for the

In Crazy People, Emory (Dudley Moore) is an advertising copywriter who is sick of the fantasy language he is expected to write. If there are men who want a car that helps them impress women, why waste words pretending their choice has anything to do with its engine? If people go on exotic holidays to get laid, why bother to respect the control of the cont bother to promote the scenery?

His attempts to get through to what people really want to know when they read adver-tisements shock his employers, who commit him to a sanatorium. But when the advertisements are accidentally published and result in huge sales stocks of a laxative with a slogan suggesting that consti-pation could lead to cancer sell out completely - the agency want him back. Emory, mean-while, is completely happy in hospital and can only be persuaded to return to work when the inmates - whose simplicity is ideal for the new-style campaign - are all hired to write slogans too.

After the final credits there is a stern little notice pointing out that the characters in the film are not suffering from mental illness, which is a very serious condition. This hit of insurance against accusations of discrimination or poor taste is so much an afterthought that it is ironic that the paral-lel between the insanity of the world we live in, and the sanity and truth we can find in "crazy people" if we treat them with respect, are actually

The message would have worked just as well if the out-siders had been portrayed instead as factory workers, shop assistants, librarians or absolutely anyone not burdened with the preconceptions of the advertising world. It was not necessary to set the film in a sanatorium at all, especially one in which no one seems to have anything wrong except

CRAZY PEOPLE (15) Tony Bill

PAPER MASK (15) Christopher Moraham

THE WOMEN ON THE ROOF (15) Carl-Gustaf Nykvist

THE EMPEROR'S NAKED ARMY MARCHES ON Kazuo Hara

chronic cuteness and treatable emotional problems - nothing clinical or disturbing, Heaven

But there are benefits. The plot is too silly to be insensitive, and Dudley Moore plays his part straight for once. He and Darryl Hannah, as the multiphobic heroine, are like the only grown-ups in a kindergarten. The snag is that this is the sort of comedy that needs to be handled seriously by everyone. There is some enter-tainment to be found in the irreverent advertisements, but the idea (which never really challenges the morality of advertising) is hopelessly clut-tered with cartoon villains and tiresomely lovable patients. This could have been the

movie that companies paid to keep their names out of (and it would be interesting to know if those featured did pay for the privilege) but by showing Emory's prosaic approach to be successful, reinforced by the use of real names like Sony, Jaguar and Volvo, the film rather incestuously proves his theory correct.
The idea that when we

invest people with the qualities we think they have they then respond to our expectations also appears in *Paper Mask*. Though it is not based on one particular true story, writer John Collee was inspired by a number of news reports about people posing as doctors, and by his own observations during bis earlier career as a doctor. Matthew (Paul McGann) is

an ambitious young hospital porter, always hanging around the medical staff, picking up knowledge and jargon. When he gets the opportunity to sume the identity of a young doctor killed in an accident he seizes it, and starts a career of

Top: Paul McGann as the bogus doctor in Paper Mask. Below, Dudley Moore and Daryl Hannah in Crazy People. Right, Amauda Ooms in The Women On The Roof

nights on the casualty ward, tricking people into helping him and relying on the solidar-ity of NHS colleagues to keep him out of trouble when, inevitably, he kills a patient.

At first there is even some humour in the way Matthew muddles through, but the horror of what he is doing rapidly takes over. Paul McGann is excellent as the young misfit sucked into his own fantasy of himself, and Amanda Dopohoe as the nurse who unwittingly

bluffing his way through nights on the casualty ward, tricking people into helping him and relying on the solidar-

People in hospital are more vulnerable than usual: in an alien setting, defensive, more ready to succumb to authority. When a man wearing a white coat and a stethoscope says he is a doctor, they believe him. If Paper Mask were just a thriller it would be entertaining enough. What lifts it above that is the realisation that it

could really happen.

Cinema fiction suggests that there were so many women going around Europe in the first years of this century, asserting themselves artisti-cally and generally breaking the rules, that the ones who stayed quietly at home were actually in the minority. The Women on the Roof, set in Stockholm, is the story of Linnea and Anna, a reserved girl and a flamboyantly liberated lesbian photographer (Amanda

Ooms and Helene Bergstrom).
Their friendship and artistic partnership is dealt with in a slightly uncomfortable but leisurely way, drifting rather than unfolding, and has the beautiful look of a painting that has become unnaturally dark and needs cleaning. (Director Carl-Gustaf Nykvist is the son of cinematographer Sven Nykvist). An old lover's reappearance and accidental death stimulate events more than the start of World War One, and when Anna describes her childhood, appropriately accompanied by picture slides, her pain briefly electrifies the screen. But in spite of a belated flurry of activity the film does not have much to say for itself.

There are many men haunted by a wartime experience, but that of Kenzo Okuzaki in the days following the end of World War Two have a special horror. Convinced that men had been deliberately shot and cannibalised to keep officers alive, he first took his grievances right to the top, uncompromisingly holding Emperor Hirohito – as Supreme Commander of the Japanese Army - responsible for all atrocities. Released from prison after an unsuccessful attack on the emperor in 1969 he persuaded documentary film maker Kazuo Hara to help tell his story. The resulting subtitled film, shot on 16 mm, may be more television documentary than cinema, but it is a compelling work.

The old man visits a succes-

sion of war veterans, followed everywhere by a camera team that never intrudes on what is happening. What is fascinating about this series of dialogues is the way in which the formality we normally associate with the Japanese becomes more and more perfunctory. Okuzaki, perate to have the truth of his story confirmed and to establish some peace for him-self and the souls of the dead men, becomes increasingly confrontational, even physically attacking a couple of the men who resist persistent questions. His obsession leads to a death, and today he is back in prison for the murder of the son of a former commanding officer - a sort of retribution by proxy. But there is still something so sane and sure about this man that the story cannot help but attract a fascinated sympathy.

Blitz!

M. I. GROUP PLAYHOUSE

On the face of it, it seems a bit odd to set the National Youth Theatre loose on Lionel Bart's Blitz!, a show first and last seen in London nearly 30 years ago when memories were

On the other hand, there is a lot to be said for it. Blitz! could run to a cast of thousands, certainly hundreds — this production stops not far short of triple figures. There are parts for real children as well as the national youth playing adults. And there is also masses of zest and energy.

Not least, a professional production of Bhitz! is unlikely to be seen on the London stage to be seen on the London stage again. The reason for that is that it is not all that good. It is nothing like as good as Bart's Fings Ain't Wot They Used To Be, and it is not a patch on Oh, What a Lovely War, which admittedly is about a different war, but with which Bitt! must inevitably be compared.

ARTS GUIDE

Still, it has its moments and its nostalgia. If you shove a lot of people down a London Underground during an air raid and have them listen to the Nine O'Clock News, it is bound to. The News in question has a broadcast from Winston Churchill. It is followed by Vera Lynn singing
"The Day After Tomorrow,"
the best single song in the play
and probably the highlight of
this performance as gradually

girl singing beautifully as she continues to do her knitting. It is hard to beat the voices of Churchill and Lynn in tandem. The Underground station in question, incidentally, is Bank. It seems to have been then much as it is today. Only the advertisement for Oxo and the names in the ads for some of the old movies remind us that this is 1940, not Bank 1990. Perhaps it is being preserved in its gloomy state as a

everyone on stage joins in, one

monument to the war. The small children come into their own when they go off to be evacuated singing "We're going to the Country" and again in the song "Mums and Dads." The other memorable song is "Down the Lane" led by Elsie, played by Liz King who is one of the cast to watch. Yet the whole Petticoat

Lane bit does not stand up to Me and My Girl. Mrs Rlitztein, the only really sustained part in the show, is played by Jessica Stevenson. Perhaps some of the others would be just as good if they had the chance, but only she has and she takes it. She does the solo "So Tell Me" as if she is perfectly at home in a large

Blitz! is directed by Edward Wilson and runs until ptember 22.

Malcolm Rutherford

Racing Demon

David Hare's play about the clergy, Racing Demon, which opened at the Cottesioe Theatre on February 8, has now transferred to the more capacious Olivier Theatre. The cast of Richard Eyre's production remains the same save that the part of the black girl – one of Lionel Espy's parishio-ners who goes to him for help – is now played by Valerie Hunkins. Otherwise all is as it was and it is hardly nec to repeat how good they are.

The outstanding performance is that of Oliver Ford Davies as the sad honest-to-God vicar Lionel who some-how, through his weary, scru-pulous but unworldly faith, lets everything slip from his grasp. Accompanying his downfall are Barbara Leigh-

Oliver Ford Davies as the

leagues in the cierical team they have formed. This by no means exhausts the list of a sizeable cast whose brilliant work all round makes this such a memorable evening. It presents that rare combination in the theatre of challenging

ideas, witty lines and genuine

notion. The only question remaining is what effect, if any, the transfer to the larger main house auditorium has had on the play. Well, the play rises to its translation to a higher sphere with an innate confidence that must be the envy of its characters. The cruciform shape of the acting area has been retained with some mem-bers of the audience seated at what is usually the area behind the stage. This serves to turn the spectators into a congregation; perhaps this effect is not quite as convincing as it was in the Cottesloe. However, the soliloquies addressed to God by each member of the cast in turn, which converte the story. which punctuate the story, come across as movingly as ever. And on the night I was there, the capacity audience was deeply, happily involved.

Royal Concertgebouw

The mystery of the empty seats remains unsolved. The programme that the Royal Concertgebouw were offering for their Prom on Tuesday was as attractive as could be and it was clear from the previous night, if we did not know it already, that Riccardo Chailly and his musicians would be giving us playing as expert as anything in the whole Prome-nade season. But the hall was again far from full.

In the two seasons that Chailly has presided in Amsterdam he has made his mark, a surprisingly unostentatious one, on the orchestra's style. There is nothing flashy about the technical brilliance that conductor and orchestra display. One senses that they simply enjoy getting every note exactly right, as the per-fect balance of the solo horn quartet in Rossini's Semiram-ide Overture announced at the very start of this concert. Everything that Chailly

touches sparks precision from his fingertips. In Beethoven's First Symphony this gave us the classical style at its most sparkling. I have never heard those notorious opening chords despatched with such unanimwas just as fresh, tingling with

delight at its own rhythmic exactness. It all bodes well for what Chailly might do with Haydn, if not perhaps the later Beethoven symphonies.

To the major work on the programme, the Third Symphony of Prokofiev, he brought the same care for detail, though now spread over a larger canvas. Neeme Jārvi has shown us how this symphony can open in a cataclysmic wel-ter of noise that takes the breath away; but after what we had already heard from Chailly and the Concertgebouw it was only to be expected that they would sort out those compli cated textures into impeccable

At times it was difficult to believe that the symphony could contain so much light ness and delicacy. The wind section, to whom the conductor justly accorded a group bow at the end, deserve a special mention for their playing, easily heard at all times thanks to Chailly's airy orchestral balance. Extraordinary that the audience should stay away when Barshai's flaccid account of Prokofiev's Fifth drew a full house at the weekend,

Richard Fairman

Momix

I suppose that if you are prepared to accept the sight of a woman rushing about the stage carrying an umbrella draped in yards of white fabric and pretending to be a jelly-fish, then you might be ready for Momix. This small troupe of American gymnasts, who made a return to Sadler's Wells on Tuesday night, are purveyors of theatrical infantilism at its most winsome. They offer an especially tedious kind of of frolic, whose basis is the innocent belief that any game with a balloon or shadows or partially seen limbs on a darkened stage is valid entertainment. As incidents in some larger and more imaginative spectacle, Momix's little tricks might be acceptable; as the matter of an entire evening they are

em to me frivolous and ineffably arch, physical japes as a substitute for creativity. There is an accompaniment of amorphously bad music - and prospective visitors to the Wells are hereby warned that the amplification is too loud, and that before the performance and during the interval the same clattering factivities are already it is the fatuities are played; it is the Muzak of the traffic jam where blasting out abrasive nonsense.

The essential qualities of the

The performers - three men, three women - have well-trained muscles and a reliance upon some of the hoariest tricks of music-hall. Why three women bouncing like bronco-busters on white balloons should be thought to represent "Spawning," or why anyone in this day and age can believe that a dance with a light-weight dummy is of the remotest theatrical interest, escapes me. These are not untypical samples of the feeble sketches on offer, with a nadir of bad taste reached when two women disport themselves whether amorously or compatively I do not know inside a gigantic clam-shell while the tragic aria "Ah, Belinda" from Purcell's *Dido* is played. (This is the only live music - it is the only true music - in the evening). One item is worth watching,

Alan Boeding has made a giant construction of two metal hemispheres, joined at an angle of 180 degrees. This rolls and curves over the stage, and Boeding leaps and balances upon it, Vitruvian man eeling his way through its inner structure, balancing upon it, sculpture and dance become fascinatingly one. He merits a far better setting than his present stupefying surroundings.

Clement Crisp

Los Lobos

TOWN & COUNTRY CLUB For a band that has been

around for such a long time, Los Lobos have a slender output - a couple of widely admired early albums, a smash hit with the soundtrack of La Bamba, and then two years ago a fascinating traditional Mexi-can compilation, La Pistola y el Corazon that predictably made few waves at all. As the only Hispanic/Ameri-

can combination to have estab-lished any sort of international reputation they have proved surprisingly happy to discard their roots, and the new album, the peg for their appearance at the Town & Country on Tuesday (they play again at the Mean Fiddler tonight), is much closer to mainstream West Coast rock: no songs in Span-ish, and a hig, dense sound to supplant the easy, light-fin-gered touch and exuberant syncopations of former times. If one hoped they might recover their roots in concert, the evening was a disappointment. What was best about Los Lobos on the earlier albums was the elegant marrying of rock and tradition elements in which the virtues of both were preserved. But here they came over as muscle-bound, crudely

sound which made one regret many of the nice things written lately about sound systems at the Town & Country. They left behind an aggressive, curi-ously unstirring effect — and a good few pairs of ringing ears no doubt — together with the overwhelming sense that nothing had been heard to best

advantage. Even the old songs failed to stand up; it might have been a mistake to place "How will the Wolf survive?" and "Evange-line" so early in the set, before they had gained any sort of poise, and the brand-new num-bers then slid by anonymously. The best moments were the Tex-Mex fillers; one hopes that they weren't guilty tokenism Singing in Spanish the band seemed to relax more, regain their love of lopsided rhythms and not strive so hard to bludgeon the fans. In any case it's hard to beef up accordion or violin (the only "traditional" instruments to be heard) so much that voices get submerged, and through the thinner textures one could at least remember what was so attractive about Los Lobos in the

Japan on a tightrope

THE inflation-fighting credentials of the Bank of Japan have been clearly estab-lished in recent months, with striking effect on Japan's overblown financial markets. Higher short-term rates of interest and the recent appreciation of the yen will, in time, reduce inflationary pressures. Sadly, this tightening has come too late to avoid a prolonged period of monetary austerity.
The current plight of the
Bank of Japan is the clearest example, so far, of the dangers inherent in sacrificing domes-tic policy objectives for the sake of ad hoc international co-operation. Following the Louvre accord of February 1987, Japanese monetary policy was too loose for too long. Extremely low short-term interest rates led to a lending spree by Japanese banks, a surge in equity and land prices and a substantial real depreciation of the yen. Price/earnings ratios rose to levels without parallel in the history of the Tokyo stock market. When interest rates rose once more, as they had to, the economic case for such low yields on stocks disappeared and the bubble burst.

The past decade suggests that capitalist economies can survive rapid reductions in real stock market wealth with little impact on the real econ-omy. But the dangerous practice of counting unrealised capital gains on equity holdings in bank capital makes such a benign outcome less likely in the case of Japan.

Financial vulnerability

As share prices have fallen, the capital/asset ratios of the banks have deteriorated to lev-els well below those recently agreed by the international banking community, which become mandatory in 1993. In the short term the banks have been able to prop up their bal-ance sheets through the issu-ance of subordinated debt. In time they will be forced to reduce their asset portfolios substantially, thus reducing the availability of credit not only at home, but worldwide. As property companies begin to feel the effects of high interest rates, the weakening of the land market will impose fur-ther pressures on those finan-cial institutions heavily com-

mited to lending in this area Recent scares about the vul-nerability of the financial sec-tor to a fall in land prices are exaggerated. Some small banks may be at risk. But the perhaps unwise welcome given by the Bank of Japan to the pros-pect of a 20 per cent fall in land prices is presumably backed by an equally firm, if less explicit, commitment to the stability of the financial system.

Monetary stringency

There is a reasonable chance that the adjustment of the Japanese financial sector to a period of monetary stringency will occur without a serious financial crisis, even though the Bank of Japan will need skill (and luck) to manage this. Inflation is neither high nor expected to accelerate. The ability of the real economy to sustain rapid growth of output, productivity and investment, despite the gyrations of capital markets and the exchange rate over the past five years,

the more important, which it is remains impressive The impact of higher oil also for domestic reasons. The rise in sterling following the prices is a further source of potential instability. A pro-longed period of high oil prices spate of membership rumours has been the biggest single force bearing down on inflacannot fail to have some effect tion; but outside the pound on the growth potential of an economy so dependent on remains vulnerable. Two main reasons are given imported oil. But the degree of dependence has declined greatly since the 1970s. Furfor the postponement of EMS entry, supposedly for a very few weeks. One is the desire to thermore, Japan's strategic oil minimise the likely turbulence reserves give the authorities the means to minimise the in the foreign exchange market following events in the Gulf. Unfortunately, Middle East

effect of any major shock upon the economy. They should be used for that purpose. Japan can weather the storm. But it does so in a some-what parlous financial state. In considerable part this reflects undue subordination of monetary policy to exchange rate considerations within international economic co-ordination over the past few years. Japan and the US share the blame for the painful and risky period of

stment ahead, Those risks must be contained. The Bank of Japan should now stand back and allow the lagged effects of high interest rates to take effect. Overly aggressive policy or rhetoric at this stage of the credit cycle could force an unnecessarily hard landing, with serious repercussions for both Jápanese and global eco-nomic stability.

The cooling of Europhoria

WESTERN Europe's industrial recovery is losing some of its gloss. After several years of exceptionally robust economic growth, rising profits and investment and giddy euphoria about 1992, business faces a more testing period ahead, in which buoyant expansion and boundless horizons of opportunity can no longer be taken for The direct economic effects

of the Gulf crisis are only partly responsible. Though higher oil prices will take their toll of growth and inflation, at current levels they do not threaten a Europe-wide recession. The increases so far are smaller than in the two oil shocks of the 1970s, and European economies are better equipped to absorb them though things could change sharply if a shooting war broke

However, the Guif crisis has also had a more subtle psychoasso has a more subtle psychological impact, which has accentuated the recent sharp falls on European stock markets. Investors have been prompted to scrutinise Europe's fundamental industrial trial performance more closely and are finding it to be less solidly based than they had previously supposed. The reap-praisal, under way with a ven-geance in the UK since last year, is now highlighting adverse developments on the Continent, which have been in the making since well before

Iraq's invasion of Kuwait. At the instigation of the Bundesbank, monetary policies across Europe have steadily tightened over the past two years. More and more leading European companies are reporting disappointing finan-cial results, and in certain big industries, such as chemicals, there is clear evidence of a cyclical downturn. There are also signs that the upswing in the automotive and steel sectors is faltering, while much of Europe's electronics industry is in poor shape.

Fierce price-cutting

In chemicals and motor vehicles, over-ambitious expansion of capacity has led to flerce price-cutting, particu-larly in the UK, once demand began to weaken. Producers now face paying the price for excessive optimism. Also at

some French groups, which have stretched their balance sheets to make large, opportu-nistic takeovers and are vulnerable to high interest rates.
The outlook is further clouded by the growing likelihood of a recession in the US, where many European companies have been active acquirers, and by the strength of European companies to keener international companies to keener international competition on

risk are companies, notably

both home and export markets. Meanwhile, earlier hopes of a business bonanza in eastern Europe are rapidly fading as the costs of German unification mount and the problems of economic reform multiply in the Soviet Union and its for-

Dependence on US

Against that, it can be argued that Europe's industrial recovery has been largely investment-led, and that companies will not cancel long-term plans overnight. In addition, the rapid growth of intra-EC trade has reduced Europe's economic dependence on the US, while recent rationalisation by many European industries has equipped them better to weather slower

grown.

But these claims have yet to be tested. In European industries such as cars and electronics, further – quite possibly painful - re-structuring is needed to achieve full interna-tional competitiveness. These will be harder to make against a background of more modest economic growth and business confidence. Governments need to guard against the risk of a resurgence of protectionist pressures, which could retard adjustment and jeopardise the single market. Companies, for their part, need to recognise that the comfortable margins of manoeuvre which they enjoyed in the carefree days of the late 1980s may be narrowing. Rigorous management, renewed emphasis on effi-ciency and adaptability in the face of a volatile business climate look more important determinants of corporate success in the early 1990s than the

hectic pursuit of grand strate-

gies which blithely assume

that Europe's expansion will

continue indefinitely.

ECONOMIC VIEWPOINT

hy did the British Government pass

over the option of

entering the Rate Mechanism at

the end of the August holiday season? The Chancellor, John Major, has become a strong

supporter of membership, hav-

ing witnessed the buffeting sterling received outside the system last autumn and win-ter, which has contributed to

that entry comes, the better. The Prime Minister is said to

have conceded the principle,

External and internal argu-

ments point to early entry.

Britain's influence in the Inter-

Government conceded, in how-ever distant and conditional a

form, at least the principle of a single official currency.
Unfortunately, even the

most pro-Europeans in the Cabinet are pessimistic about winning Mrs Thatcher over to

any form of the second goal in the six to 18 months during which the IGC is likely to

remain in session; and Parlia-mentary protestations about

sovereignty (that is, the right to debauch a sovereign British currency) are taken too much

at face value.

This makes ERM entry all

uncertainties are unlikely to

diminish between now and mid-December, while the need

for an anchor for sterling - to

prevent either an unsustaina-ble rise or an inflationary drop

Delaying ERM

against the danger

of a shooting war

has become greater.
The second reason, which

policymakers are more willing

to discuss, is the inflation pro-file. Without Saddam Hussein,

the headline RPI figure might

have peaked near its July rate

of 9.8 per cent, itself slightly lower than some had expected.

Now, however, the August fig-

ure, to be published tomorrow will come well into the 10 per

cent plus bracket. The underly-

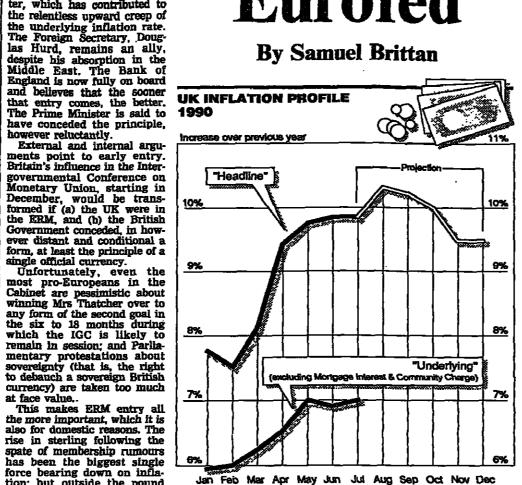

ing rate, excluding mortgage

entry runs up

however reluctantly.

'Blips' and **Eurofed**

By Samuel Brittan

of the August figures will make ERM entry more difficult to sell to captions Tory backbenchers. If there is subsequently an inflation plateau or even a slight fall of one or two decimal points, the politics are said to be easier. For, by the time of the Autumn Statement. the September RPI figures will have been published and the Treasury will be able to make a good guess about October.

Alas, there are too many hostages to fortune here. The longer ministers walt to announce ERM entry the greater the danger that they will do so on the verge of, or in the midst of, a shooting war especially as the "shoot 'em harder later" school is in the ascendant in Washington. The imminence of hostilities, apart from all its other horrendous implications, will give Mrs Thatcher a perfect excuse to reopen the ERM question.

Meanwhile, signs of recession, already evident from industrial surveys, retail sales, corporate profit statements and bad debts, will multiply; and with their grantitions of base-rate cuts, which would be disastrous for sterling outside the ERM and require very cautious handling even within it. The possibility of a wide

interest and poll tax distor-tions, is also likely to rise a further half a point to about 7% per cent due to oil prices. entry band for sterling, skewed The impact on the so-called Madrid conditions will be miniabove the prevailing market rate, is at last being taken serimal as other European counously; and that gives the Govtries will be affected even ernment a little more freedom more. The worry seems to be that the "shock horror" effect from day-to-day market pre-sures. But that does not

remove the danger that, if entry is delayed, it will be at too low a central rate to put decisive downward pressure on

Source: CSO. Philips & Drew central projection

To judge by some of the media hype, the young audience that sings "Rule Britannia" at the last night of the Promenade Con-certs will also be able to sing the words of a real headline: "Triumph of Thatcher Line on Euro Money."

Whether this appeals to you or not, forget the idea. Jacques

Delors, the Commission president, did suffer a setback at the Rome "EcoFin" meeting and has unwisely allowed his resentment to show. The assembled Finance Ministers and central bankers did not accept his proposal to start Stage Two, establishing the new institutions, at the begin-ning of 1993 and then to move the final Stage Three not long thereafter. But they objected to a fixed timetable, not to the goal of a European

version to the hard Ecu. Interest was expressed in redefining the present Ecu so that it was at least as strong as its strongest component. But this was still as a unit of account and not a currency (except on the

part of Spain).
Indeed, the Bundesbank president, Karl Otto Pöhl, who has been most warmly applauded by the Union Jack

wavers because of his caution, himself presented a report of the Committee of Central Bank the Committee of Central Bank Governors, showing how far they had agreed on a draft stat-ute for a European Central Bank. The Bank of England has played a full part in draft-ing the report, subject to a caveat about the Thatcher relitical reservations. political reservations.

The primary goal of the European Central Bank will be to achieve price stability by methods consistent with "free and competitive markets." Like the Bundesbank in Germany, it will also be required to support the economic policy of the Community. But "in the event of a conflict, the governing body of the system will have no choice but to give priority to price stability.

The Eurofed Council will consist of a president, appointed at a European summit, who will head a seven member executive, and central bank governors from all participating countries. Policy decisions will be made by simple majority vote.
But to reinforce the commit-

ment to price stability, all members must be duty-bound not to take instructions from Community institutions, national governments or any-one else. Members of the executive will be appointed for eight years, renewable except in the case of the president.

There will be a single "indivisible" central monetary policy. Minimum reserve require-ments will not be prescribed at the outset; but the conditions under which they can be applied will be in the statute. Nevertheless, national central banks may exercise some inde-pendence in matters such as prudential regulation, payments systems and carrying out government business. No part of the system will be able to grant credit to government institutions.

National governments will still be in charge of exchange rate policy towards third countries, although Eurofed will be consulted and have freedom to conduct foreign exchange operations within the guidelines. If one is looking for a source of trouble, here it is. Meanwhile, the Bundesank's own hard core position quite consistent. It supports strong Eurofed, but would happily continue on its own if

Sticking to his core position would help Karl Otto Pöhl get his act together

other countries lack the political will to participate or have not converged to the degree it believes necessary to make the project work. If Mr Pöhl would stick to his core position and not switch the emphasis according to audience, it would work wonders to get his act

My view is that the political inner group of five countries is prepared to accept a single offi-cial currency will not last for ever, those willing should go ahead even at the cost of a twoor three-speed Community. As the EMS has shown, if an inner group launches a successful pilot project, others will follow in due course. The way to miss the bus is to wait for strag-glers.

BOOK REVIEW

'Big Bang' for eastern Europe

n every university library, there are whole rooms full of learned books on the transition from capitalism to socialism. Until recently it had hardly occurred to anyone to write about a move the other way. János Kornai, a cele-brated Hungarian economist who spent most of the past two decades on seemingly wishful thinking about precisely this problem, has now produced a definitive textbook for the prospective reformers of eastern Europe. Yet there is a certain poignancy in the English edi-

tion's timing.
The economic revolutions sweeping eastern Europe are obviously going to be longer, messier and less inspiring than the "Velvet Revolutions" of 1989 - and the world's atten-1859 – and the world's attention is already shifting away.
Not only have Poland, Hungary and Czechoslovakia been pushed off the front pages but, far more important, they have also fallen far down the West's artificial and communic arounds. political and economic agenda.

There is now only one upheaval sensational enough to excite western leaders and grab headlines: the leap into the unknown being debated in the Russian and Soviet parlia-ments this week. Known as the Shatalin Plan or the 500-Days Programme, this should go down in history under a more dramatic title — the Second October Revolution, perhaps. For if the Soviet Union adopts this new economic policy, as it almost certainly will, the out-come will be nothing less than the dismantling of the entire material basis of communism, starting on October 1.

The irony of Dr Kornai's book is that the former oppressors in the Soviet Union now seem closer than any of the former satellite countries to adopting his key recommenda-tion: that it is essential to combine simultaneous structural macroeconomic and political reform in one carefully co-ordinated and fast-moving programme. In fact, Dr Kornai's book could be described as the foundation for the Shatalin

approach.
Dr Kornal draws three powerful conclusions from Hungary's decades of tinkering with reform on the political and economic frontier between state capitalism and socialist central planning, it is no coincidence that these issues are the focal points of the current Soviet debate on reform.

First, he argues, it is futile to try to "simulate" market forces with an artificial construct like "market socialism". Trying to tell state-owned and socialised enterprises to behave as if they were subject to market discimanagers have no personal stakes in their success and because they can always turn to the government for additional funding, state enterprises must actually be circum-scribed more closely, not freed to put genuine private companies out of business. Thus, without widespread private ownership of the means of pro-

elections.

prise, the market system will be an ineffective sham. Second, macroeconomic stabilisation must be accom-plished rapidly and with ruth-less determination. The less determination. The government's budget deficit must be eliminated, inflation must be stopped, foreign currency convertibility introduced and free pricing established, all as part of one "Big Bang" operation. Without such simultaneity, stabilisation can be worse than useless. "Most of the measures, beneficial as parts of a stabilisation package, would be dangerous and damaging if taken singly without the other measures being implemented at the same time," he argues. Both the above conclusions are now widely shared by eco-

are now widely shared by eco-nomic experts in East and West alike, though not necessarily by the politicians. Dr Kornai's original contribution lies in welding the structural and macroeconomic requirements together into his third, and most important precept. The freeing of market forces and the stabilisation of the macroeconomy are inseparably intertwined. They add up to an "organic whole" and cannot be separated out into distinct components. Just as it is neces sary to implement all of the parts of the stabilisation pro-gramme together, the stabilisation programme itself must be combined with privatisation and market liberalisation if either is to succeed.

It is on this last point that Dr Kornai's prescription differs from the advice given by many western experts — and from the practice of most of the governments of eastern Europe. Neither Poland nor Czechoslo vakia nor Hungary nor Yugo slavia have yet come up with the convincing programme of privatisations, financial innovations, land tenure reforms and other structural changes that might unleash the hoped for flowering of the supply side of the economy.

To have any hope of doing this, their governments would do well to ponder some of the precepts laid down by Dr Kornai: all forms of private eco-nomic activity, including those now denounced as speculation and profiteering, must be wholly and truly liberated; enforcement of private contracts must be effectively guarbe absolute security for private property rights: the tax system must not restrain private investment; the credit system must favour the private sector rather than government-owned monopolies; finally, private economic activity must command "social respect."

Anatole Kaletsky

The general moves west

■ While attention is directed at the Gulf cauldron the good news is that the melting of old cold war enmittes is proceeding apace in Europe. The head of Soviet forces

in Germany, General Boris Snetkov, yesterday paid the first-ever visit by one holding his top job to the headquarters of the British Army of the Rhine in Mönchen-Gladbach Gen Snetkov commands the

380,000 troops of the west group of the Soviet army encamped in east Germany. The General's next campaign will probably be his last in

He is starting to bend his mind to the tricky problem of withdrawing his men over the next four years after Ger-man unity on October 3. Allied and Soviet command-

ers have gathered in the past for occasional social occasions at Potsdam, where Britain, the US and France have long maintained an army liaison group. But they have steered well clear of formal encoun-

The ice first started to break last September, I hear, when British commanders travelled to east Germany to visit Soviet military installations.

That trip was not made pubic. It actually took place two months before the breaching of the Berlin Wall.

Plastic men ■ The news that Hugh Freedberg, chief executive of The Mortgage Corporation, is moving to TSB to head its insurance and investment services division, means that TSB's upper echelons are now firmly in the hands of plastic card

industry gurus. Like TSB's Chief Executive. Don McCrickard (still best known as the man who gave the world the slogan "That'll do nicely"), Freedberg is a for-mer head of American

Express's UK card business. TSB's head of banking operations is Peter Ellwood. who was head of Barclaycard until last year. He acted there as a virtual spokesman for the credit card industry, defending it against onslaughts from the

McCrickard is one of the founders of a group of former Amex top executives who have risen to the top in UK banking and still meet fairly regularly for reunion dinners. Ironically none of his

lieutenants will spend much of their time at TSB on the card industry. The TSB Tru-stcard, with about 3.5m holders, is being kept on a backbur-ner at the moment.

Bird flown I cannot believe that the

Liberal Democrats, already a bad third in British politics, wish to be known as the invisi-ble party.

But when they unveiled

their new gold logo which is called the Bird of Liberty yesterday it disappeared from some of the press pictures. Meticulously the party (and Scottish and Weish cousins of the

of the same name) are preparing for their big public occa-sion of the year — their confer-ence in Blackpool next week. The design firm Fitch RS worked with them to create the winged device which, we are warned, must always be reproduced correctly, clearly, and in the right colours. It con-sists essentially of a bird body

and 7 large feathers.
Paddy Ashdown MP, the
party leader, took little persuading by press photographers (including the FT's Ashley Ashwood) to put on his widest grin and pose in front of the logo. Back in newspaper dark-

rooms the pictures were devel-oped and printed. Paddy Ashdown looked levely. But where

"The pen? Japanese, actually."

was the Bird of Liberty? Only faint traces could be discerned on the wall behind him. The current theory is that the democratic bird in its pres-ent colours is shy of flash pho-tography and hides its head under its wing. It will have to be more aggressive than that to survive in the hur-ly-burly of British politics.

Isidore next

■ The remains of Hurricane Gustav trailed across northern Britain a few days ago, Meanwhile, there is more severe weather in prospect for parts of the Atlantic. The US National Hurricane Centre in Florida, has just upgraded a depression to storm Isidore. But why do hurricanes have

such interesting names? The practice actually started centuries ago when they were given the names of saints. But it was 1950 before they began to be formally named by weathermen. At first the Florida centre used phonetic names like Alpha, Bravo, and Foxtrot. Then for the Eastern Pacific and in the Atlantic it switched

towomen's names. Men's names were introduced at the end of the 70s, bowing to pressure from women. Dr Hal Gerrish, a senior hurricane forcaster at the US centre says, "The femi-nist movement in this country tired of us blaming destructive things on women. They wanted men to share the responsibil-

Only six lists of 21 names

are used now. On the seventh

year they revert to the first list. The list stops at 21 because that was the highest number of systems in any one year - 1933. Famous hurricanes like Betsy and Hugo are removed from the list so that the records cannot confuse them with imitations. Hurricane names are not chosen lightly. Proposals have to go before the World Meteorological Organisation in Geneva. To replace Hal Geneva picked Humberto. "They should have stuck with my name. It's easy and short", says Hal Gerrish.

Big ears

Jeweller Gerald Ratner was his usual good value at his company's press conference yesterday. Confidently predicting strong sales in the pre-Christ-mas rush, he picked out three

items. Two were uncontrover-sizi - a ladies' watch with a selection of coloured dials, and a men's half-sovereign ring selling for less than the price of a half-sovereign (it's a fake gold coin in the mount). But the third item, slready selling for £1.95, is decidedly eccentric. It is a gold uncrusha ble earring for men. This accessory, which incidentally requires a pierced earlobe, is predicted as the big seller this

year.
"You can go to all the right places and men are wearing hem," says Ratner, although he was not sporting one him-

poor returns.

Martin Dickson on the mud-slinging in the contest for Governor

Open race in Massachusetts

t is a classic tale from the political infancy of a banana republic, much disliked ruler and wife fly away on glad-handing mission to for-eign parts. Ambitious number two stages palace coup. Rushes in new policies and declares ringingly, in the manner of usurpers down the ages, to be acting responsibly to head off a

But these very events have just unfolded not in some steamy, benighted backwater of the Third World, but in the Commonwealth of Massachusetts, the cultural and economic heartland of New England and one of the cradles of American political cultural and seconomic and the cradles of American political cultural of American political culture. And the embarrassed victim was none other than Governor Michael Dukakis, who a mere two years ago was the Democratic contender for the Presidency of the United States

Even more curious is the sequel: just three days after staging the coup, Ms Evelyn Murphy, the state's Lieutenant Governor, committed political suicide by withdrawing from the race to succeed Mr Dukakis as Governor.

Yet bizarre though all this might seem, the events are in keeping with the remarkable intrigue and mud-slinging marking the state's politics as it heads towards a Gubernatorial election. And the issues raised in the Massachusetts race have a wider relevence, echoing the concerns of many Americans as the nation prepares for November's mid-term

One theme alone dominates the Massachusetts battle: the sorry state of the local economy and the consequent fiscal crisis facing its government. New England in general, and Massachusetts in particular, are in the throes of a regional recession — and this is likely to deepen if the US economy as a whole gives up its last splut-terings of momentum.

This is a far cry from the heady days of the 1980s, when New England boomed, with job gains well ahead of the national average, led by high-technology and defence compa-

It became known as the "Massachusetts Miracle" and was ridden by the politicians for all it was worth: Mr Dukakis, who was Governor in the mid-1970s and again for much of the 1980s, used his alleged economic achievements as a springboard for the the Presi-

Mr Dukakis, having claimed credit for a miracle was now equally tarred with responsibility for the wine turning back to water. Worse for him, the view took hold that he had somehow betrayed the state, taking off on the aggrandise-ment of a Presidential campaign while at home the fiscal shop was left to stew.

Whatever the truth, the fact is that the slower economy has repeatedly thrown out the state's tax revenue assumptions and its citizens have been suffering from rising taxes and shrinking services.
All this explains why in a

short two years Mr Dukakis has gone from being the toast of the national Democratic party to arguably the most

Democratic primary, lying a poor third in a three person race. And as Lieutenant Governor she found it hardest to shake off the Dukakis mantle.
Last Friday, however, when
the Governor was away on a
trade mission in Europe, she
severed her links, unilaterally announcing a package of mea-sures which she claimed would

cuts announced by Mr Dukakis himself two days earlier. She denied the move was linked to the Gubernatorial race, but few believed that, and opponents simply jeered. "Mutiny on the Titanic," said one, "A little coffee house coup d'etat," said another.

Democrats during the Dukakis

There are two Republican contenders: Mr Steven Pierce, a state representative with a lacklustre political record and an anti-abortion stand. He is leading in the polls, but catching up fast is Mr Bill Weld, a youthful New England Brahmin, with an impeccable politi-cal pedigree, who blends tough talk on crime and taxes with liberal views on abortion.

However, both Republicans support a contentious grassthe Democrats, which would roll back Massachusetts' taxes if the voters support it in November. Similar tax revolts are under debate in several other states.

rified tones of the impact this would have on their already much shrunken resources If the roll-back goes ahead, no matter who wins the election, the political mud-slinging next year would make the 1990 campaign look almost civilised

thrust Britain's shipthrust Britain's ship-ping companies into the limelight will begin on Sunday with the launch of British Shipping Month. But as the champague corks pop at the opening ceremony aboard as Canberra at Southampton, a sense of malaise is sending the entire administration of public schools in Boston's poor shivers through the industry.

determined effort to

The reason is its diminishing size. One does not need to turn outsider, but the flipside to that is his impolitic record of gaffes, which have come to be a Nelsonian eye towards the British merchant fleet to observe that there is very little known as Silber shockers. The left of it. From a position of being one of the world's fore-most maritime nations, Britain quoted Shakespeare during a health debate: "When you've now ranks as a tiddler, with barely 330 deep-sea vessels left on its mainland register. had a long life and you're ripe, then it's time to go." Oppo-nents claimed he wanted to

Worse, the signs point to further shrinkage. Because poor returns are discouraging shipping companies from investing in new vessels, the merchant fleet is ageing. Britain's vessels are therefore becoming increasingly uncompetitive when compared with the tech-

sels operated by other nations.

Britain is not the only country to have witnessed a con-traction of its fleet. The container revolution radically changed the way freight is car-ried worldwide, making many cargo vessels redundant. Mer-chant ships generally have grown larger and faster, so fewer are needed. And in spite of a partial recovery, the global recession in shipping that occupied much of the past decade has left the industry

burdened with overcapacity.

The British fleet, however, was hit worse than most during the 1980s: and, according to David Tomlinson, director of the independent UK Centre for Maritime Policy Studies, a history of poor management was

largely to blame.
"The shipping industry allowed itself to lapse into the same sort of complacency as the motor, coal and steel indus-tries, characterised by inefficiency and restrictive prac-tices, he says.
"Now we have a new car

industry, a new steel industry, and we almost have a new coal industry, but the shipping five to 10 years behind."

Shipping companies claim with some justification that their management has sharp-ened up immeasurably since the bad old days. Their continuing difficulty, however, is in competing against countries using cheap, Third World crews or those such as Nor-way, West Germany and Greece which award tax breaks to their industries.

One way shipping companies have tackled labour costs is by egistering vessels in offshore

AERITALIA

Richard Tomkins on difficult times for a contracting industry

territories or in other countries lates, these incentives would such as Liberia, thus enabling them to use cheaper foreign crews. More than 40 per cent of the 581 ships in the Britishowned fleet has been flagged out in this way.

But the industry says a more important factor determining its future is its ability to make adequate returns on invest-ment in new vessels. Against a background of continuing soft-ness in world shipping rates, it

cost the Treasury about £1bn in taxes forgone over the first five years. It believes the sum would eventually be recovered in higher tax revenues from a more prosperous industry. The main plank of the Brit-ish shipping industry's case for special treatment is its contri-

bution to the balance of pay-ments. At £4.1bn gross last

by inefficiency and restrictive practices'

says, nearly all Britain's competitors give their shipping industries significant liscal incentives to invest, and Britain needs to do the same. The two biggest items on its shopping list are adjustments

to the tax regime to favour the purchase of new vessels. The first request is for accelerated depreciation, allowing compa-nies to write off 100 per cent of the cost of new ships against tax in the first year, and the second is for roll-over relief. meaning that the Treasury would forgo tax on profits from the sale of ships, provided the money was reinvested in new Together, the industry calcu-

ings after tourism and financial services. Another £1bn or so was contributed by London's maritime insurance, shipbroking and related activities, the future of which could be jeopardised by the loss of an indigenous maritime industry.

Two other arguments for the merchant fleet industry revolve around Britain's posi-tion as an island nation. Some 95 per cent of the country's imports and exports are car-ried by ship, the industry says, so it should not be left wholly vulnerable to other countries shipping services. And at times of crisis - witness the Falklands conflict - the fleet becomes a vital element of

seemed to have undermined the argument that it is necessary to maintain a merchant fleet for transport needs in times of war, the Gulf crisis has suddenly brought it back into play. The sight of US defence forces feverishly scouring the world's charter markets in an attempt to find vessels capable of meeting their transport needs has brought the issue into focus. The other is Sir Jeffrey Sterling, chairman of P&O and president since May of the General Council of British Shipping, the industry's representative body. A man who moves in senior government circles and is widely regarded as having Mrs Thatcher's ear,

SOPRINTENDENZA OF THE HISTORICAL AND CULTURAL MERITAGE OF NAPLES

port Secretary, of a working party studying the shipping industry's troubles. The working party is due to report tomorrow, and the Gov-ernment will respond soon afterwards. The question of tax breaks is specifically excluded from its remit but it would be surprising if the Government did not attempt to take some of the force out of the shipping industry's arguments by offer-ing a non-fiscal fillip or two.

Sir Jeffrey not only represents

a formidable lobbying force, but is also co-chairman with

Sterling overvalued

From Mr Michael Nevin.
Sir. Barry Riley's article on
"British industry's stiff upper
lip" (September 8) is a timely
reminder of the conflicts that persist between the needs of British industry and the finan-

cial markets.

The economic strategy being pursued by Mr John Major, the Chancellor of the Exchequer, of high interest rates and a strong pound, is broadly analogous to the policies pursued during two previous periods of 20th-century British economic history. The first was between 1925 and 1931, following Britain's return to the gold standard. The second was the term of Sir Geoffrey Howe's chancellorship between 1979 and 1983 when, as today, the external value of sterling was buttressed by high oil prices. During both periods, sterling

was overvalued. Maynard Keynes estimated that ster-Keynes estimated that sterling's return to the gold standard at a parity of US \$4.86 = £1 in 1925 represented an overvaluation of 10 per cent compared to the level at which balance of payments equilibrium could be achieved.

It is difficult to be as precise about the extent of sterling's

about the extent of sterling's overvaluation in the early 1980s, but the fact that its rate of exchange fell from US \$2.40 = £1 to \$1.05 = £1 within five years is strong evidence that, at its peak, sterling was over-valued by more than 10 per

The effects were similar in both cases. The high external value of sterling, sustained by value of starling, sustained by a regime of high interest rates, reduced the competitiveness of UK industry on world markets, and depressed both corporate profitability and real wages. Investment was squeezed between an overvalued currency and high interest rates. rency and high interest rates.

Consequently, job creation was limited, and the level of unemployment rose above its long-run equilibrium (which may be defined as the "Nairu" - non-accelerating inflation rate of unemployment). The monetary sector witnessed severe disinflation: deflation in the late 1920s, and a sharp fall in the rate of inflation in the

early 1980s. There is little doubt that the combination of a strong pound and high interest rates will lead to a similar fall in the rate of UK inflation in the medium term, which is Mr Major's top priority. However, as in the 1925-31 and 1979-83 periods, this

will only be achieved at the cost of a severe retrenchment

in British industry.

The situation would be made even worse if Britain entered the exchange rate mechanism of the European Monetary Sysor the European monetary sys-tem at prevailing rates, which are affected by the Gulf crisis. Entry at present exchange rates would have the following

effects:

The high value of sterling would send the wrong signals to both consumers and producers, namely, to substitute imports for domestic produc-tion, while making exports expensive on overseas markets.

Consequently, import-substituting or export-generating investment in the UK would be discouraged.

The process of restoring the

UK's balance of payments to equilibrium would be hampered, and a longer and deeper slowdown in domestic growth would be required to restrain would be required to restain imports than would be necessary at a lower exchange rate.

Unemployment would rise well above its Nairu level.

And, while the value of ster-

ling internationally could be defended for a while by high interest rates, in the medium term its value could not be sustained and sterling would be forced downwards within the

It should be remembered that, despite high interest rates, both the 1925-31 and 1979-83 periods were followed by hig sterling devaluations. A preferable alternative would be to reduce interest

rates and allow the external value of sterling to fall to a sustainable level, perhaps between 10 and 15 per cent below its present level, before entering the EMS. At the same time, an austere autumn mini-budget should be introduced to restrain consumer demand through higher taxes: after all, it was the fiscal laxity of the former Chancellor, Mr Nigel Lawson, in 1987-88 that led to the upsurge in inflation.

The combined effect of a tough budget and lower interest rates and exchange rates would be to shift resources away from domestic consumption and towards export-oriented production, thus improv-ing the balance of payments while reducing inflationary pressure. Michael Nevin.

Providence House,

Compensation for 'disturbance' be added in support of this con-cept. With a big planning bill due in the new parliamentary

Sir, Samuel Brittan gives his welcome support (Lombard, September 10) to the idea that those most affected by essen-tial development should be compensated by a disturbance payment over and above the present value of their homes. These ideas deserve more examination. They are not, however, the "most novel" proposal in the paper reviewed by Mr Brittan. The idea of an additional allowance was the centrepiece of an important review, by this institution, of compensation for compulsory acquisition (published in March 1989). This was lodged

with the Department of the Environment and has been under discussion with the department since then.

From Mr D.A. Thompson. Sir, It is not just the county of Kent that is threatened by the Channel Tunnel and the road and rail links it will A number of London bor-oughs lie in the path of the high-speed link (whatever route is finally chosen) and the

INTERNATIONAL MONETARY FUND ANNUAL REPORT

A touch of glasnost at the IMF

GLASNOST is taking root at the International Monetary

The IMF's latest annual report gives an unprecedent-edly detailed account of the discussions on economic policy that take place between the

This openness reflects the management style of Mr Michel Camdessus, the IMF managing director, and for the first time the report shows when the IMF board discussed the economic performance of the main industrial countries. This allows readers to assess how governments have responded to advice and brings the process of IMF surveillance bers more into the open.
In the report the IMF identi-

fies surveillance – carried out mainly through consultations under Article IV of its charter - as "the central activity of the Fund." Surveillance and consulta-

tions with member govern-ments are likely to grow in importance. The report says that IMF directors agreed last June that enhancing the system mainly depended on the quality of its surveillance.

PROGRESS has been good in

implementing the Brady initia-tive, launched last year and aimed at lowering the debt

burdens of developing countries, the International Mone-tary Fund says in its annual

However, some of the debt

reduction packages agreed between debtor countries and

serve as a nominal anchor against inflation for the international monetary system.Instead, it is up to the monetary authorities of each country to achieve price stability, supported by a disciplined fiscal policy.
The report briefly outlines

what the IMF board concluded during the Article IV consultations with the Group of Seven biggest industrial countries. Since the board discussed Japan only last July its recommendations are still fresh: Japan is urged to place "strong emphasis on the bold pursuit

of structural policies, particu-larly those that would help

Brady plan for reducing

improve living standards, remain relevant. The IMF has added a postscript saying that monetary and economic unification markets and reduce structural

financial system."

Measures to eliminate distor-

tions in Japanese agriculture,

land management and the

retail sector would both help increase welfare at home and abroad and reduce trade ten-

sions, the report says, adding that several IMF directors said

Japan should invest more on

social infrastructure and

increased last year. Non debt-

The board's discussion of

ARREARS of debtors to the IMF remain a serious problem, although the number of countries in arrears has fallen with Guyana and Honduras settling their overdue obligations in June, the Fund's annual report says. Eleven countries were in arrears at the end of April amounting to SDR3.25bn (\$4.51bn), against SDR2.80bn a year earlier. By the end of June, the arrears of nine countries — Kampuchea, Liberia, Panama, Peru, Sierra Leone, Somalia, Sudan, Viet Nam and Zambia - stood at SDR3.20bn. All except Kampuchea made some pay ments to the fund in the financial year en April 30. A group of donor countries led by Italy established a support group to help Somalia out of arrears.

Rarlier this year, the Fund's board agreed on a strategy to tighten policing of arrears and provide for the suspension of voting rights of members falling into long-standing

between the two Germanys should contribute to improved non-inflationary global growth, reduce current account imbalances and aid economic developments in eastern Europe.
The board's discussion of the

US took place in September 1989, although some observa-tions remain apposite. IMF directors say there is a need for "substantial additional" fiscal measures to cut the budget deficit and boost savings.

The report says higher savings, to be achieved mainly through fiscal restraint, are essential to cut the external deficit. This deficit is seen as a major source of vulnerability. The IMF board reviewed British economic policy last March. It expressed concern that inflation had not peaked and gave what turned out to be

a prescient warning that infla-tion might not decline as rap-idly as envisaged by the UK authorities, it urges a continu-ing cautious fiscal stance in the current financial year. Some directors say that the UK should aim for another

large budget surplus in the current financial year and that the government should postpone significant tax cuts, while promoting tax reform. This was the course taken by

Mr John Major, Britain's Chan-cellor of the Exchequer, in his first budget in March when he left income tax rates unchanged, announced tax changes to encourage savings and set a £7bn (\$13bn) target for the public sector debt repayment in 1990-91, unchanged from the level then expected for 1989-90.

Fund reviews SDR role in international debt makes good progress

Fund has turned its attention

said its board had considered ways to strengthen surveillance and policy co-ordination. There had been particular focus on the extent to which using national currencies as

THE LEX COLUMN

A global warning from BTR

Share price relative to the FT-A All-Share Index

why the yen should strengthen. After five rises in

the discount rate, short-term Japanese rates are now firmly

established above US rates.

The gap should widen as the US Federal Reserve is forced to

ease monetary policy in a des-

perate bid to avert recession.
The Japanese trade surplus is beginning to rise again and real bond yields in Japan are

much more attractive than in the US. Meanwhile, the Bank of Japan's latest quarterly sur-vey of short-term economic

prospects demonstrates that

the recent jump in oil prices has not damaged Japan's robust capital spending plans. Unlike, most of its industrial

partners, Japan seems able to live with high interest rates.

The economic factors behind a rebound in the yen have been

in place for some time. What

has been missing, until now, is a reversal of the huge capital

outflows which swamped the

balance of payments surplus.

Part of the reason for the change has to do with Japa-

nese banks' urgent need to

repair their capital ratios. But

if it continues for much longer it is bound to be bearish for

British Aerospace

Short-term, BAe's profits and

ment on the military side; and

The striking thing about BTR's results yesterday was not that the shares fell by 11 per cent, but that the market as a whole did not follow suit. Taken at face value, the company's mes-sage is profoundly bearish. The coming world recession differs from that of ten years ago chiefly in being broader; whether it is as deep will only be clear as it gathers pace over the next twelve months. It now looks as if BTR itself, which produced earnings growth of 20 per cent in 1981 and 19 per cent in 1982, may be reduced to virtually zero growth this year

The obvious objection to the comparison is that ten years ago BTR was a much smaller and less diverse company. But it was still a conglomerate. turning out such recessionprone products as hoses, valves and motor components. It is not clear why the disciplines which protected it then should no longer apply. Either BTR is a spent force, or expectations on corporate earnings need yet

more downgrading.

At yesterday's close of 318p and assuming earnings growth this year of perhaps 4 per cent, BTR's shares are below the BTR's shares are below the market p/e and above the market yield. Unusually, they are also on a lower multiple than Hanson, which seems to have better growth prospects this year and has net cash in place of BTR's near-50 per cent gearing. But BTR still claims to see the looming recession as an opportunity for acquisition, just as it picked up a weakened Thomas Tilling in 1983 and Dunlop in 1985. Indeed, it remains hard to imagine a downturn which could do the company material damage. But if that makes the shares undervalued in relative terms, this could well be corrected not by a rising share price but by a failing market.

Japanese yen

Watch out: Japanese money is heading home. The message has yet to reach the Japanese equity and bond markets, which remain in a fragile condition; but it is clearly showing up in the exchange rate. Hav-ing fallen by more than a third since late 1988, Japan's trade weighted exchange rate has risen by over 6 per cent since the Gulf crisis began. The yen has been far and away the best performing currency, which is all the more surprising given that Japan should be harder hit than most by the recent near doubling in oil prices.

There are plenty of reasons

its share price are a hostage to all the great imponderables of the day, like the oil price, ster-ling and Saudi Arabia. The dif-ficult thing, in looking at the interim taxable profit of £146m, is to work out what it says about BAe's chances of success in its long-term strategy. On that score, the obvious good news came down to three things. The first was civil aircraft's £15m trading profit. albeit including a £14m writeback of provisions; the second, a continuing margin improve

can BAe maintain the momentum? In civil aircraft. the signs are that it can, given the steady approach of Airbus towards profitability, and on the military side, the scope for rationalising old plant means margins have further room to rise. But perhaps the biggest risk factor is timing the possi-bility that Tornado, which saw BAe through the 1980s, will start tapering off before Africas and the real estate operations are feeding in substantial sums to the bottom line. It is bard, too, to see that a company whose dividend payments will total only £80m-odd this year deserves much more tha current market capitalisation of £1.45bn.

the third, the impending upswing in Rover's fortunes.

Ratners

The sales figures look good, the pitch is smooth as ever, the shares even rose despite the questionable utility of first half figures in a business domi-nated by Christmas. But a lin-gering question-mark hangs over Ratners. It concerns not the UK, although with continu-ing problems at Salisburys and doubts over operating margins in the wider group, it might. Rather, it involves the US. acquisition of Kays, which still

looks a little like a deal too far. If dilution can be avoided this year, well and good. The following year will be an equally stiff test, for the group is unlikely to escape the worsensqueeze with its growth rate intact. If it does, the rating will surely rise, given a prospective multiple of 7.7 times with the shares at 232p and assuming pre-tax profits of £143m. Just how much of an earnings push Kays could sustain, however, remains tantalisingly unclear.

Corroon/Aon

Given last year's Delaware court ruling on the Time/ Warner case, it is legally con-ceivable that Corroon & Black's board could "just say no" to yesterday's \$40 per share bid from Aon, and stick with the \$33.50 rival offer from Willis Faber. But C&B must think carefully. At \$40, Aon's offer is good value, given that delays in the US insurance cycle's upturn have savaged brokers' shares on Wall Street. And strategically, Aon's Rollins Burdick Hunter unit has strong London connections, if smaller than Willis. The UK company needs C&B badly, so

directors believed the Fund's resources should be used more flexibly in support of Brady-type debt reduction than is currently the case. The IMF has lent funds to finance debt reduction to Mexico, the Philippines and Costa Rica, which have all agreed to support similar deals

WORLDWIDE WEATHER

Spending plans trimmed in French budget

next year is set to rise by 4.8 per cent in a budget, unveiled yesterday, which has been tightened in the wake of Iraq's invasion of Kuwait.

Mr Louis Le Pensec, the gov-ernment spokesman, said the budget was based on "effort and equity, not austerity."
Mr Pierre Bérégovoy, the
Finance Minister, still intends
to cut the budget deficit to
FFROM (\$15bn), FFr10hn less than in 1990, but he has lopped FFr8bn off his initial spending plans in order to make way for

more tax cuts.

Those tax cuts are aimed mostly at stimulating company investment, which has already begun to slow and could come crisis. But Mr Bérégovoy has also sought to still the grum-bling of the parliamentary Socialist Party with stiffer wealth taxes and FFr1.6bn extra for minimum income payments to the unemployed. Corporation tax on undistributed profits will be cut, as expected, from 37 per cent to 34 per cent, and the top rate of value added tax will be reduced from 25 to 22 per cent, coming closer into line with

other European countries. At the same time, however, the Government plans a sharp increase in capital taxes: an extra FFr650m from the wealth tax, taxation for the first time of capital gains on unlisted shares, and a 4 percentage

company financial gains to 23 per cent.
The Government has made

some adjustments to the economic forecasts on which the 1991 budget is based to take account of the rise in oil prices since the invasion of Kuwait. On the assumption of an oil price at \$25 a barrel, the Government has revised next year's growth forecast slightly downwards to 2.7 per cent - a figure which some independent

economists say may be over-optimistic – with inflation rising to 2.8 per cent. The French trade deficit, which the Government had earlier hoped to reduce to FFr39bn, is now forecast at FFr50bn next year. Despite the measures intended to soothe its party supporters, many of whom have been demanding a more overtly Socialist economic policy, the Government is expec-ted to face some difficulties in pushing the budget through parliament, where it does not have an outright majority. Parts of the right-wing oppo-

sition, especially the Gaullist RPR, have strongly criticised the budget proposals for not cutting spending and taxation severely enough.

The Communists, whose votes have often been crucial in securing a parliamentary majority, have attacked the proposals for "gifts to busi-ness" such as the reduction in corporation tax on undistri-

Mazowiecki tightens hold on privatisation

POLAND'S Prime Minister, Mr Tadeusz Mazowiecki, is expec-ted to propose Mr Waldemar Kuczynski, a close aide, as the head of the country's newly formed privatisation ministry table. Our thoughts are especially with the Jewish people."

The final negotiations the Premier's office.

with the appointment of two new ministers for Agriculture and Communications. Mr Kuczynski's nomination

represents a blow for Mr Krzysztof Lis, who until now has spearheaded the Government's privatisation policies. Mr Lis had been promoted from running a small management consultancy office to the government privatisation unit.

He built it up from scratch

and maintained good relations with Mr Leszek Balcerowicz, the Deputy Premier in charge of the economy.
In passing over Mr Lis, and virtually on the eve of Poland's first factory sales, Mr Mazo-wiecki has recognised that privatisation is as much a politi-

cal as an economic process,

which will be crucial to the

success of his government. Mr Kuczynski, who spent the best part of the 1980s at the French Ecole des Hautes Etudes en Sciences Sociales. has acted as Mr Mazowiecki's closest economic adviser over the past year. His appointment means that the Prime Minister will be able to monitor privati-

Mr Mazowiecki yesterday met leaders of the various groups in parliament in a bid to construct majorities for other nominations including the Communications Minister (expected to be chosen from

the small Democratic Party) and the Farming Minister. Here, Mr Mazowiecki, who already had a candidate rejected by parliament last July, wants to propose Mr Jan-usz Bylinski who is from Rural

Solidarity.
The effect of the government changes will be temporarily eclipsed next Tuesday when, at the invitation of Cardinal Joseph Glemp, the Polish pri-mate, the country's leading pol-iticians will meet to agree a timetable for parliamentary and presidential elections which are

FAI falls 70%

One of the worst years ever for general insurers has claimed its latest victim. FAI Insur-ances, the Australian insurance and investment group, saw profits plunge almost 70 per cent following a big underwriting loss in the June year. Bruce Jacques looks at results from a company which has been strugglif at the extricate itself from exposure to some of Australia's biggest corporate collapses. Page 19

The year the lights went dim

Eastern Europe has fallen into an energy trap. Not only has the Soviet Union reduced its energy supplies to the region this year, but the Gulf crisis has ruled out increased supplies from Kuwait and Iraq. To make matters worse, any country to which the Eastern Bloc turns for extra oil will require hard currency. The lights, though not quite going out, are certainly dim-ming throughout eastern Europe, reports Judy Dempsey. Page 27

High costs hit Savoy

The Savoy Hotel Group, the luxury UK hotel, restaurant and health farm company, saw first-half pre-tax profits decline to £5.3m (\$9.6m) in the face of rising costs. Higher spending by overseas visitors managed to boost total sales 12.7 per cent to £45.6m, according to Giles Shepard, managing director. He warned, how-

ever, that the Middle East crisis and the strength of sterling against the dollar and European currencies would have an impact on the second half performance. Page 26

Goodman creditors meet

Banks which are owed money by Goodman International, Larry Goodman's beef processing group, yesterday met the examiner appointed by the Irish High Court. Goodman's group was last month given the protection of the court under newly-enacted legislation. This is the first time that the examiner system has been used in Ireland, and some banks are uneasy, reports Maggie Urry. Page 24

Gleeful Ratner up 12%

... A slowdown in the UK economy failed to formance of British jewellery chain Rathers which yesterday unveiled a 12 per cent rise in interim operating profits to £17.8m (\$33m). At the pre-tax level, profits fell from £14.69m to £9.3m, although the previous year's figure included £7.35m of

exceptional profits, Gerald Ratner, (above) chairman and managing director, gleefully announced: "We are still taking market share. The independents are collapsing." Page 24

made a number of acquisitions and is now the fifth largest bro-ker in the US. Last year, Aon's revenues were around \$2.3bn, and net profits stood at \$232m.

Before agreeing its merger with Corron & Black, Willis Faber had maintained a link with another US broker, Johnson & Higgins. The two companies established the Unison network, which links international brokers, but discussions about union with Johnson & Higgins were dogged by the latter company's wish to remain independent.

out gloom by Nikki Tait in New York

American

Airlines'

spells

A STINGING warning about prospects for the US airline industry during the second half of this year, and in the 12 months ahead, was issued yesterday by Mr Bob Crandall, chairman of American Airlines. Mr Crandall made a forecast to analysts that results from his own airline would be "stinko" in

the second six months of 1990, as the industry faces mounting labour and fuel costs. He said the recent weakness in domestic traffic was likely to be

aggravated by pricing pressures:
"As ticket prices go up – as
inevitably they must", the
decline in demand could only worsen, he said. Mr Crandall also made gloomy predictions for the whole indus-try next year, saying that Ameri-

can Airlines, along with other carriers, was facing "tremendous adversity". "AMR won't set any records for profits in 1991, as won't other carriers," he said. The remarks contributed to a small fall yesterday in the shares

of AMR. American Airlines' parent company, on Wall Street, down 75 cents at \$43.75. Prices of other airline stocks were mixed. Analysts appeared to greet Mr Crandall's remarks as confirma-tion of problems in the US air-line industry. "I think its a very valid assessment," said Ms Candace Browning, an analyst with Wertheim Schroder, "but I'm not

really surprised."

The problems are the rising costs of labour, facilities and fuel coupled with the difficulty of passing these on to customers in a sector plagned by overcapacity. Even before the Kuwait crisis.

Airline Economics, the East

Coast consultancy, was predicting little more than break-even for the whole industry in 1990. American itself — viewed as one of the less troubled carriers - saw net profits fall from \$278.9m or \$4.43 a share, to \$109.9m or \$1.75 a share in the

first half of the year. Some analysis had already downgraded their estimates for the full year before Mr Cran-dall's remarks to about \$4 a share, compared with \$7.16 in 1989. However some are now suggesting as little as \$2.10-

\$2,20. The AMR boss also put a question-mark over the company's investment intentions. He emphasised that out of a \$21bn five capital programme — of which \$15bn is due to go on airwhich \$150h is due to go on air-craft — only \$80h is committed. "If we can't make money with the assets we've got, it makes no sense to acquire more assets," he said.

When football ethics meet business

Tottenham Hotspur has run into trouble with the City. Andrew Hill reports

London are investigating the behaviour of Tottenham Hotspur, the quoted company which owns the first-division London football club.

News of a secret deal between the club - known to its supporters as 'Spurs' - and the pub-lisher Mr Robert Maxwell was withheld from shareholders for more than a month.

Yesterday, a statement from Spurs only added to confusion surrounding the future of the company. It said Spurs would pursue discussions with Headington Investments, a vehicle for the Maxwell family, about the possible underwriting of a £13m rights issue. But the group did not make clear whether talks were already under way.

Spurs' shares, which rose to 111p on Monday following specu-lation about the Maxwell deal, slipped 12p to 96p yesterday. The Stock Exchange and Take-

comment yesterday, but if it decides to react, its most likely course is a public statement reprimanding Spurs for not passing potentially price-sensitive information on to all shareholders as soon as the secret deal with Mr Maxwell was struck.

Neither Mr Maxwell nor Spurs were available to comment yes-terday, but the company's state-ment revealed that Mr Irving Scholar, a director and the club's chairman, reached a secret agreement with Headington at the beginning of August

Under the terms of that deal Headington would have been left with at least 25.1 per cent of Tottenham following a one-for-one rights issue at 130p a share. Talks, which only involved two of Tottenham's seven directors, fell through on August 23. "Mr Maxwell has indicated to

egulators in the City of over Panel are looking into the London are investigating situation.

The Stock Exchange refused to cussions," the group said yester-

day. It also emerged yesterday that Headington had already advanced £1.1m to Mr Scholar's private company, which then loaned the money to Tottenham, to be repaid on or before Octobe 29. The statement said certain Spurs directors had only recently become aware of this transaction and said a circular would be sent to shareholders as soon as possible providing more details. A special meeting of shareholders will also be called to ratify the loan agreement.

Bertelsmann plans heavy investment in E Germany

By David Goodhart in Gütersloh

BERTELSMANN of West Germany, the world's second largest media and publishing group, will invest hundreds of millions of D-Marks in East Germany during the next three years to build up its book club, newspaper and TV activities there, according to Mr Mark Wössner,

Mr Wóssner was yesterday announcing preliminary figures for 1989/1990 in which sales rose 6.7 per cent to DM13.3bn (\$8.3bn), operating profits rose 10.3 per cent to DM1bn, and net income rose 26.9 per cent to DM510m. He also said the 1990/1991 forecast for sales of DM13.7bn and net income of DM530m could be sur-

The company has completed a self-imposed phase of consolida-tion, following two major US acquisitions, Doubleday Group and RCA, in 1986/87, said Mr Wössner. He added, however, that there would be no return to the growth rates of the 1970s or 1980s and that future growth

would be "qualitative." Nevertheless, "a period of relative invest-ment restraint" is now ending and, in addition to expansion plans in East Germany, the com-pany is planning to spend DM400m on building an additional high-quality paper plant at Riva in northern Italy. Also, a total of between DM330m and DM360m will be

invested in the new "Premiere' Pay-TV channel, in which Ber-telsmann has a 37.5 per cent stake. Mr Manfred Lahnstein, board member for electronic media, said he expected 100,000 subscribers at the start, rising to Im in three to four years.

Mr Lahnstein said that he would have preferred a clause permitting private television and radio in East Germany in the unity treaty. The lack of such a clause means some delay as each of the five new states draws un its own regulations. Bertelsmann already has 400,000 East German members of

"core" business along with mag zines, the music business, book publishing and technical operations. It hopes to have 1m East German book club members soon to add to the 25m members of book and record clubs world-wide (4m in West Germany). Bertelsmann has 27 per cent of

total sales in the US compared with 33 per cent in Germany and 36 per cent in the rest of Europe. The US will continue to be a focus of expansion.

Fastest growing divisions, spart from electronic media, were music and video, up 11 per cent to DM3.2bn, and printing and manufacturing, up 7.5 per cent to DM2.6bn. Investments 1989-90 were down from DM687m to DM588m. Debt was down from DM1.10bn to

DM593m, and the equity ratio has risen to 26.1 per cent.

The pay-out to holders of profit-sharing certificates should be 15 per cent, the same as last year. The majority of voting shares are held by Bertelsmann Foundation. its book clubs - part of the

BTR shares fall on interim result

By David Owen in London

SHARES OF BTR lost more than 11 per cent of their value yesterday as the UK-based industrial conglomerate submitted an uncharacteristically mediocre set of interim results.

The shares slid 40p to 318p as the market disregarded chief executive Mr John Cabill's assertion that the figures constituted "a BTR classical performance." Since Saint-Gobain of France topped BTR's hostile \$1.64bn bid for Massachusetts-based Norton

on April 25, the thwarted suitor's market capitalisation has dropped by about a quarter. Pre-tax profits for the group, whose products include Pretty Polly hosiery. Schlegel automotive seals and BAE baggage handling equipment, advanced to £530m (\$996.4m) from £497m in the first balf of 1989 - an improvement of 6.6 per cent.

This followed a switch to the use of average exchange rates, as opposed to period-end rates, for translating the results of overseas operations. Without this change, taxable profit would have totalled only £516m, against £513m as originally reported a year earlier. First-half sales edged ahead by

2.5 per cent to £3.47bn (£3.39bn). According to Mr Christopher Bull, finance director, the gain was entirely due to acquisitions.

Looking ahead, Mr Cahill predicted that the group would "outperform its peers and continue to perform well when others falter." Difficult markets have historically created good acquisition opportunities for BTR," he said, suggesting that the current

downturn was "more broadly based" than its early 1980s counterpart. "We expect the same result from this downturn, but not just yet. Prices of businesses will continue to soften." While yesterday's figures were less than sparkling in other respects, the group did succeed in

increasing its return on sales to 17.4 per cent from 16.4 per cent last time. Lex. Page 18

INTERNATIONAL COMPANIES AND FINANCE

Parfinance in one-off surge to FFr949m

PARFINANCE, the French holding company, announced yesterday that first-half unconsolidated net profit soared to FFr949m (US\$178m) from FFrillm in the same period

last year, AP-DJ reports.
The unit of Swiss-based Pargesa Holding said that the surge was spearheaded by a one-off, after-tax gain FFr789m from previously

reported asset sales.

The disposals included Pargesa's 28 per cent stake in Paribas Suisse to Financière de Paribas in April for an undis-closed sum that analysts estimated at close to SFr300m. Parfinance noted that

"because of disposals made after June 30 1990 the amount of long-term capital gains that can be expected for the full year is significantly higher." Parfinance also announced

that its chairman, Mr Gérard Eskénazi, stepped down at a board meeting on September Mr Eskénazi's resignation had been widely anticipated after disagreements about strategy with the group's two other main shareholders, Belgian financier Mr Albert Frère and Canadian financier Mr Paul Desmarais.

FINANCIAL TIMES

BAe 1% earnings drop lifts shares

By Paul Betts, Aerospace Correspondent, in London

BRITISH Aerospace yesterday reported a 1 per cent fall in pre-tax profits to £146m (\$270.1m) for the first half of this year. It also expressed confidence that profits for the full year would show "comfortable" growth over 1989 levels.

The first-half earnings were driven by strong growth in BAe's military and civil aircraft operations and were at the top end of City expecta-

BAe share prices rose 17 pence at one stage yesterday in response to the results, before slipping back to close 11p higher at 563p on the day.

Professor Roland Smith, BAe's chairman, said he expected BAe's pre-tax earnings this year to be "comfortably ahead" of the £333m profits reported in 1989. City analysts are estimating pre-tax profits in the range of £370m-£385m for the year. First-half earnings included a £24m exceptional charge reflecting the costs of the engineering strikes that hit the company earlier this year. Excluding exceptional items, pre-tax profits were 83 per cent higher at £170m compared with first-half pre-tax profits, excluding special items, of £113m

Trading profit increased by 36 per cent to £234m from £172m in the first half, while sales rose 20 per cent to £4.79bn against £4bn. Defence remained the big-

gest contributor to earnings, with trading profits of £177m compared with £106m in the first half last year. The group is benefiting from the matur-ing of the Hawk and Tornado military aircraft programmes and from growth in military

Mr Dick Evans, BAe's chief executive, said the company expected potential sales of £16bn to £20bn over the life of contract between now and 1999. That assessment, made before the Gulf crisis began, could clearly be affected by the situation in the Middle East, Mr Evans pointed out.

The group's commercial aircraft operations now represented the biggest and fastest growing sector of BAe's busi-nesses, he added. These activities showed a £15m trading profit in the first half. Mr Evans said the group was

encouraged by the progress of the financial situation at Airbus, the European aircraft con-sortium in which BAe holds a 20 per cent interest. Trading profits at BAe's Rover Group car subsidiary fell 26.7 per cent in the first half to

£33m compared with £45m the year before. The decline reflected a large fall in profit from associated companies following the disposal of the car group's stake in Istel, the computer software company, and part of its 40 per cent stake in Daf, the Dutch commercial vehicles maker. Trading profit in BAe's prop-

erty development and construction activities fell to £9m in the first half from £13m in the same period last year. Space systems and communica tions showed a £3m loss in the first half compared with a £4m profit the year before.

Mr Evans confirmed the con-

tinuing rationalisation of BAe plants, implying further clo-

Both Professor Smith and Mr Evans emphasised the group was seeking to expand its operations in the US and was pursuing an active policy of international collaboration.

Per share earnings after exceptional items totalled 35.6p against 35.7p and 41.2p from 22.5p excluding these special items. The company is increasing the interim dividend by 10 per cent to 8.9p per share.

South Africa publishes takeover regulations

By Philip Gawith in Johannesburg

SOUTH AFRICA this week published regulations govern-ing takeovers and mergers which will bring the country's financial markets more into

line with overseas practice.

The regulations are published in terms of the Securi-ties Regulation Code on Takeovers and Mergers, which was drafted by the newly-formed Securities Regulation Panel. chaired by Mr Justice Cecil

The Government Gazette says the code is "based to a large extent" on the similar code which governs such dealings in the UK.

Grolsch sales up 9%

as profits hit FI 10m

GROLSCH, the Dutch brewer,

said its net profits in the first half of the year rose by 13 per

cent to Fi 10.4m (US\$5.8m) from the year-earlier level of

Thanks to a larger market share in the Netherlands and

increased exports, sales rose

9.2 per cent to Fl 214.5m from Fl 196.4m. However, Grolsch warned that growth in net profits would slow in the sec-

and half of the year because of

F19.2m, AP-DJ reports.

Previously a lack of regulation and clarity, especially con-cerning what constitutes control, has allowed predators to build up large stakes in compa-nies without having to make an offer to minorities. The draft rules will operate "principally to ensure fair and

equal treatment" of all holders

of relevant securities involved in a takeover or merger and lay down under what condiions an offer must be made. In terms of the gazette's definition, a level of 30 per cent or more of the voting rights of a target company will constitute control. Thus, as with the UK's

SOCIETE Française

Petroles (BP France) said that

its consolidated net profit after payments to minority interests for the first half of 1990 fell to

FFr186m (US\$35m) from

FFr725m a year earlier, AP-DJ

Petroleum said the sharp decline chiefly reflected a FFr354m writedown in the

value of its stocks of crude oil

and petroleum products.

The writedown was made to

The rules are now open for comment for a period of a month after which a final draft will be gazetted. The Minister of Trade and Industry's approval is required before they come into effect.

BP France tumbles after writedown the company's distribution activities due to strong competition.

Revenue from the oil business rose to FFr7.37bn from FFr7.07bn in the first half of BP France said it had

recorded a gain of FF7645m from the sale of its French exploration and production activities to Societé Nationale Elf Aquitaine, but it said that this will show up in its second-half accounts.

takes 3% of **Parmalat** key holding

ERIDANIA Zuccherifici Nazionali, an agri-industrial subsidiary of Italy's Ferruzzi Group, has taken a 3 per cent stake in what will become the main holding of the Parmalat food group, Parmalat announced yesterday, AP-DJ

At the same time, an international consortium of investors has jointly taken an addi-tional 3 per cent shareholding under a financial restructuring plan to re-launch the Parma-based dairy products manufacturer.

Terms of the acquisition

were not immediately dis-

The international investors include Charterhouse European Managers, the Charter-house investment bank, the investment arm of the Royal Bank of Scotland and the European Special Situation Fund of Botts & Co, Parmalat said in a statement.

The international placement is being co-ordinated by Morgan Stanley. The object of Eridania's

acquisition. Finanziaria Centro Nord (FCN), is in the process of becoming the main financial holding of Parmalat. Under a complex financial restructuring announced in July, FCN will increase its control of Parmalat to more than 75 per cent from 20 per cent through a L583bm (US\$494m) capital increase. FCN, which is listed on the Milan stock market, will be renamed Parmalat Finanziaria.

Eridania, which registered consolidated net earnings of L298hn on sales of L8,900bn in 1989, produces sugar, starches, oils, proteins and animal fodder.

The restructuring operation is being managed by Milanbased merchant bank Akros, which took a 5 per cent stake in FCN in July.

Eridania, Charterhouse and
Botts & Co will all have a rep-

resentative on FCN's board of directors, the statement

In the first six months, Parmalat registered operating profit of L87bn, up 24.9 per cent from L53.7bn at the end of June last year. First-half sales totalled IA69bn, up 17.4

| Ferruzzi arm | Renault entourage visits Prague to try to win Skoda deal

By Kevin Done in London and William Dawkins in Paris

RENAULT, the French state-owned car maker, is stepping up its campaign to buy a stake in Skoda of Czechoslovakia, the most advanced east-ern European car maker, in a battle against Volkswagen of

West Germany. Mr Raymond Lévy, Renault chairman and chief executive, starts a two-day visit to Prague today as part of a powerful French delegation led by Presiient François Mitterrand and five Government ministers, including Mr Roland Dumas, in charge of Foreign Affairs, and Mr Roger Fauroux, responsible for industry.

The French delegation also

includes the chairmen of other large French companies including Bull, the computer maker, and the Crédit Lyonnais bank. Mr Lévy will be accompanied in Prague by Mr Pehr Gyllenhammar, chairman and chief executive of Volvo, the Swed-ish car and truck maker, which is entering into a far-reaching alliance with the French

group.
Under the terms of the Renault/Volvo arrangement, which is expected to be finalised this autumn, the two companies have the right to veto each other entering into alliances with other vehicle makers. "Renault is interested in

Skoda. Volvo wili soon own 25 per cent of Renault's car operations so it is natural that we are part of the negotiations," said a Volvo representa-

Renault and VW have emerged as the chief rivals to enter a deal with Skoda, which is seeking a joint venture partner to inject finance and tech-

nology. Skoda, which produced 183,000 cars last year, has been one of the main targets for western car makers seeking an entry into eastern Europe. A decision on the deal is expected from the Czechoslo-

vak Government in October. Mr Zdenek Patocka, Skoda deputy general manager, who is leading the joint venture negotiations, said earlier this year that Skoda would prefer to keep majority control of any joint venture and that it was keen to maintain the Skoda

marque.
"We would prefer initially not to lose control, and we want to keep the brand name. There is no final decision, however, and it could be possible for the state to give up major-ity control," he said.

Of Skoda's output of 183,000 cars last year, some 50,000 were exported to western markets, led by the UK with 13,600.

Beijer takes 49% interest in French bar-code concern

By Robert Taylor in Stockholm

BELJER INDUSTRIES, the Swedish industrial group controlled by the financier Anders Wall, announced yesterday that it had taken a 49 per cent stake in Barcode International, a company based in Paris, for an undisclosed price. Barcode, a leading producer

of bar-code scanners and systems in Europe, has annual sales of about SKr180m (\$31m). Half its sales are outside France, mainly in the US. Beljer's involvement with Barcode strengthens the Swedish group's interest in bar-code manufacturing. It is already the sole owner of Atech, based in Gothenburg, which is a lead-

group, said it would soon carry out its offer to buy the outstanding 15 per cent shares of Feldmühle Nobel, Reuter reports.
Mr Bo Berggren, chief execu-

tive, said Stora would offer DM504 per share. On Wednes-day Feldmühle shares closed up DM4 at DM506.

JOINT COMPANY ANNOUNCEMENT

ANGLO AMERICAN CORPORATION OF SOUTH AFRICA LIMITED (AAC) (Registration No. 01 05309 06)

ANGLO AMERICAN GOLD INVESTMENT COMPANY LIMITED (Amgold)

VAAL REEFS EXPLORATION AND MINING COMPANY LIMITED (Vaal Reefs) (Registration No. 05 17354 86)
(all of which are incorporated in the Republic of South Africa)

MOAB AREA - PROPOSED EXTENSION TO VAAL REEFS MINING LEASE AREA On 9 February 1990 application was made for mining leases over the Moab area which amounts to some 2 149 hectares. Interests in the rights over this area are held principally by AAC and its associates.

The Minister of Mineral and Energy Affairs has agreed to grant mining leases over the area, which is contiguous to Vaal Reefs, to be mined as an extension to the Vaal Reefs lease area. In accordance with the application the approval is subject to the mining leases being ceded, firstly to a company to be formed and thereafter to Vaal Reefs.

As previously announced the shaft will, for technical reasons, be situated within the existing Vaal Reefs lease area. As part of an ongoing process of optimising returns and to take account of changing economic circumstances, the mining plan and capital scheduling of the project are being reviewed. Following completion of these exercises, the terms of the arrangements between the holders of the mining leases and Vaal Reefs, the method of funding the project and details of the company to be formed will be finalised and announced and the required cessions of the mining leases will be registered.

To the Holders of WARRANTS OF

SMK CORPORATION

Pursuant to Clause 4(A) of the Instrument dated 9th November, 1988, under which the above described Warrants were issued, you are hereby notified that a free distribution of shares of the Company at the rate of 0.05 share for each one share held will be made to shareholders of record as of 30th September, 1990 (Japan Time). As a result of such distribution, the Subscription Price at which shares are issuable upon exercise of the Warrants will be adjusted pursuant to Condition 7 of the Warrants from 744.00 Japanese Yen to 708.60 Japanese Yen effective as of 1st October, 1990 (Japan Time).

COMPANY ANNOUNCEMENT

ANGLO AMERICAN GOLD INVESTMENT COMPANY LIMITED ('Amgold') (incorporated in the Republic of South Registration No. 05 09084 06

PROPOSED RIGHTS OFFER TO MEMBERS The directors of Amgold announce that they intend reco to members that the company undertakes a rights offer of shares to raise approximately R500 million.

The directors consider that the company requires this injection of new capital to take advantage of attractive investment opportunities under consideration. This confirms their confidence in, and long-term commitment to, the gold mining industry. Part of the capital so raised will be used initially to repay the company's short-term borrowing.

As a first step it will be necessary to convene a general meeting of members to convert the company's unissued redeemable cumulative preference shares into S ordinary shares. However, experience has shown that S ordinary shares are not freely traded and accordingly those S ordinary shares which are subscribed for by persons other than Anglo American Corporation of South Africa Limited (AAC) will then be exchanged for ordinary shares in Amgold held by AAC at no additional cost to such persons. It is intended that a circular in this regard will be despatched to shareholders on 28 September 1990, convening a general meeting of the company for 22 October 1990. Subject to the necessary approvals of shareholders at this meeting the following will be the salient dates for the rights offer:

Rights offer terms released Last day to register for rights offer Rights offer opens Renounceable letters of allocation posted Rights offer closes

Friday 26 October Priday 2 November Friday 2 November Friday 23 November

Should there be any changes to the above mentioned dates an announcement to this effect will be published in the press. announcement to this effect will be published in the press. The offer will not be registered with the Securities and Exchange Commission, Washington D.C. or the Securities Commission of Canada, and accordingly the offer will not be made to, or be open for acceptance by, persons with registered addresses in the United States of America or any of its territories or in Canada. The rights which are therefore not available for acceptance by such members will, if possible, be sold on The International Stock Exchange in London or The Johannesburg Stock Exchange through an independent merchant bank for the account of such members. Details of the arrangements in this regard will be sent to members with registered addresses in the United States of America or any of its territories or in Canada.

Aoki ends talks over Swissair's hotels arm

By William Dullforce in Geneva

AOKI Corporation of Japan has broken off negotiations for the purchase of Swissair's hotel interests

The airline group announced yesterday that its subsidiary, Swissair Associated Companies, and Aoki had agreed on Tuesday not to proceed with the sale of Swissotel "in world of recent uncertainty in world of recent uncertainty in world financial market conditions."

d Conce

San Train

An important factor in Aoki's decision is understood to have been the depreciation of the yen against the Swiss franc since the price was agreed in a letter of intent signed in March. Another is the drop in the Aoki share price in Tokyo.

The purchase price was not

disclosed but analysts esti-mated that Aoki must have agreed to pay at least SFr500m (US\$383m) for Swissotel, which holds interests in 12 hotels worldwide and has management contracts for a

Among the hotels outside Switzerland wholly or par-tially owned by Swissôtel are the Drake in New York, the Lafayette in Boston, three Swiss Grand hotels in Chicago, Atlanta and Seoul and the Bosphorus Swissotel in

The talks had been protracted because of the complex nature of a transaction covering 28 companies in various jurisdictions and the application of US contract principles, Swissair said.

Aoki, a Japanese construction company with a large international business, owns Westin Hotels and Resorts which operates 67 hotels in 11 countries, mainly in north and central America and in the Far East. It owns a further nine under the Caesar Park

Swissair said it was keeping open all options for its hotel interests. The options included the sale of the whole or parts of Swissôtel or the finding of a partner.

News of the collapse of the sale comes at a bed time for Swissair. The airline reported a pre-tax loss of SFr99m for the first six months of the

FAI posts 70% drop in earnings

FAI Insurances, the Australian insurance and investment group, has suffered a big underwriting loss in the year to June, savagely cutting group earnings and eating into shareholders' funds.

The company, which has been struggling in recent years to extricate itself from exposure to some of Australia's biggest corporate collapses, reported net profits down 69.6 per cent to A\$18.24m (US\$15m) from ASSOm

Mr Rodney Adler, the company's chief executive, said the

results reflected one of the worst years for general insur-ers, exacerbated by high inter-est rates and the stock market malalse. "Our general insurance oper-

ation incurred an underwriting loss of A572.3m primarily as a result of the extremely bad weather conditions on the east coast of Australia, including such disasters as the Newcas tle earthquake," he said. Mr Adler said premium income had increased by 17.8 per cent to A\$635.1m and provision for outstanding claims

cent to A\$710.8m. FAI's figures disclosed that shareholders' funds fell from A\$532.5m to A\$514.9m in the year, which Mr Adler said reflected a downward revaluation of the company's property

The company is dipping into reserves to maintain yearly dividend at 9 cents a share, but the payout will reduce from A\$31.3m to A\$20.5m because of a 5 cent special dividend paid last year.

The result contained no

had been raised by 13.6 per abnormal or extraordinary items and the company held its interest bill almost steady at A\$58.6m in the year. Depreciation took A\$14,7m against A\$7.8m previously and tax of A\$16.2m compared with

 National Commercial Union, another large Australian general insurer, crashed into the red in the year to June, turning a A\$20.6m net profit into a A\$27.8m deficit. Directors disclosed an underwriting loss of A\$105m, reflecting natural disasters.

Adsteam rise checked by Bell stake write-off

By Bruce Jacques in Sydney

THE TWO companies at the top of the complex corporate structure run by the Sydney-based entrepreneur, Mr John Steamship Company and David Jones – have reported net earnings increases for the year

to June. However, Adelaide Steamship (Adsteam) was held to a 10 per cent rise in net earnings, to A\$220.3m (US\$179.1m) from A\$200.9m, by another write-off of its holding in Bell Resources, formally controlled

by Mr Alan Bond. . Adsteam has made A\$A50m provision against the fall in value of Bell Resources shares, bringing total provisions to A\$80m on the company's total A\$188m investment.

That brings the book value of charge in Bell Resources. of shares in Bell Resources,

which is trying to buy the

Bond brewing interests in part-nership with the Lion Nathan group of New Zealand, to 98 cents a share.

That compares with a market price of just 27 cents, but Mr Spalvins said yesterday he was confident that the value of the shares could be restored over time. The write-down meant yearly dividend had to be cut from A\$1 to 61 cents a share, but payout will still rise on bonus-increased capital.

Mr Spalvins said the main source of income and cash flow was the dividend stream from associated companies - David

Jones, Petersville Sleigh, Tooth

& Co and National Consoli-

He said the Australian Tax Office had claimed A\$28.8m of interest and penalties from the company, but legal advice suggested the claim could be

dated.

defended. Consequently, no provision was included in Adsteam's stated tax bill of A\$13.8m against A\$38.8m previ-

The result also reflected a

jump in the company's interest expense to A\$122.4m from A\$75.1m. Total revenues rose to A\$1.47bn from A\$994m. David Jones, the group's department store and investment arm, reported a 38 per cent advance in net earnings to A\$253.4m from A\$183.6m,

achieved on a sales rise of just 2.4 per cent to A\$1.3bn. Directors said retail margins were maintained, but the result included an unspecified contribution from sale of the large group holding in leading Australian bank shares.

As with other parts of Mr Spalvins' empire, David Jones was restructured during the year, especially following the takeover of Industrial Equity, the former corporate raider, which controlled Woolworths, Australia's second largest volume retailer.

"As a result of the investment in Industrial Equity, and the substantial reduction in passive investments in insurance and banking stocks, David Jones' future profitabil-ity will be significantly related to the retail sector," the directors said.

"The direct and indirect investment in Woolworths will result in David Jones being entitled to approximately 72 per cent of Woolworths' profit."

The David Jones result was after tax earnings of A\$26m against a A\$38.5m benefit previously. There were again no

Telekom Malaysia flotation to proceed

By Lim Slong Hoon in Kuala Lumpur

TELEKOM Malaysia, the state-owned telecommunica-tions monopoly, yesterday dismissed speculation that it would postpone its privatisa-tion flotation later this year, saying it would go ahead with the plan in spite of market jit-ters about the Gulf crisis.

In the formal announcement to float 25 per cent of its share capital to raise M\$2.5bn (U\$\$930m), Telekom also unveiled its 1989 results and forecasts for 1990 and 1991. Profits for 1989 advanced by

103 per cent to M\$366m from 1988's M\$180m. All profits are year.

It has called in McKinsey.
It has consulting group, to help it overhand its organisation and trim costs.

It has called in McKinsey.

It has consulting group, to help it overhand its organisation and trim costs.

It has called in McKinsey.

It has

the group expects profits for the whole of the year to come to M\$500m, with those for 1991 Telekom attributed the 1989

growth to an aggressive sales policy and a trimming of operating expenses to M\$941m from There has been market spec-

ulation that the flotation would be put off by Telekom because the composite indices on the Kuala Lumpur Stock Exchange have lost 16 per cent since the Iraqi invasion of Kuwait last month.

One concern was over the

believed the domestic economy to be fundamentally strong. He also said that he thought the response to the issue would be

positive.
Telekom is issuing 500m shares - 470.5m in October and the balance later - under an option scheme for company executives. The group withheld details about the distribution of shares, all of which will go to local investors.

The Government, which is to retain a majority shareholding, has agreed to consider foreign equity partnership but has yet to announce its decision.

If the foreign companies suc-ceed, they will probably have to pay a premium over the issue price to the Malaysian public of M\$5 a share and net tangible assets per share of

The group's 28,000 employees are promised a 5 per cent stake, or 100m shares, in line with government policy. Domestic state-operated institutions are likely to pick up about half the issue. Telekom plans to use

M\$1.8bn of the proceeds to pre-pay part of its debt, which totalled M\$4bn last December. Most of it is owed to the Government. The M\$1.7bn balance will serve as working capital The group's had assets last

NEWS IN BRIEF

■ Mitsubishi Bank, a leading Japanese city bank, may sell stock in its San Francisco sub-sidiary to belp meet interna-tional capital ratio rules, Reuter reports from Tokyo.

Mitsubishi is considering a

private placement of shares in Bank of California, which it bought in 1984 for \$284m, but details have not been decided.

Hysan Development, the Hong Kong property developer, yesterday posted a 20 per cent rise in first half net profits to HK\$271m (US\$34.9m) from HK\$225m previously, AP-DJ

reports from Hong Kong.
Earnings per share climbed
21 per cent to 6.26 cents from
5.19 cents, while turnover increased 16 per cent to HK\$453m from HK\$389m.

■ Renong, a small loss-stricken Malaysian group, has won shareholder approval to take over prime assets linked to Umno, Malaysia's ruling political party, amounting to M\$1.23bn (US\$456.6m), in the country's largest corporate deal, Reuter reports from Kuala Lumpur.

"Everything [all resolutions] was approved unanimously," Mr Aminuddin Yusof Lana, a Renong director said.

■ Poseidon Gold, the gold min-ing unit of Poseidon, the Aus-tralian resources group, is to offer about 42m of its shares at A\$2.40 each to fund its purchase of a 19.99 per cent stake in Newmont Australia from Newmont Mining of the US, Reuter reports from Sydney.

The issue is expected to raise A\$100m (US\$81.6m). The shares will be placed with institutions and investors, with no single investor holding more than 7 per cent of expanded capital.

■ Asiana , Airlines, South Korea's second civil air carrier, is to set up with Scandinavian Airlines System (SAS) an in-flight catering service joint venture company, AP-DJ reports from Secul.

Notice of an Adjourned Meeting of the Holders of

Bond Finance International (the "issuer")

U.S. \$200,000,000 5% per cent.

Guaranteed Subordinated Convertible Bonds due 1997 Unconditionally guaranteed on a subordinated basis by, with non-detachable subordinated conversion bonds issued by and with conversion rights into Ordinary Shares of,

Bond Corporation Holdings Limited

(the "Guarantor")

NOTICE IS HEREBY GIVEN that an adjourned Meeting of the holders (the "Bondholders") of the above-mentioned Bonds (the "Bonds") and conversion bonds constituted by a Trust Deed dated 9th July, 1987 (the "Trust Deed") and made between the Issuer, the Guerantor and Bankers Trustee Company Limited (the "Trustee") will be held at 12.00 noon (London time) on 27th September, 1990 at 1 Northumpherland Avenue, Tratalger Square, London WC2N 58W for the purpose of considering and, if thought fit, passing the following Extraordinary Resolution which was the subject of a Notice of Meeting dated 17th August, 1990 published in this newspaper on that date and which gave notice of a Meeting of Bondholders to be held on 10th September, 1990. At the Meeting of Bondholders held on 10th September, a quorum, was not present and the Meeting stood adjourned to the time and place mentioned above, as designated by the Chairman of the Meeting and approved by the Trustee:—

was not present and the Meeting and approved by the Trustee:
EXTRACRDINARY RESOLUTION

THAT this meeting of the holders of the U.S. \$200,000,000 5% per cent. Guaranteed Subordinated Convertible Bonds due 1997 (the "Bonds") of Bond Financa International (the "Issuer"), unconditionally guaranteed on a subordinated basis by, with non-detachable subordinated conversion bonds (the "Conversion Bonds") issued by and with conversion rights into Ordinary Shares of, Bond Corporation Holdings Limited (the "Guarantor"), constituted by a Trust Deed (the "Itust Deed") dated 9th July, 1987 and made between the Issuer, the Guarantor and Bankers Trustee Company Limited (the "Itustiee"), hereby:
(I) waives and authorises any breach or proposed breach by the issuer or the Guarantor of the covenant by the Guarantor contained in Clause 11(C) (iii) of the Trust Deed that may arise as a result of the sale by the Guarantor of 50 per cent. of the issued ordinary share capital and all of the issuer or share capital of Bond Brewing Holdings Limited ("BBH") to Manchar Holdings Pty. Ltd., a wholly owned subsidiary of 8elf Resources Limited, on the terms more particularly set out in the Information Memorandum dated 17th August, 1990 prepared by the Guarantor and produced to this Meeting (a copy of which has been initiated for Identification by the Chairman of the Meeting; (or such terms as from time to time modified or amended (including by way of novation to a different purchaser of the agreement relating to such sale) provided that the Guarantor shall have procured that its auditors for the time being shall have certified to the Trustee in form and manner seeptable to the Trustee that any such modification or amendment or novation shall have no greater Impact on then the terms of the proposed sale more particularly described in the Information Memorandum and shall not include any material change in the purchase price of such sale);

(ii) sanctions every abrogation, modification, variation, compromise or arrangement in respect of the r

Guerantor involved in or resulting from the breach or proposal breach reterred to in paragraph (i) of this Resolution; and

(iii) authorises the Issuer, the Guerantor and the Trustee to concur in, execute or do any document, act or thing necessary to give effect to this Extraordinary Resolution and authorises the Trustee to provide any formal consent or approval necessary to enable the sale as referred to in (i) above to proceed.

Copies of the information memorandum (the "information Memorandum") referred to in the Extraordinary Resolution act at above and which sets out details of the background to, and reasons for, the proposed arrangements and the Extraordinary Resolution are available for collection by Bondholders at the specified offices of the Paying Agents for the Bonds set out below and will be available at the adjourned Meeting itself. A Bondholder will be required to produce evidence satisfactory to the relevant Paying Agent as to his status as a Bondholder before being permitted to collect a copy of the Information Memorandum from the offices of that Paying Agent.

The attention of Bondholders is particularly drewn to the quorum required for the adjourned Meeting which is set out in paragraph 2 of "Voting and Quorum" below.

In accordance with normal practice the Trustee expresses no opinion on the ments of the proposed arrangements. The Issuer expects to convene another meeting of Bondholders to take place at some time prior to 30th November, 1990 at which meeting the Guerantor would expect to be able to present to Bondholders in the usual way.

VOTING AND QUORUM

which meeting the Guarantor would expect to be able to present to Bondholders reconstruction proposals for onsideration by Bondholders. Notice convening such meeting will be given to Bondholders in the usual way.

A Bondholder wishing to attend and vote at the adjourned Meeting in person must produce at the adjourned Meeting either his Bond(s), or, in the case of Bonds issued in bearer form ("Bearier Bonds"), a valid voting certificate or valid voting certificate issued by a Paying Agent relative to the Bearier Bond(s), in respect of which he wishes to vote.

A holder of Bearer Bonds not wishing to attend and vote at the adjourned Meeting in person may either deliver his Bearer Bond(s) or voting certificate(s) to or arrange with the Principal Paying Agent for his voting certificate(s) to be collected by the person whom he wishes to attend on his behalf or give a voting instruction (on a voting instruction form obtainable from the specified office of any of the Paying Agents out below) instructing a Paying Agent to appoint a proxy to attend and vote at the adjourned Meeting in accordance with his instructions.

Bearer Bonds may be deposited until the time being 48 hours before the time fixed for holding the adjourned Meeting (or, if applicable, any further adjournment of such adjourned Meeting) out not thereafter with any Paying Agent or (to the satisfaction of the Paying Agent) held to its order or under its control by the Operator of the Euroclear System or by CEDEL, S.A. or any other person approved by it, for the purpose of obtaining voting certificates or appointing proxies in respect of the adjourned Meeting, Bonds so deposited or held will not be released until the earlier of the conclusion of the adjourned Meeting, Bonds so deposited or held will not be released until the earlier of the conclusion of the adjourned Meeting (or, if applicable, any further adjournment of such adjourned Meeting) is convened, the voting instruction receipting) issued in respect thereof.

A holder of Bonds in registered form (

governing body in the English language authorise any person to act as its representative in contraction with adjourned Meeting.

Any voting certificate(s) issued, any voting instruction(s) given and any appointment(s) of a proxy made pursuant thereto and any appointments(s) of a proxy or representative in respect of Registered Bonds, for the Meeting of Bondholders convened for 10th September, 1990, will be valid for the adjourned Meeting unless, in the case of voting certificates, surrended not less than 48 hours before, or in the case of appointment of proxies in respect of Registered Bonds revoked or amended not less than 24 hours before, or in the case of appointment of proxies in respect of Registered Bonds revoked or amended not less than 24 hours before, the time for which the adjourned Meeting is convened.

The quorum required at the adjourned Meeting for passing the Extraordinary Resolution (the "Resolution") set out above is two or more persons present holding Bonds or voting certificates or being proxies or representatives (whatever the principal amount of the Bonds so held or represented by them).

Every question submitted to the adjourned Meeting will be decided on a show of hands unless a poll is duly demanded by the Chairman of the adjourned Meeting or the Issuer or by two or more persons present holding Bonds or voting certificates or being proxies or representatives and holding or representing in the aggregate not less than one-liftieith part of the principal amount of the Bonds then outstanding. On a show of hands every person who is so present shall have one vote in respect of each U.S. \$1,000 in principal amount of the Bonds so produced or representative is a proxy or representative.

amount of the country of the property of the property of the passed, the Resolution requires a majority in favour consisting of not less than three-fourths of the votes cast thereon. If passed, the Resolution will be binding upon all the Bondholders, whether or not present at the adjourned Meeting and whether or not voting, and upon all the holders of coupons relating to the Bonds.

AVAILABILITY OF DOCUMENTS Copies of the Trust Deed may be inspected, and copies of the Information Memorandum, voting certificates and other documents referred to above may be obtained, by Bondholders from the specified office of any of the Paying Agents . given below.

INTERNATIONAL COMPANIES AND FINANCE

Salomon Ecolab forms European agrees to joint venture with Henkel pay \$84m state claim

By Nikki Tait SALOMON BROTHERS, the SALOMON BROTHERS, the Wall Street investment house, amounced on Tuesday it had agreed in principle to make a \$83.75m payment to the US Department of Energy.

The payment represents a settlement of certain claims by the DoE sessing Salomon con-

sexterment of certain Games by the DoE against Salomon con-cerning the alleged violation of crude oil pricing rules more

than 10 years ago.

The government agency claims had centred on some crude oil transactions entered into by Philbro, an oil and energy commodity trading

basiness, in the late 1970s.
This was shortly before the company combined with Salomon in 1981. The "mandatory crude oil price and allocation regulations" have since been revolved.

Nevertheless, in 1988, the DoE began proceedings against Salomon, originally seeking a payment of \$311m - the sum of \$108m plus inter-

Stock Exchange on Tuesday sought permission of the bankruptcy courts to bring disci-plinary proceedings against Drexel Burham Lambert, the Government officials have indicated they will accept a new proposal from Clelos del Sur, the consortium formed by Iberia, the Spanish airline, and Austral, a domestic Argentine Drexei Burnam Lambert, the US investment bank which filed for bankruptcy in Febru-ary and which has pleaded guilty to securities law viola-

The NYSE says that it wants to impose a large fine of around \$25m each for the Drexel parent company and the brokerage unit. But under US law, it cannot do so without the bankruptcy court's amproval \$130m in cash, rather than with a letter of credit, as it had promised not to finance the Aerolineas aircraft.

By Nikki Talt in New York

ECOLAB, the US cleaning and maintenance group, yesterday announced that it was pooling its European interests with those of Henkel in a deal which would give the West German company a 19 per cent stake in Ecolab and boardroom repre-

Both companies will have a 50 per cent interest in the joint venture business, whose sales should total about \$750m -\$600m coming from the Henkel interests and about \$150m from Ecolab's - and employ some 3,500 staff.

The venture will be based in Dusseldorf.
Ecolah, based in Minnesota, is also buying Henkel's remain-

NYSE approves moves Canadian on after-hours trading

By Karen Zagor in New York

THE New York Stock Exchange has moved a step nearer trading outside its nor-mal hours when its board approved two stages of a five-phase plan to develop out-of-hours trading.

The plan to conduct after-

hours trading, which was con-firmed in June, was spurred by the growing desire by investors to do business around the clock, and by increasingly com-petitive pressures from over-seas and US regional

seas and US regional exchanges. At present, some NYSE listed issues trade afterhours, but not on the NYSE. Mr Richard Grasso, NYSE president and chief operating trading plan reflects the NYSE's commitment to provide innovative services for its customers and position the exchange competitively in the evolution of a 24-hour market

The board also approved a plan to trade unregistered securities under the Securities

mine to be developed By Robert Gibbens

in Montreal

FOUR companies have agreed to allow the rich Louvicourt copper-zinc-silver-gold property in north-western Quebec to be developed to production.

Aur, a small gold producer, will own about 55 per cent of the property, develop and oper-ate the mine. The company, 21 per cent-owned by Teck and Cominco, originally held 50 per cent of Louvicourt, and Louvem Mines, an exploration company 22 per cent-held by Noranda, the other half.

A dispute over ownership arose two years ago when Aur claimed Louvem had failed to pay its full share of exploration

Now Aur, Louvem, Noranda and another company which controls Louvem have agreed to end all litigation and allow a development of the mine.

Louvem will have 45 per cent ownership and Noranda will manage this interest. Noranda will also take most of the mine's concentrates for processing in its modernised

smelter nearby.

Aur is still drilling the Lon-vicourt ore-body, which has an estimated value so far of about C\$500m (US\$431m). A downward extension of the high grade ore has proved elusive despite geophysical evidence.

Nissan expects flat US sales

NISSAN Motor expects its US vehicle sales to be essentially flat in 1991 compared with 1990 due to strained production capacity, a top executive said, Reuter reports.

Mr Robert Thomas, vice president in charge of the Nissan US sales division, said the second-largest Japanese vehicle maker projected 1991 sales of about 615,000 cars and tracks. This figure company trucks. This figure compares with 600,000 vehicles expected to be sold in the US this year and about 655,000 sold in

"Our sales decline has been based on a decline in availabil-ity of vehicles, mainly from Japan," Mr Thomas said.

notes to yield 13.017 per cent from 9.66 per cent because of industry which have led to downgradings of the credit ratings of several leading

There was still no sign of any change in monetary policy yesterday, with the US Federal Reserve refraining from operating in the money

Traders are now turning their attention towards tomorrow's clutch of economic data, most notably the August producer prices index.
This is expected to show a large jump because of the surge in energy prices during the month.

The median forecast is for a gain of 1.3 per cent with nearly all this rise accounted for by

NVOLATILE afternoon trading in Tokyo saw Japanese government bonds testing the year's lows before recovering ground to end significantly higher. The benchmark No 119 issue

reached a yield of 8.40 per cent in the morning session after opening at 8.36 per cent. However, resistance at that level was carried through into the afternoon and the 119 ended the day at 8.26 per cent. Activity in the futures market mirrored this pattern, with the December futures contract reaching a low of 87.93 before rallying strongly to close at 88.64, up from Tuesday's close of 88.16.

However, dealers commented that the rebound from the low point was largely based on a "short squeeze," as traders

By 12 Strain South Strain Stra

date for debt-equity swap auction

By Alan Robinson in Mexico City

THE MEXICAN Finance Ministry has announced that its second debt-equity swap auction in 1990 will be held on

The announcement in the Government's Official Daily (Diario Oficial) said the intersecretarial technical committee would auction \$1.5bn in public sector debt, but "reserves the right to increase that amount."
Finance officials declined to

comment on speculation that the amount could be increased to wipe out the \$2.5bn remaining from the \$3.5bn limit over 3% years, fixed in the agreemercial creditors last March.

Given the success of the first auction of \$1bn in public sec-tor debt last July, officials are inclined to refer to the agree-ment rather wistfully. "That \$3.5bn is far from exhausting the possibilities," one top offi-cial said. "We could really sell the farm."

One of the main aims of the October auction will be to reduce the liabilities of Mexico's commercial banks, finance officials said, to make them more attractive to potential buyers.

The coming sale of state-owned steel plants Altos Hor-nos and Sicartsa is also likely to attract bids. Bids will be accepted in

Mexico until October 8 and in New York until October 4. The minimum discount will be 35 per cent and the minimum bid

Officials were optimistic about discounts, citing some 27 bids in July that offered more than 50 per cent.

Success for Canadian phone offer

By Bernard Simon in Toronto

A SHARE offer for the part-privatisation of Alberta's provincial telephone company has been heavily over-subscribed, despite uncertainty about the regulatory future of Canada's telecommunications

The Alberta Governmentsaid that it received C\$1.4bn in subscriptions for the C\$951m share issue by Telus, formerly Alberta Government Tele-

The issue, which is the largest public stock offering in Canada, will reduce the Government's stake in Telus from 100 per cent to 40 per cent. The Government plans to retain its remaining stake for at least another year. Mr Fred Stewart, Alberta

telecommunications minister, said C\$816m worth of shares would be sold to the 140,000 Albertans who applied for Telus stock. The remaining C\$135m would be offered to investors in other parts of

Telus, with assets of C\$2.8bn, chalked up C\$1.2bn in sales last year. Besides handling the province's telephone service, the company has interests in Canada's long-distance network and in the cellular telephone busi-

Canada's telecommunications industry is bracing itself for greater competitive pressures, following the applica-tion earlier this year by Unitel Communications of Toronto to break the monopoly on long-distance telephone ser-vices held by Telecom Canada, a company owned by provincial utilities.

Telus shares will be listed on Canadian stock exchanges on Sept 28.

Mitsubishi Corp doubles size of programme

By Stephen Fidler, Euromarkets Correspondent

MITSUBISHI Corporation said yesterday that it had doubled the size of its Euro-medium term note programme to \$1.2bn and added six new deal-ers to the existing eight-dealer

group.
It would also drop the minimum maturity on the notes from one year to six months and amend the programme to allow for the issue of notes in sterling and other currencies, as well as dual-currency and index-linked notes. Bank in Liechtenstein, the

largest bank in Liechtenstein,

has set up a DM300m Euro-medium term note programme arranged by Deutsche Bank. O Ciba-Geigy has established a £125m sterling commercial programme, arranged by Barclays de Zoete Wedd, with Midland Montagu and Swiss Bank Corporation as

BUSINESS LAW

Realising the Soviet joint venture

By Lloyd Evans

THE SHEER scale of markets and resources in today's com-mercially unfettered Soviet Union holds powerful attrac-tions for western companies. In this, as in other new markets, the first opportunities lie in joint ventures with local companies - ventures to which the Soviet government seems

particularly well-disposed.

Although the commercial environment might at first seem alien, western businesses may find themselves much bet-ter prepared than the Soviet officials with whom they have to deal. The Soviet Union has no history of free international trade, and its government departments have little or no experience of dealing with foreign business people on Soviet soil.

The regulations governing international joint ventures came into existence just three years ago. The Soviet legal framework for joint ventures is based on a Decree of the Council of Ministers which was published on January 13 1987. In October 1987 the Central Committee of the Soviet Communist Party published a joint resolution with the Council of Ministers, making some minor changes to the Decree and adding declarations of intent which demonstrate a willingness to be flexible.

Some regulations have been issued since the Decree, covering procedures for registration, taxation, accounting, book-keeping and insurance.

In the past three years, the Soviet government has been extensively deregulated and attempts have been made to decentralise it, bringing an even greater degree of flexibility to the Decree.

It is vital to ensure that your Soviet partner is the person or concern with the necessary authority to deliver. Experience shows that the Russians are prepared to bend even the most fundamental rules to accommodate their foreign partners. For example, the rejection by western busi-nesses of the Decree's requirement for the application of Soviet law has been accepted. Now any law may be chosen to ilate a joint venture.

Before a joint venture may be registered with the Ministry of Finance, the partners must show that it satisfies at least one of three general requireby satisfying the domestic

requirement for certain goods; or stimulate exports, or attract foreign technologies, skills, materials and money to the Soviet economy. Goods may be imported only to the extent that they are consumed by the venture in production.

However, even when one or more of these requirements has been satisfied, Item 25 of the Decree may stand in the way of the venture. This requires the western partner to achieve its profits in hard cur-rency only from exports, and is often unworkable, because it effectively asks the western partner to compete with itself in western markets.

In practice, the Soviet part-ner may, however, be prepared to lobby for approval of a ven-ture without exports, on the basis that by supplying the domestic market it is effectively replacing imports. This principle is now recognised in unpublished amendments to the Decree. The Soviet Finance Ministry will accept a joint venture even if the western partner achieves "profits" through any of the following (the first three are an expense of the venture in calculating taxable or "balance" profits):

• An annual consultancy fee; Royalties for technology and intellectual property licen-

 Fees for subscribers who have "signed up" for continuing support and maintenance; Government loans to the Soviet partner in foreign currency to secure dividend pay-ments in that currency, where the loans are repayable in rou-

• Counter trade (though this may cause other complica-

Prior to registering the joint venture, a number of foundation documents are needed. The first is a letter of intent, which is not legally binding but must contain secrecy clauses to protect industrial and intellectual property.

Then a series of protocols must be signed during negotia-tions to define financial data, timetables and responsibilities. These are important, because those involved on the Soviet dde will use them to lobby their superior ministers.
The chief document is the

esibility study, which will become the justification for approval of the venture by both the negotiating industrial Ministry and the Ministry of profits due to the western part-

Finance. The parties should be prepared for delays at this stage: both in negotiation (which allows each side to review the other's business) and in the statutory review of the study by the Foreign Eco-nomic Commission of the Council of Ministers.

Finally, the joint venture agreement itself must be drafted, with its articles of incorporation.

Having satisfied all the requirements and achieved Finance Ministry registration, the venture will become a legal entity, acquiring legal rights, the ability to enter into contracts and legal obligations, to sue and be sued in its own name - and, under a recent

As a joint venture with a western company, it will also regard to customs clearances. construction and internal transportation. Even better, it will be exempt from Soviet taxation for a full two years following the date on which it first generates a profit.

After this tax-free period, the profits of the venture are taxed at the current rate of 30 per cent. However, it is possible to delay payment of this tax for the period in which the earnings of the venture are used to expand the company or to increase its various reserve or development funds. The Ministry of Finance also has the right (which is typically exer-cised in practice) to grant additional tax exceptions where preferential treatment has been established in the feasibil-

ity study.

Item 30 of the Decree requires deductions from gross profits (before tax), which are used to build up a Reserve Fund amounting to 25 per cent of the Authorised Fund of the venture. The problem of valuing each partner's contribution to the Authorised Fund remains prickly - despite two attempts at regulation because it must include items such as land, natural resources and buildings. An accurate val-uation is vital to establish the value of shares if the concern is on-going, and its break-up value if it is not.

Tax deferral may be obtained by putting taxable profits known as balance profits into an R&D fund. Add this to the tax holiday and one does quite well. When the proportion of

ner is due to be transferred, the Russians also propose a 20 per cent withholding tax. This will not apply to British partners who enjoy a double taxa-tion treaty. Americans do not. In the absence of such a treaty, the Finance Ministry will apply the reciprocal with-

holding tax rate applicable to Soviet persons repatriating income from the other country. Royalties, for know-how R&D and copyright, plus fee for maintenance and support are typically exempt from the withholding tax as long as there is no permanent repre-sentation in the Soviet Union and, as a separate entity, the joint venture itself does not

constitute such a representa-Shares in a joint venture will not become freely tradeable on the international market, because the ownership of shares is tied to management responsibilities. Having chosen their western partners with care, the Russians will insist on the right to veto any transfer of shares. They will also frown on any early attempt at capital profit-taking by the western partner, as it conflicts with the spirit of a working

relationship.
To further discourage speculation, the Russians now propose a minimum capital investment of £100,000. Either side may own up to 99 per cent of

the venture.
The Soviet Union has now enacted some company law. On the negative side, it also introduced in July a corporation tax, an entertainments tax, an excess profits tax and an

import/export tax.
Any western company entering joint venture negotiations should be represented by top management as well as by technical, financial and legal experts. They will first negotiate with the Soviet ministry responsible for the project. For this reason it is vital to iden-tify the right ministry at the outset, as well as the positions

of its representatives.

More than ever it is vital to realise that the authority to negotiate, which may once have been vested in a single division or ministry, is now the prerogative of several parties. The negotiators who reach the Council of Ministers first with their Soviet partners may well win the race.

The author is a partner in the City law firm Berwin Leighton.

Swiss bond issuing syndicate to be disbanded

By Tracy Corrigan

THE ISSUING syndicate which dominates the Swiss bond market is likely to be dis-banded at the end of the year, despite an apparent lack of agreement among the three big banks which dominate it. Doubts over the future of the syndicate were sparked by four measures to dismantle cartels in the Swiss banking industry, adopted on Monday by Mr Jean-Pascal Delmaruz, the Economy Minister.

These include the removal of

the "fidelity" clause, which prevents members of the Big Bank syndicate participating in deals launched by non-syn-

Swiss Bank Corporation has interpreted the move as an indication of the Government's wish to see the fixed syndicate disbanded, an official at the bank said. The bank's view that it is time for the syndicate to be wound up seems to be shared by Crédit Sulsse. Union Bank of Switzerland is said to be less willing. An announcement is expec-ted following a formal syndicate meeting on September 26. Some bankers say the removal of the "fidelity" clause has undermined the purpose of the fixed syndicate. "One gun is down" in the artil-lery of the three largest banks, commented a Swiss banker now that smaller members' underwriting business is no longer limited to the fixed syndicate. There was a correlation between the "fidelity" clause, which restricted members to the Big Bank syndicate, and the lead manager's obligation to invite the members of the syndicate as underwriters. Without that reciprocal ele-ment, the big three banks, which provide the bulk of

underwriting business, are no longer keen on the system. **But loyalties among Switzer**land's Big Bank syndicate stretch back 40 years. Other options are under review, such as the replacement of the current syndicate with a smaller group of banks.

Although these changes will

create opportunities for for-eign banks based in Switzer-land, the dominance of the big three will not be under threat.

ISE acts to end expiry disruption

By Richard Waters

INTERNATIONAL CAPITAL MARKETS

LONDON'S International Stock Exchange is to make sweeping changes to its trading rules in an attempt to prevent a recurrence of the severe disruption in the UK equity market which occurred on the last dealing

day of June.

The new rules will apply for just 10 minutes once every three months, as the settlement price of futures and options based on the FT-SE 100 index of leading stocks is cal-

The changes are intended to oil the wheels of the equity market during the 10 minutes, forcing market makers to deal at their quoted prices and so discourage them from posting prices designed purely to influence the expiry price of the

smoothly. Firms will have to report "material" positions to the ISE two days before

expiry.

The ISE and Liffe will co-operate more closely to share information about possi-ble market disruption. There were danger signals in advance of the June expiry - £870m of futures contracts were due to settle, compared with an average of £465m on expiry days during the previous year - yet during the previous year - yet the markets failed to heed the warnings.

Two further changes are lanned, although they cannot be implemented until well into next year the expiry date will be lengthened to 20 minutes. and an automatic execution system will be developed to speed up large trades.

Cashing in on a shifting frontier

Simon London explains the vogue for convertible capital bonds

he grey area between debt and equity is fertile ground for corporate finance innovation. From convertible bonds, accounted for as debt, came convertible preference shares, accounted for as equity, and now filling the gap ible capital bonds.

About a dozen UK companies from British Airways to Hickson have issued convertible capital bonds in the domestic and international markets. These hybrid instruments are treated as an equity equivalent on the borrower's balance sheet but as debt instruments for tax purposes. This accounting treatment is justified on the basis that the bonds are not in themselves redeemable, but convert into preference shares (often in an overseas subsidiary) which can then be redeemed.

The bonds are also heavily subordinated and therefore carry a risk close to equity risk. Moreover, the conversion premium at issue date is generally fairly thin - suggesting the bonds will, indeed, be converted into equity. Issuers say they will review the account-ing treatment if conversion into equity becomes less likely because the underlying share price falls.

However, many in the accountancy profession ques-

tion the reality of the "equity stage" through which convert-ible capital bonds pass before redemption. They also question the validity of an accounting treatment which could change with fluctuations in the borrower's share price. And the judgment to draw the debt/equity line so as to include these instruments as equity is of By treating convertible capital bonds as equity, borrowers are able to take coupon pay-

ments below the line, thereby flattering declared profit. However, the UK Inland Revenue has so far taken a benevolent attitude to these debt-equity hybrids, allowing borrowers to treat coupon payments as interest payments for tax purposes - and therefore tax deductible. On Hepworth's £100m convertible capital bond issue. coupon payments amount to film per year, so

the tax savings are significant.
Thus convertible capital bonds allow imaginative finance directors to borrow more, by keeping debt-service costs low and by manipulating traditional debt/equity ratios. Conventional gearing ratios show the position of the borrower improving through the issue of the instruments -

allowing directors to circum-

vent borrowing limits embed-

ded in articles of association.

One danger is that equity holders will not realise the extent to which their company is indebted. The danger to the companies is rather more diffi-One pitfall is that accounting

standards bodies will soon address the debt/equity distinction and conclude that convertible capital bonds are essen-

tially debt instruments.

For example, it is likely that the International Accounting Standards Committee will include a definition of equity which excludes convertible capital bonds in its forthcoming exposure draft on accounting for complex capital instru-ments. But IASC pronouncements carry no for-

mal authority in the UK. The attitude of the new UK Accounting Standards Board is more difficult to gauge.

r Allan Cook, technir Alian Cook, technical director, confirmed that the whole area of accounting for complex capital instruments is high on its list of priorities. Technical staff at the ASB are already looking at the debt/equity distinction.

There is also the danger that the Inland Revenue will look again at convertible capital bonds, and conclude that they are equity instruments after all. In this case issuers could

LONDON TRADED OPTIONS

face some hefty demands for back-tax. Another, if less obvious, danger is that the international equity investment community will shun UK companies with

he trade in international equities grew by an average of 36 per cent a year throughout the 1980s, yet a big hurdle to further development is the failure to agree on common standards of financial reporting and dis-

The connection between transparency and rating in domestic equity markets is well documented. One side of the debate over the correct share price of high-growth companies such as Polly Peck is that a stubbornly low rating reflects a perceived lack of transparency.

Studies suggest that international investment decisions are similarly influenced by quality of financial reporting.

There must be a danger that by pushing back frontiers of debt and equity before accounting rules are set, UK compa-mes will mask the underlying value of their business and value of their dushiess and quality of their earnings. *The Capital Markets Effects of International Accounting Diver-sity, by Frederick Choi and Richard Levich. FUTURES trading led the underlying equity market throughout yesterday pushing it higher in the morning and dragging it down in the afternoon as panic set in Business was down in the London Traded Options Market but still above the acceptable 30,000 level with 32,509 contracts dealt — 18,489 calls and 14,020 puts. over news that Iran had called for The FT-SE 100 options saw the a "Holy War" against the US. In the Liffe, the September future on the FT-SE was at a big premium and holding the market up as it waited for Wall Street to come in up on the previous day. most interest with almost 8,000 lots exchanged. Barclays de Zoste Wedd sold off 900 October, November and December calls taking a bearish stance on the prospects for the Index over the next few months. BP was once again at the top of the equity option trades with 2,732 lots dealt, all but 28 of them calls. Securities firm James Capel At one point it was at 2,181, a premium of 34. Analysts said that when the Iran statement came in when the tran statement came in trade was furious and the pre-mium fell quickly to around 8. The September future closed at 2.161, a premium of 18 and 10 up was responsible for just under 1,950 of the trades and the move was interpreted as a bid to on fair value with 5,721 contracts offload part of what has been CALLS PUTS Oct Jan Apr Oct Jan Apr 200 23 30 32 4½ 12 14 220 13 16 22 13 25 28 240 4 11 15 28 38 40 420 68 80 % 3 6½ 11 468 34 50 70 7½ 17 21 500 10 30 47 27 36 38

Big reduction in profits from associated companies

Heavy launch costs cut Rover to £33m

UK COMPANY NEWS

By Kevin Done, Motor Industry Correspondent

ROVER GROUP, the leading UK car maker, suffered a 27 per cent fall in trading profits in the first half from £45m to

The decline was due partly to the big reduction in profits from associated companies, which amounted to £13m a

year ago, following the dis-posal of Rover's stake in Istel, the computer software com-pany, and the sale of part of its 40 per cent stake in DAF, the Dutch commercial vehicle

first half.

model changeovers.

market and a further drop in the US, where sales of Sterling

cars (the Rover 800) are still

running at a considerable loss. Rover car production

plunged in the first half of the

year by 29 per cent to 184,781 (261,297), due principally to the

changeover to new generation ranges with the launch of the new Metro and Rover 400. At

the same time Rover car sales

worldwide fell by 9 per cent to

Mild winter blamed for Calor's 38% decrease

By Andrew Bolger

On

tier

CALOR GROUP, the bottled gas company, yesterday blamed last winter's mild weather when it reported a 38 per cent drop in pre-tax profits, a change of chief executive and extensive redundancies.
Mr David Mitchell, chief

executive, will be replaced at the end of the year by Mr Foikert Schukken, who is a director of the group and is also the executive vice-president of SHV, the Dutch conglomerate which owns 44 per cent of Calor.

Calor.

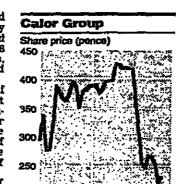

Calor, the biggest supplier of liquefied petroleum gas (LPG) in Britain, said pre-tax profits fell from £30.5m to £18.9m in the six months to June 30.

"The results reflect the adverse impact on profit man

adverse impact on profit mar-gins of exceptionally mild weather during the first three months of the year - without doubt the warmest such winter period since records began against a generally difficult trading background" the group

Turnover was £160.9m (£151.8m). The fact that the total tonnage of gas sold was similar to that in the previous period reflected the continued growth of the small bulk supply business, related particu-larly to central heating and cooking applications.

However, the group's average profit margin was reduced

by a sharp fall in the significantly more weather-sensitive but more profitable cylinder butane sales, related mainly to the mobile heaters used pri-marily to provide supplemen-

tary heating in cold conditions.
Mr Michael Davies, chairman, said: "It is the fourth consecutive reporting period during which our business has been adversely affected by above-average temperatures and although such extended periods of typical weather have historical precedents, your board has concluded that it is appropriate to adopt a more conservative stance for the

The chairman said a funda-mental review of the business

was being carried out. So far this had lead to a limited restructuring of Calor's admin-istration, filling and distribu-tion functions and a reduction of staff numbers which will reach up to 300 by the yearend. The pre-tax profits figure had been reduced by an exceptional provision of £5.4m to cover these costs.

Earnings per share fell from 12.2p to 7.6p. An interim divi-dend of 6p is declared.

6 COMMENT

Another warm winter has led SHV to seize the reins, and the Dutch group's European con-nections may well help Calor to reduce its almost complete reliance on the British market. The shares were pushed up to 450p last autumn by specula-tion that Burmah Oil, of which SHV owns 9.1 per cent, might launch a bid, but that has come to naught and the warm winter has continued the slide. However, the shares yesterday closed 2p higher at 230p. At that level they are probably underpinned by SHV's stated intention to eventually raise its stake to 51 per cent of the shares. Forecast full-year prof-its of £36m put them on a prospective multiple of 16, which is not cheap - even if you believe we have not yet seen

Turnover of Rover Group, which is owned 80 per cent by British Aerospace and 20 per cent by Honda of Japan, rose by 9 per cent from £1.71bn to £1.86bn. Profitability was also hit by the poor financial performance of the Rover car operations – excluding the highly profitable Land Rover four wheel drive vehicles business - which operated at a loss or close to break-even for much of the The decline in these operations was due to: Heavy launch costs for new ● A 29.3 per cent drop in car production due chiefly to A 9.3 per cent drop in world-wide car sales due largely to executive, said the losses from derived chiefly from the Land the decline in the UK new car

Professor Roland Smith: chairman of British Aerospace, which owns 80 per cent of Rover Group

the car operations was only "a passing phase" because of new model launch costs.

About 50 per cent of the planned 100,000 annual output from the Honda assembly plant being built at Swindon, would be sold under the Rover badge. Pilot production begins late next year.

next year.

Rover production of Honda
Concertos at its Longbridge,
Birmingham, plant would total
about 25,000 this year and possibly 40.000 in 1991.

Rover Group profits were

Rover operations, which increased world sales of its Range Rover, Discovery and Defender vehicles by 18 per

cent from 28,127 to 33,247.

Production at the Land Rover Solihuli plant is running at a record level thanks mainly to the successful launch of the Discovery range of four wheel drive vehicles last November.

Land Rover production in the full year is expected to reach 70,000 according to Mr Chris Woodwark, Land Rover

commercial director, up 27 per cent from 55,000 last year and

46,000 in 1988. The company increased output of the Discovery to 630 a week in August, the level origi-nally planned to be reached first in 1993.

Land Rover also said vesterday that it was introducing the name Defender for its four wheel drive utility vehicles, the original Land Rovers launched in 1948, with the aim of using the Land Rover marque for the entire vehicle

Wembley **37% spurt** to £5.7m at halfway

By Andrew Bolger

WEMBLEY, the leisure group which owns the football sta-dium, yesterday reported a 37 per cent increase in pre-tax profits to £5.7m in the six

months to June 30.
Turnover rose from £28.18m to £86.12m, reflecting the first contribution from the five US greyhound tracks which Wembley bought for £57.8m in

December.
Earnings per share rose by 29 per cent to 4p (3.1p).
The interim dividend rose by 28 per cent to 0.9p. Sir Brian Wolfson, chair-

man, said the results reflected an increase in the number and variety of events at the Wembley complex, including the Nelson Mandela concert, Football League play-off matches and 15 Paul McCartney con-

Profits were boosted by an exceptional item of £994.000. arising mainly from profits on the exercise of an option by the former lessee to purchase the hotel situated on the Wem-

bley complex.

The results included an extraordinary item of £9.54m, arising principally from the profit on the sale and leaseback of the Wembley complex office block, conference centre, and exhibition hall and includes a prior year revalua-tion surplus now realised of

Wembley said its Meridian Holdings results reflected the current recession in the UK building industry, which had resulted in tighter margins in the contracting

Diversification hopes at Mrs Fields as losses fall to \$2.63m

By Andrew Hill

MRS FIELDS, the US cookie-maker and retailer, lost \$2.63m (£1.41m) before tax in the first half of 1990, a slight improvement on restated

losses of \$3.53m in the equiva-lent period.

Mr Larry Holman, the group's senior vice president, said his hopes were pinned on Mrs Fields' diversification into new areas, backed up by the core cookie and bakery business. But he could not say when the company, which has its only share listing in London, would start to pay dividends again.

Turnover rose from just over \$57.3m, excluding \$3m of sales from closed stores, to \$63.6m,

and the loss per share narrowed to 1.8 cents (2.4 cents). Operating income during the first half - traditionally the weaker half for Mrs Fields was up 22 per cent at \$6.64m (\$5.46m), but depreciation and amortisation cost \$5.25m (\$4.77m), while interest charges were slightly lower at \$4.03m

(\$4.22m). However, Mr Holman admitted that the group's debts were still far too high: borrowings were almost unchanged at the half-year at \$71m - about twice shareholders' funds.

Mrs Fields, which suffered the after-effects of ill-judged US expansion two years ago, had several new ventures in the

early stages of operations or test-marketing. They included a move to open Mrs Fields Bak-eries in US supermarkets; a licence agreement with Marriott Corporation allowing it to sell Mrs Fields products; and an agreement with WR Grace to market chocolate chips for home-baked cookies under the Mrs Fields brand-name.

The US group was also looking for new stores in the UK in an attempt to stimulate interest in similar licences for mainland Europe.

Mrs Fields' share price has

never recovered its 1987 peak of 272p. Yesterday the shares rose off their all-time low of 17%p to close at 18p.

Prudential drops to £126m

By Richard Lapper

PRUDENTIAL Corporation, the UK's biggest life insurer, recorded profits of £126.7m, for the half-year ending June 30. somewhat above analysts'

expectations. Losses in Prudential's general insurance business, which accounts for less than 20 per cent of the group's total premium income, were largely responsible for the poorer per-formance compared with last time's £197.3m figure.

This was the most eye-catching feature of yesterday's

interim results, but a possible slowing down in the rise of life insurance profits after more than a decade of steady, seemingly relentless growth is more significant.

The depressed state of equity markets has adversely affected the investment outlook. Underlying growth of Prudential's life business is now estimated at about 10 per cent, a few per-centage points down on the average achieved over the past five years.

A reduction in terminal

bonuses at the end of this year is considered likely by analysts, who are expecting annual profits of between £300m and £325m, compared with £358.9m in 1989.

Mr Roger Harvey, life insurance analyst with Kleinwort Benson, said the final outcome could be worse if UK equity markets continue to perform dully. "People will have to get used to the idea that life insurance results don't go up for ever." he added.

As steady as a BTR

£10m advertising budget for crucial pre-Christmas period

Ratners shows 12% improvement

MR GERALD Ratner was in cheery mood yesterday as he unveiled a 12 per cent increase in interim trading profits at Ratners Group, the jewellery chain of which he is chairman and managing director.
In spite of the slowing econ-

omy, Mr Ratner said jewellery was still the fastest growing sector in the high street this year with 11 per cent growth.
"We are still taking market
share. The independents are
collapsing," he said.

Operating profits rose from £15.91m to £17.78m in the six months to August 4 on sales 23 per cent ahead at £370.69m (£301.72m). At the pre-tax level, how-

ever, profits fell from £14.69m to £9.3m, although the previous year's figure did include £7.35m of exceptional profits.

A STRONG trading performance from its marine services division helped Ocean Group, the diversified indus-trial services conglomerate, to

report a 10 per cent improve-

ment in interim profits.

It warned that the second-

half outlook was "less certain

given the current economic cli-mate and the effect of exchange rates." The shares, however, climbed 6p to 321p. Taxable profit for the six

months to June 30 amounted to

\$22.6m (£20.5m) on turnover of

£530.5m (£406.4m). The profit advance was achieved in spite of interest charges quadrupled to £2.9m (£700,000).

Ocean has changed its accounting policy to translate

results from overseas busi-nesses at average rather than

year-end exchange rates. It

said that the impact of the adjustment in the first half was "not material."

Taking into account a fur-

ther pension credit-related adjustment, the effect on first half 1989 figures was to reduce turnover by £13.7m while leaving pre-tax profit unchanged.

The marine services division

Trading profit from freight

pushed trading profit to £10.7m

(£5.1m) on turnover up 55 per

By David Owen

Ocean rises 10% due to

marine services strength

was now building up for the crucial Christmas period when it makes 40 per cent of its sales and 90 per cent of its profits. "We are going to go out there and aggressively attack the market in December," he said. Ratners plans to spend £10m on advertising in the run-up to Christmas. "The public, bless them, always leave it to the last minute," he said.

entice customers with new lines such as men's earrings and Dick Tracy watches that have a paging facility. It is also printing 10.5m catalogues to promote its wares. In the year to date, both the Ratners and H Samuel jewellery chains achieved like-for-

and distribution services edged

up to £11m (£10.6m) on turn-

Environmental services reported unchanged trading profit of £3.4m on turnover of

Earnings rose 10 per cent to 13.1p (11.9p). The interim dividend is 4.67p (4.24p).

The positive reception

accorded these figures stems from the evidence they provide

that the group has emerged

more recession-resistant from the restructuring, which saw it sever its historic ties with ship-

ping and change its name from

Ocean Transport & Trading. In spite of the group's cautious

comments, the thinking now is that the benefits which the marine services unit would

derive from a sustained spell of

higher oil prices would help to offset any adverse impact on

freight and distribution. Envi-

ronmental services, mean-while, should perform more strongly in the second half

now that the costly problems

at Mucking have been rectified.

Assuming full-year profits of between 250m and 252m, the

shares look fairly valued on a prospective multiple of 10.4 to

over of £447m (£351.2m).

26.2m (£16.7m).

COMMENT

The group will also try to

Share price (pence)

the upmarket watch chain, which "has certainly struggled," and Salisburys, the bag retailer, which "was a little bit disappointing."

Mr Ratner was bullish about the acquisition of Kays Jewelers, the US chain, which will be completed in mid-October.

be completed in mid-October. "We are very confident about Kays even though there are one or two people out there who are not," he said, referring to some analysts who have argued that the move threat-ens to dilute earnings. The interim dividend is lifted

by 20 per cent to 2.4p (2p). But fully diluted earnings per share fell to 1.2p (3.9p) although Ratners argued it would be "totally misleading" to read anything into this decline at the interim stage.

Margins under pressure at Nurdin & Peacock

By Andrew Bolger

NURDIN & PEACOCK, the cash and carry wholesaler, reported an 8 per cant increase in pre-tax profits, from 55.16m to 55.6m, in the six months to July 1.

Turnover rose 15 per cent to 2802.6m (2523m) and Mr Mich-ael Peacock, chairman, said there were a number of reasons why the profit improve-ment had not kept up with

Profits were being partly restrained by the faster rate of development of the business and the increased costs associ-ated with installing laser scan-ning in new branches, he said. One step taken had been the successful transfer of N&P's meat operation from a

Dewhurst concession to company management, with initial costs of £400,000. A drive on the catering market had been launched with the formation of a food services division and a new catering range under the Happy Chef label, plus a delivery service to larger customers from a number of branches.

In another venture, the company had decided to supplement customer training courses with real-life training Earnings per share increased

cent to 3.5 pence.

expansion, the company no longer needed to provide for deferred tax. Mr Peacock said: "Inevitably the faster rate of development of our business and the intro-

by 13 per cent to 3.73p (3.3p). That growth had exceeded the rise in pre-tax profits because, with its increased rate of

duction of scanning is increasing the costs associated with new branches and must restrain our profits growth to The interim dividend is

raised to 1.87p (1.68p). **O COMMENT**

Profit margins are obviously being squeezed by N&P's expenditure in laser scanning, new catering products and a centralised distribution service. However, all this investment should pay off in the longer term and the stock looks a solid defensive hold. Forecast full-year profits of up to £25m put the shares, up Ip to 154p yesterday, on a prospective multiple of about 11. That seems fair value, now that takeover speculation has receded concerning the 8.9 per cent stake held in the company by SHV, the Dutch conglomer-ate, which pushed the shares above 200p last year.

By Raymond Snoddy

MR ROBERT Maxwell, the publisher, is planning an accelerated programme of dis-posals within Maxwell Com-

posais within Maxwell Com-munication Corporation to reduce group debts as quickly as possible.

Earlier this year the MCC chairman said he planned to sell "non-strategic" businesses worth about \$800m (£492m) plus about \$150m in surplus property. property.

At yesterday's MCC annual meeting, Mr Maxwell said he was "determined to continue further substantial reduction in borrowings in the current financial year and that the aim was to reduce gearing from its present 1.5 or 1.6 to 1 as soon as was practical

as soon as was practical.

This will involve further disposals worth between \$400m and \$500m, bond issues and sale of securities.

"I do not enjoy running a highly leveraged company and want to get back quickly to being equity rather than debt-led. MCC debts taken on to pur-

chase Macmillan, the US pub-lisher, and the Official Airline Guides peaked last September at \$2.7bn and was down to

\$1.9bn by June. Mr Maxwell told over 200 shareholders at the meeting that negotiations were well advanced to sell a number of parts of the business, but he would not name any. He also disclosed be had

recently spent £75m buying shares to support the share price in the period following the announcement of pre-tax profits of £172.3m.

One shareholder challenged Mr Maxwell on the company share price, saying: "It seems to be at rock bottom because people believe you cannot pay your debts."
Mr Maxwell replied: "People

who believe we cannot pay our debts are wrong."
Mr Leon Woolf, another shareholder, sald: "This com-

pany is becoming rather like a soap opera. Every week there is something going on. I think it is about time it should end." The meeting was picketed by 23 journalists sacked by Mr Maxwell's Pergamon Press last year after going on strike.

Examiner has 'constructive' talks with Goodman banks

By Maggle Urry

MR PETER Fitzpatrick, the examiner appointed by the Irish High Court to Goodman International, yesterday met the banks which are owed 1£460m (£422m) by Mr Larry Goodman's beef processing

group.

After the meeting, which lasted most of the day, Mr Fitzpatrick said the discussions had been "frank and construc-

The group admitted late last month that it was in financial difficulties and was given the protection of the court under newly-enacted legislation a week later. This protection lasts for three months and could be extended for another month if the court agrees. Mr Fitzpatrick has until

October 10 to make a report assessing the viability of Good-man International. If it is to survive it will need to retain the support of its banks. As well as the I£460m of unse-cured loans, banks had pro-vided guarantees of I£200m. Shareholders' funds at Goodman's last year end were only

Bankers had been expected to push yesterday for security for their loans and better terms. Unless these are forthcoming they could threaten to call in a receiver once the

court protection expires.

The meeting was held at the head office of Allied Irish Banks – one of the lenders – and was attended by represen-tatives of all 33 banks involved. Mr Goodman was not

Mr Fitzpatrick, of accountants Coopers & Lybrand, said last night that he and the bankers had agreed to keep what was said at the meeting confidential.

However, some banks are known to be uneasy about the examiner system which has not been used in Ireland

Banks see it as unhelpful to them, although it allows the company to continue trading, especially as the examiner can sell assets and raise new borrowings which will rank higher than existing debt if a break up of the group is even-

The examiner is returning to the High Court next week to ask for an increase from 1225m to 1255m in a borrowing facility arranged last week to cover the company's working capital

The industry is reaching the peak autumn slaughtering season when these needs are at

their highest. The examiner has estimated that a 1£55m facility will cover Goodman's requirement for the whole season. The figure is much lower than some earlier estimates as beef being pro-cessed is now being sold into intervention, and the group receives payment more quickly than when it was exporting

One of the problems which led to Goodman's difficulties led to Goodman's difficulties was that Iraq owed it ELISOm for beef supplied over the last 18 months, and all payments were frozen following Iraq's invasion of Kuwait at the beginning of August.

Trade with Iran had also been disrupted because of fears over BSE or "mad-cow" disease.

Acquisitions lift Wm Baird

RECENT Acquisitions helped William Baird, the textile and engineering group, lift pre-tax profits by 9 per cent to £12.9m in the six months to June

Turnover rose by a quarter to £240.32m (£191.53m) and operating profits advanced 17 per cent to £15.16m.

Earnings per share were up 0.2p to 8.8p. The interim divi-dend is raised 9 per cent to 3.55p. The shares rose 3p to close at 213p on the

day.
"It is a solid performance," said Mr Donald Parr, chair-man. "Not brilliant, but good in the conditions that are around. Business has been nice but not easy."

Approximately half of the profits and turnover increase was due to acquisitions, he added. In addition to the purchase of three companies during the first half of 1990, sev-eral bought last year are now showing returns for a full six Higher interest rates, and the cost of new acquisitions doubled interest payable to £2.53m (£1.39m), with gearing increasing to about 25 per cent, according to the company.

The performance was con-

sistent in both of the compa-ny's divisions, with Baird Tex-tiles reporting operating profits up 22 per cent to £10.4m on a turnover up from £148.17m to

£185.5m. The division achieved vol-ume gains in both contract and branded clothing, although margins were stable. It acquired two women's wear businesses in February. Darchem, the engineering division raised operating non-

division, raised operating profits modestly to £4.76m (£4.5m) on a turnover up 26 per cent to

£54.82m (£43.36m). The increase was helped by the purchase of ACR Heat Transfer Manufacturing in

O COMMENT Solid and reliable: hardly typi-

cal adjectives for UK textiles. but ones that Baird seems able to justify with promising

Lop

Jam

d000

Its strangely chalk-andcheese divisions, engineering and textiles, may not be a par-ticularly logical mix, but the company is committed to both, and they do offer balance.

Sourcing 25 per cent of cloth-ing production in Asia looks prudent with sterling so strong. So does having Marks and Spencer as a customer for a quarter of sales, as they expand into Europe and out-oftown shopping centres.

Contracting delays and the termination of nuclear thermal insulation business have temporarily hit engineering.

The shares have outper-formed over the last few months. Several analysts held their full year projections unchanged.

On a conservative £35.5m profits before tax, earnings per share are 25p, for a p/e of 8.6.

PRUDENTIAL **CORPORATION** FIRST HALF PROFITS £126.7m.

UK COMPANY NEWS

More O'Ferrall dips 54% Strong accounts growth helps to £1.98m but shares rise

By Clay Harris, Consumer Industries Editor

MORE O'FERRALL, the outdoor poster contractor, suffered a 54 per cent decline in interim pre-tax profits to

The company, which specialises in bus shelters and huge "supersite" hoardings, had warned in April after a sudden collapse in bookings that profits for the six months to June 30 would fall short of the £4.29m achieved in the 1989 first half.

Its shares, however, gained 17p to 187p on yesterday's results. This reflected not only a maintained interim dividend a maintained interim dividend of 3.2p, even though earnings per share fell to 5.2p (11.8p), but also a more optimistic outlook on bookings.

Mr Russell Gore-Andrews, chairman said he expected a

chairman, said he expected a "very strong recovery in profitability" in the second half, although full-year profits would not match the 1989 figure of £13.09m.

Adshel, the bus shelter subsidiary, increased the rates for its illuminated Superlite panels by 10 per cent from the autumn. Firm bookings for the fourth quarter have been taken for 80 per cent of the

More O'Ferrali Share price (pence)

250

per cent to £27.65m (£24.25m). The UK and Ireland managed a 5 per cent increase in turnover because of extra capacity, although operating profit from the two countries fell by 44 per cent to £2.26m.

More O'Ferrall has reduced planned capital expenditure for 1990 from £19m to £10m. Adshel will be adding only 2,100 Superlite panels this year to make a total of 21,000, instead of an addination. instead of an original target of up to 24,000.

ites. Investment was also deferred First-half turnover rose by 14 in France, where Mr

AMV increase to £2m midway on new strategy

ABBOTT MEAD Vickers yesterday bucked the trend in the advertising and marketing sector with a 15 per cent Gore-Andrews said order books increase in taxable profit from £1.84m to £2.11m for the six continued to be short-term. The company's interest bill increased to £1.41m (£812,000), months to June 30. Turnover at largely because of the £5.9m acquisition in March of the agency rose 16 per cent from £54.32m to £63.25m.

the Belgian Visibility Group.

As much as anything, yesterday's 10 per cent recovery in More O'Ferrall's share

price was a sigh of relief. Cau-tious optimism on trading was buttressed by a hopeful out-look on the final dividend.

If pre-tax profits emerge at £10m, the top of a narrow range, earnings per share of 25.5p would be close enough to justify maintaining

the total pay-out at 13.2p, even though this falls

below the company's minimum

target cover of two times eps. If so, the prospective

yield is an attractive 9.4 per cent, compared with a p/e of

The shares must have rebounded off the bottom by now, as they certainly should

as March. A thin market mag-nifies price movements, but do

not expect any quick return to

only 7.3.

COMMENT

Earnings per share rose 10 per cent to 9.6p (8.72p) and the directors recommended a 0.3p increase in the dividend to 2.7p. The shares closed down 8p to 213p on the day, in line with the sector.

"At a time when people are crying 'Armageddon' in advertising, we are really very pleased with these results," said Mr Peter Mead, group

chief executive.

The improvement has been entirely through organic growth. In spite of protracted negotiations to buy the New York advertising firm Scali McCabe Sloves last year, no acquisitions have taken place in the interim. "We have looked at twelve

companies over the last two years. None has matched our expectations," said Mr Mead. New accounts won during the first half included the Royal Bank of Scotland, Bisto Gravy, Reed International and Beefeater Gin, worth in total £16m, the same figure as for

the whole of 1989.

Peter Mead: possible acquisitions failed to match expectations

Mr Mead said the company had just been invited to tender for three clients with combined business worth over £20m. "It is an absolutely unyield-ing principle that we do not make people redundant," said

Mr Quintin Price, analyst with James Capel, said yester-day: "AMV has an extremely

Mr Mead.

good culture, and extremely mature and responsible management." Cash balances exceed £5m, and the company has no debt. He projected full-year pre-tax profits of £6.2m.

AMV also announced the appointment to the board of Mr Peter Gill, who moves from company secretary to group development director.

Gowrings embarks after 68% decline

AS FIRST-HALF profits have slumped 68 per cent and the outlook is not good, directors of Gowrings have decided on a new corporate strategy.

This means pulling out of motor trading by selling the two Ford dealerships and the

contract hire company, and disposing of the interest in the golf club at Sandford Springs. The group will then concentrate on the development and expansion of its two core businesses: restaurants, comprising its Burger King operations and the Rocco's pizza outlets in the UK and Spain; and the mobile home parks, comprising the existing residential park business and the possible expansion into holiday parks.

In the first half of 1990 group turnover improved to £31.5m

(£30.38m) but profit fell from £510,000 to £163,000. Earnings per share were 1.2p (5.5p) but the interim dividend is held at

2.25p.
Mr John Fowles, chairman, said the main contributors to profit in 1989, namely motor dealerships and residential park homes, fared particularly badly because of very difficult trading conditions.

The group made a substantial profit on the disposal of its holding in GWR Group at the beginning of the year. The sale of further shares in Newbury Racecourse in the second half In motor, pre-interest profit slumped to £158,000 (£730,000). was under consideration, Mr Fowles said.

several years.

Lopex weathers sector slowdown with 18% rise

LOPEX, the advertising and marketing services group, lifted taxable profits by 18 per cent to £4.01m in the six months ended June 30 compared with a previous £3.39m.

Lord Marsh, who took over as chairman after Mr John Castle's departure in May, said that consumer advertising results in the UK were in line with original forecasts and in most of the rest of Europe were only marginally lower. Client spending continued to be weighted towards the second

He added that a supreme effort had been made by the management and staff of the trading companies to combat the slowdown in the UK economy in general and in the mar-keting sector in particular. Earnings per share dipped to 9.5p (9.9p) but the interim dividend is held at 2.9p.

Turnover for the half year advanced by 50 per cent to £120.19m (£80m) and operating profits came through at £4.24m

Profits from related compa nies added £698,000 (£692,000) while interest payable, less interest and dividend income, took £924,000 (£580,000).

Tax rose to £1.68m (£1.33m) and there was an extraordinary £338,000 (£179,000) debit representing compensation for loss of office of Mr Castle, together with associated costs.

James Wilkes more than doubles to £2m

James Wilkes, a specialist manufacturer of consumables and engineered products, more than doubled taxable profits from £873,000 to £2.1m for the

six months to June 30. The group's turnover rose to £21.46m (£8.96m), helped by a better than expected performance by Floform, which was acquired in December

The acquisition, however, increased group borrowings and interest payable increased to £1.03m (£414,000). Tax took £548,000 (£209,000).

Mr Stephen Hinchliffe, chairman, said over 60 per cent of the group's trade was in overseas markets which sheltered it from the worst of the UK recession.

The group now owns 74 per cent of Easterbrook Allcard after legal action against certain shareholders. Steps to reduce borrowings include the sale of surplus property worth

Earnings per share rose to 8.9p (7.2p) and an interim dividend of 4.5p (4.25p) is

Tibbett & Britten ahead 42% to £5.4m

Tibbett & Britten Group, the transportation and distribution services concern, lifted pre-tax profits by 42 per cent from 23.8m to 25.4m for the first half

Turnover jumped 70 per cent to £71.77m, of which £13m came from organic growth within the existing business a 31 per cent rise.

Mr John Harvey, chairman, said the lower operating mar-gin reflected the high development costs associated with some new contracts, together with current pressures on the National Division, which is engaged in the clothing field.

He said the group had already added substantially to both its human and material resources. The board continued to seek development opportuni-ties and suitable acquisitions. After tax of £1.89m (£1.33m) earnings per share were 2p higher at 10.5p. The interim dividend is raised to 2.9p

The company is proposing to cancel its share premium

FRONT LINE BUSINESS. BOTTOM LINE PERFORMANCE.

'Sales are higher at £4.8 billion while trading profit of £234 million for the six months has increased by 36%...'

Higher margins and a better performance from the businesses, following considerable rationalisation, have contributed to the profit growth of the Defence sector.'

'Rover has increased its share of a lower domestic market for vehicles ...'

'Commercial Aircraft has achieved an important increase in profit.'

'It is too soon to predict the outcome of the present turbulence in the Middle East but, barring totally unforeseen circumstances, the full year results for British Aerospace should be comfortably ahead of those achieved in 1989.

UK COMPANY NEWS

Savoy Hotel cautious after decline to £5.3m

SAVOY HOTEL Group, the owner of luxury hotels, restaurants and a health farm, suffered a 4 per cent drop in pre-tax profits in the first half of 1990, as rising costs squeezed margins. The pre-tax outcome was £5.3m, down from £5.58m.

Mr Giles Shepard, managing director, said he was disap-pointed by the results, and warned that in the second half some effect of the crisis in the Middle East and the strength of the pound against the dollar and European currencies would be felt. So far, though, bookings were good for the second half, he said.

Savoy spent most of the 1980s in a long-running battle with Trusthouse Forte, the hotel and catering group, which wanted to acquire the company. The two settled their differences in November last year, with THF taking two

places on the Savoy board and promising not to buy any more Savoy shares for five years. Mr Shepard said of the fig-ures "it was good to see turn-over up by slightly more than inflation." Sales rose by nearly 13 per cent to £45.6m (£40.49m). Occupancy rates were about the same as in the comparable period, and he attributed the turnover rise to "a higher level of spending by visitors from abroad". He said the hotels had held their market share.

However, costs had risen more rapidly, up 15.5 per cent to £40.3m, leaving operating profit margins at 11.7 per cent, compared to 13.9 per cent in the first half of last year.

Wages rose by 10 per cent and the depreciation charge by However, costs had risen costs and would have a bigg impact in the second half. There was no net interest to pay, compared to a net charge of £58,000. Earnings per share for the A

NEWS DIGEST

Squeeze on margins at Hall Eng

PRESSURE ON operating margins, particularly in its steel reinforcement activities, but also in metal stockholding, resulted in a sharp contraction in first half profits at Hall Engineering (Holdings).

Although turnover for the six months to end-June 1990 edged ahead to £92.88m (£89.63m), taxable profits dived 42 per cent from £6.1m to £3.56m in spite of an improved contribution of £1.63m, against £1.35m, from associated compa-

The announcement bore out the warning on profits delivered by the Shrewsbury-based company in June. Hall shares fell 10p to 105p yesterday against a peak for the year so far of 197p.

Mr Richard Hall, chairman said the group had reached the final stages of its recent capital investment programme, including a £10m stockholding development at Daventry in Northamptonshire, and that this, together with higher interest rates, was reflected in interest charges which more than doubled from £1.21m to

Hall's problems stem from the intense competition in the steel reinforcement market. It has undertaken a substantial rationalisation programme at its British Reinforced Concrete Engineering (BRC) subsidiary involving a plant closure and

job losses. The moves - now completed - cost £545,000 but will give an annual saving of about film, Mr Hall said, although this may not show through in the immediate future as a result of the "significant deterioration in the trading environment

affecting BRC".

Of the provision, £339,000 was taken above the line, although this was more than offset by exceptional gains ng £915,000 from the dis-

posal of surplus properties.

After an estimated tax charge of £1.14m (£1.89m) earn-

ings dipped to 8.63p (14.1p) per 50p share. The interim dividend is in effect maintained at 3.3p.

Co of Designers gives loss warning

Following a slump in interim profits. Company of Designers, the USM-quoted design consul-tancy, yesterday warned of losses for the full year, which would reflect rationalisation costs and increased provision for bad debts.

Against a background of problems in the construction industry, the company's offices in East Anglia and in the west of England were experiencing difficult trading conditions.

As a result, action was being taken to rationalise and reduce the company's cost base in line with current workloads and the depressed economic situa-

The directors said, however, that the company had a strong forward order position and action taken and proposed was expected to return it to profitability in the coming year. The shares fell 4p to 21p yes-

Golden Vale down 5% but optimistic

In spite of a slight fall in interim profits, Golden Vale, the recently listed County Cork-based dairy group, said yesterday that the outcome for the year would represent significant progress.

The six months to June 30

ended with pre-tax profits down 5 per cent from 125.59m to 125.22m (£4.9m). A dividend of 0.24p was paid

in May and the directors expect to recommend a payment of 1.14p for the year to December 31.

Turnover in the first half at the former co-operative rose 12 per cent to I£111.56m. Share of profit of associated companies came to I£220,000 (nil). Net interest payable rose to 15307,000 (15276,000). After tax of IE140,000 (nil) earnings per share fell to 3.17p (4.37p).

Radio setback holds Aspen to 13% rise

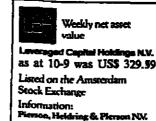

Aspen Communications, the USM-quoted communications. specialist printing and market-ing services group, raised pre-tax profits by 13 per cent from £2.46m to £2.79m in the first half of 1990, on turnover 32 per cent higher at £31.22m.

There was organic growth in three divisions, but a reverse in the radio communications operation. With earnings per 5p share up 0.4p to 14.5p, the interim dividend is lifted to 2.7p (2.4p).

Mr Henry Meakin, chairman, said the board anticipated a satisfactory full year result and felt that there were fundamental grounds for optimism

£1m write-off pulls down Try Group

Try Group, the construction and property development combine, lifted its trading profit in the first half of 1990

but showed a reduced pre-tax £11.64m (£6.2m). An unchanged interim dividend of 1p is to be balance after a £1m housing land write-down.

Pre-tax profit fell from £1.46m to £528,000. That led to earnings per share of 1.64p (5.47p) but the interim dividend is maintained at 2p.
Mr Hugh Try, chairman, said
the group would continue to be
affected by the depressed mar-

ket conditions in housebuild-ing. The balance sheet at the half year was in "good shape". Turnover rose from £45.24m to £64.87m while the pre-interest profit increased from £1.17m to £1.55m. There was an interest charge of £25,000, however, compared with a receipt of £295,000.

Severfield-Reeve warns of slowdown

Severfield-Reeve yesterday reported a 38 per cent rise in taxable profits in the six months to June 30, but noted pressure on margins during period. Which W

ing to be a factor. Mr John Reeve, chairman, said margins in the first half fell from 16.7 per cent to 12.6 per cent. He added that due to the continuing pressure, fullyear profits were expected to be only marginally ahead of

This USM-quoted company is engaged in the design, fabrica-tion and erection of structural

steel.
The interim advance from £946,000 to £1.31m was scored

(\$1.49m). Loss per share worked out at 46% to £1.35m (45c) per share. Again there is no dividend.

Burford Holdings, property

investment and trading group, increased pre-tax profit by 46 per cant, from £925,000 to £1.35m, in the first half of 1990. The directors said the imme diate outlook for the property market continued to be diffi-

By the year end the rent roll should be in excess of £4m annually, they said. They also noted that after the sale of Henrietta House and the pur-chase of Smallbrook, Queensway, "we will have no debt and indeed will have substantial cash available for reinvest-

Earnings per share came to 0.75p (0.49p) and the interim dividend is lifted to 0.4p (0.3p). Realised investment property surpluses were \$150,000

Big cut in Orchid Technology losses

Orchid Technology, a USM-quoted maker of micro-computer accessories, reduced pre-tax losses significantly to \$785,000 (£421,250) for the year to June 30, compared with \$3.85m previously.

Erith down to

£1.4m midterm In the difficult trading climate. Erith considered pre-tax profits

of £1.42m in the first half as "not unsatisfactory." It compared with £1.82m and stemmed from turnover of

£41.46m, against £45.42m. Mr Graham Davies, chairman of this builders' merchant, said high interest rates, a slowdown in the commercial and industrial sectors, and the rising business failure rate all had their consequent affect on profits.

In response new markets were explored, tight cost con-trol applied, staff reductions made, and prudent stock man-

agement exercised. Barnings fell to 2.16p (2.85p)

in the longer term, a new branch had been acquired in Canterbury, a new brick factor-ing division formed, and there will shortly be launched an insulation and fire protection

COMMODITIES AND AGRICULTURE

UK and French farmers seek emergency aid

BRITISH and French farmers yesterday buried the hatchet and agreed to present a joint demand to the European Com-

mission for emergency aid for livestock farmers.

Mr Raymond Lacombe, chairman of the Fédération Nationale des Syndicats d'Exploitants Agricoles (FNSEA). Nationale des Syndicats d'Ex-ploitants Agricoles (FNSEA), the main Freuch farm union, and Sir Simon Gourlay, chair-man of the UK's National Farmers' Union (NFU), called for immediate intervention in the beef and sheepmeat markets in an attempt to avert the "excessively deep crisis" afflicting farmers in both coun-

In the beef sector, Mr Lacombe said the two farm unions had agreed to demand effective market intervention to raise prices, as well as efforts to stop unwelcome imports from eastern Europe, especially East Germany.

Suckler cow premiums and beef special premiums must also be increased, the unions said

For sheep farmers, the FNSEA and the NFU urged curbs on third country lamb imports and more efficient use of EC market support mechanisms.

They demanded the immediate payment of the second instalment of this year's ewe premium; payment this year of the 4 Ecu per head supplemen-tary ewe premium for farmers in less favoured areas, not due to be introduced until 1991;

Sir Simon said that in the medium term the Community must completely overhaul this stabiliser mechanism.
"In the sheep sector it is a

and the non-application in

1990 of the stabiliser mecha-

nism, which reduces premiums

if too much sheepmeat is

very crude mechanism and does not reflect the reality of the market. The renegotiation of the stabiliser mechanism for the sheep sector we see as very important," he said after a meeting with Mr Lacombe in

The two farming leaders said that they had concentrated on the underlying problems affecting livestock farmers in France and Britain, and had not let their talks be clouded by the tension of the last few weeks, during which French farmers have attacked British meat lorries and burned sheep alive, and Welsh sheep breeders have retaliated with a boycott on French food products.

Sir Simon said: "Our response is not to try to escalate this into a trade war but to try to seek solutions to the underlying problems."

Government stands firm on meat exports

By Richard Gourlay

MR DAVID Curry, junior Agriculture Minister, yesterday ruled out the export of meat carcasses instead of livestock as a way to reduce inhumane treatment of animals, signalling that the British government has no plans to back down in the face of continuing violence by some French farmers against transporters of live sheep to abattoirs.

At the Farm Animal Welfare conference on humane farming methods, Mr Curry said the Government was reluctant to give a propaganda victory to that small group of terrorists currently active in France."

Mr Curry, whose constitu-ency in Yorkshire includes sure would have to be increased on the French gov-ernment. There was no easy recourse for Britain to European Community law.

French restraint of Britain's sheep exporters was not a problem for the EC Agriculture Council to resolve, but a ques-tion of properly implementing community law allowing free

movement of goods.

Mr Curry said legislation to introduce more humane farming methods was being considered but Britain could move no faster than majority EC voting would allow.

Several papers presented to the conference suggested there were financial benefits to farmers and meat processors from the use of more humane methods although it is difficult to quantify.
Dr Jane Guise, the director

of a research venture with J Sainsbury, the supermarket chain, said studies of pigs showed less crowded transpor-tation, less use of electric s overm had led to improved quality and quantity of meat at the abattoir and had led to changed practices.
If suggested improvements

for pig welfare were fully implemented, industry profit-ability would increase by £27.15m a year or £1.80 per pig, she said.

Gencor to search for platinum in Bolivia

By Kenneth Gooding, Mining Correspondent

GENCOR, the South African group, hopes to find commer-cial platinum group metal deposits in Bolivia, It is the latest mining company to see the potential of this South American, mineral-rich country where exploration has recently begun to get under way again after a 40-year his-

Gencor (General Mining Union Corporation) has bid for the whole of a 240,000 hectares (about 500,000 acres) area on the tropical plains in the east of Bolivia called Rincon del

It was here that the British Geological Survey completed its largest project outside the UK, a geological mapping programme costing £7m and lasting for 10 years. However, since this was finished in 1986 virtually no exploration has been undertaken to follow up the BGS work, apart from gold exploration by Comsur, a Bolivian national company. This was one of the exam-

ples quoted yesterday at a seminar in London designed to seminar in London designed to encourage mining companies to look again at Bolivia. Mr Charles Bruce, vice-presi-dent of Mintec, a consultancy

group based in La Paz which organised the seminar, said: "Bolivia's shortest road to economic reactivation is, unquestionably, through mining. It lacks capital and has opened its doors to the investor, both national and foreign, to explore for and to develop a new and modern mining industry."

Mintec's experience suggested that an aggressive mineral exploration and development programme, involving perhaps 20 companies and costing a total of about US\$662m, in five years could generate nearly \$1bn a year from base and precious metal

A number of foreign companies are already sizing up opportunities in Bolivia. Battle Mountain of the US has bought 30 per cent of Inti Raymi, a gold miner, for \$16.5m and may invest another \$90m. RTZ Corpora-tion of the UK has bought 30 per cent of Comsur and taken a 50 per cent stake in a joint venture with the same Boli-

vian company.

Among Mintec's clients active in the country are Niu-guini Mining, Battle Mounain's Australian subsidiary, Cominco of Canada, and Minproc of Australia.

Mr Bruce pointed out that the Bolivian government's new investment law, enacted on September 5, gave foreign companies equal rights with those in Bolivia.

Lights going dim in eastern Europe

and the second of the second o

Judy Dempsey investigates energy shortages caused by the Gulf crisis and declining cheap supplies from the Soviet Union

AS THE nights grow longer in eastern Europe, the oil sup-plies continue to dwindle. It was bad enough when the Soviet Union reneged on its contracts and reduced its energy supplies to eastern Europe for this year. But at least these countries could still have looked to Kuwait and iraq to make up some of the

shortfalls.
The Gulf crists has ruled out that option. The lights, though not quite going out, are cer-tainly dimming throughout eastern Europe.

But how serious are the energy shortages in eastern

Europe? Can the Soviet Union help compensate for the twin shortfalls faced by these countries? The shortfalls are as fol-

Poland obtained 5.39m tons of Soviet oil, or a shortfall of 23 per cent. It had planned to import 3.8m tons of oil from lrag as part payment for contracts carried out in Iraq which exceeded \$500m.

Czechoslovakia obtained

nearly 200m tons of oil from the Soviet Union in 1989. Deliveries for July and August were cut by 15 per cent of the agreed 18.6m tons per month. The shortfall could have been met by Iraq's outstanding debt of \$1.7bn, earned largely from arms exports.

 Hungary was due to receive 6.48m tons of oil from the Soviet Union this year.
 Deliveries for July were reduced by 30 per cent. The overall shortfall could be as high as 22 per cent. Part of it could have been met through supplies from Iraq partly in lieu of its \$300m debt to Hun-

In the longer term, Hungary was in the final stages of win-ning a deal with Kuwait whereby, in return for obtaining a foothold in the retail

market, and refining its oil in Hungary, Kuwait would supply Hungary with guaranteed amounts of energy. Ultimately that would have broken Hungary's dependence on the Soviet Union.

Bulgaria was due to receive

12.7m tons of Soviet crude and petroleum products this year. Supplies for the first seven months fell by 1.7m tons. Mr Valentin Bozhilov, an official at the Bulgarian foreign ministry, said the country had planned to obtain 2.6m tons of oll from Iraq, partly in lieu of iraq's debt of \$1.2bn. However, he said the Soviet Union would

make up the shortfall.
All four countries completely depend on the Soviet Union for

its energy supplies.

Romania, which imported 3.9m tons of Soviet crude in 1989, has, so far, not been affected by Soviet cutbacks. The bulk of its energy imports, 17.9m tons, were obtained from Iran and Saudi Arabia. Iraq's outstanding debt to Romania is more than \$3bn. However, the higher prices and the disrup-tion in the Gulf has already affected the country. The quan-tity of crude refined last month at the petrochemical combine at Midia-Navodari near the port of Constanta on the Black Sea, fell from 329,000 tons to

180,000 tons.

Yugoslavia was due to import 30 per cent, or 3.5m tons of its annual supplies of crude from Iraq this year, probably in part payment for the outstanding \$3bn owed by Iraq to Belgrade.

Albania has not pub- Albania has not published any statistics about its energy imports. However, a report recently broadcast by Tirana radio stated that because of the domestic energy crisis. Albania would have to purchase 11,000 tons of oil "on the foreign market,"

Total shortiali ~1990 shortfall 16.86 20.13 7.79 15.16 3.95 9.6 E. Germany 0.12 1.47 2.13 0.007 13.04 Yugoslavia

USSR OIL EXPORTS TO E. EUROPE 1989 (m tonnes)

Source: PlanEcon Report June 1990

which will cost "about \$1.7m." The picture clearly illustrates the trap into which eastern Europe has now fallen. Years of dependence on cheap Soviet oil meant countries did not look for alternative sup-

plies of energy.

Also, the oil refineries in eastern Europe were designed to cater only for Soviet crude, hence the importance of the planned Hungary-Kuwait con-

The psychological dependence on Soviet oil, and what was regarded as permanent, guaranteed supplies of Soviet oil, did not encourage consideration of switching to other sources of energy, let alone cuts in domestic consumption.

These arguments were raised

by Mr Yevgeniy Osadchuk, the Soviet deputy Minister of For-eign Economic Relations, in a recent radio interview. Because the Soviet Union was subsidising its energy exports to eastern Europe, it was encouraging waste. Instead of giving optimism to

the countries of eastern Europe that the shortfalls would be met later in the year, despite breaches of contract, he said the Soviet Union was not in a position to do this. He cited several reasons. First, Soviet oil production will fall to 585m tons this year,

compared with 607m in 1989. and 624m in 1988. Izvestia, the government daily recently reported that in 1989, oil production had fallen by 3 per cent, and oil exports from the Soviet Union had declined by 17m tons Oil production fell by 17m tons. Oil production fell by

a further 4 per cent during the first quarter of this year.

Izvestia said: "If present trends continues, in the 1990s, the USSR will be extracting only 560m to 580m annually. It could soon happen that the the USSR will find itself short of not only surplus oil for export, but also oil essential for its own consumption." Neither reports made any reference to

the country's reserves. Second, the Soviet Union was due this year to receive from Iraq 10m tons of crude in payment for contracts. "This oil was to be distributed among several east European coun-

tries," Izvestia said. Third, the newspaper also reported that the Soviet Union had an agreement with Kuwait whereby Kuwait undertook to subsidise the development of Soviet oil recovery in parts of Siberia and the Artic regions where new deposits were located but where access was

What then are the options for eastern Europe? Soviet press reports have

difficult.

made it clear that deliveries to eastern Europe by the end of the year will be reduced from the planned 70m tons to 56m. Next year will be worse. Mr Osadchuk said it would be logi-cal to further reduce deliveries of Soviet liquid fuel to the

countries of eastern Europe One possibility is that oil supplies might be improved if eastern Europe exported more finished goods in proportion to Soviet exports. But the last thing the new democracies want is to orientate their trade eastwards. Besides, beginning on January 1, trade between the Soviet Union and eastern Europe will be conducted on a dollar clearing system. But no matter which countries eastern Europe turns to for extra oil, they will require hard cur-

rency.

The short term options could involve financial assistance by the European Community to see eastern Europe through this winter.

This point was raised by Mr Jozsef Antall, the Hungarian Prime Minister on a recent visit to Brussels.

In the longer term, Mr Osadchuk believes that the fall in Soviet oil exports could be compensated to some degree by an increase in natural gas deliveries. The Progress gas pipeline went into operation in 1989. But the minister conceded that "this increase will only ease the problem not solve it."

Ultimately the news for the east European consumers is grim. They will be forced to pay higher prices for energy and reduce their energy con-sumption which is twice as high their counterparts in western Europe. That will make the painful road to economic reconstruction more difficult and the long winters

Bitter pill for Cuba's sugar-based economy

Tim Coone, in Havana

CUBA will soon face its biggest upheaval since the 1959 revolu-tion. Its economic anchor for the past quarter of a century, preferential sugar prices within the Comecon trading block, is being severed.
At the end of this year,

Cuba's five-year trade agreements with each of the Comecon countries, come to an end and must be renegotiated. The rapid political and economic changes in eastern Europe and the block's shift

mies, makes it likely that some, if not most, of these agreements will not be renewed. None will be renewed on the previously highly favourable terms for Cuba. Mr Julio Garcia Oliveras, the president of Cuba's Chamber of Commerce said: "The situation is extremely difficult. I don't

om, 99.7% parky (5 per toruno)

know what the answer is. The most serious problem is the lack of definition in the (Comecon) relationship."

Comecon presently accounts for 85 per cent of Cuba's annual 13bn Pesos (\$13bn) in foreign trade. Trade represents 40 per cent of Cuba's Global Social Product (GSP), the closest measure of GNP. Its trade with East Germany

and Czechoslovakia, normally about 1bn Pesos per year, has already been suspended. be integrated into its larger West German neighbour and the EC. The Soviet Union has

recently reduced oil supplies to Cuba by 20 per cent, causing an energy crisis and petrol rationing in Cuba. Cuban nickel supplies to the USSR are being interrupted. The USSR is Cuba's main trading partner,

1815/1790

followed by East Germany and Czechoslovakia. Cuba is being cast adrift into a capitalist sea of free market

prices, without map, guide or compass. Its dependence on trade and its lack of raw materials rule out autarchy as the alternative. Cuban officials such as Mr Garcia Oliveras attempt to put a positive spin on this difficult turn of events. "It will liberate our trade and give us access to better technology than in the past. The next two years will be ones of change. We have growing trade relations with Latin America which we must develop. Integration with Latin America is not only a political

debt, have led to the suspension of all EC credits to Cuba. The recent diplomatic squab-ble between Spain and Cuba over Cubans seeking asylum in the Spanish embassy in Havana, has also led to the suspension of a Spanish develcoment and technical assistance programme. Cuba's hard currency reserves at the end of

1989 were down to USD100m. However, Mr Garcia Oliveras believes that the USSR will and economic necessity, it is a matter of survival," he said.

Cuba was also looking for closer trade ties to the EC, although he recognised that

sold on the world market. Without the Comecon market, the Cuban sugar industry would face collapse, and with it the central pillar of the Cuban economy. The present

preferential prices of four to five times the world market

prices for Cuba's sugar clearly

will not be sustained.

At world market prices. Cuba's sugar exports together with income from nickel, citrus and tourism, can not cover the cost of importing Cuba's annual oil requirements of 13m tons. Even at some intermediary price to ease the transition, Cuba will clearly suffer. It will face raw material, spare parts and machinery shortages, exacerbating production bottle-necks which already exist throughout the economy.

Corporate

We've been the top U.K. bank in this field for the last five years and in 1989 led a dazzling \$22.8 billion worth of deals.

Recently we arranged, underwrote and lead managed a three year Revolving Credit Facility for The Equitable

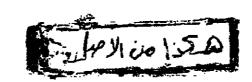

up credit facility and we won the sole arranger mandate in the face of stiff competition from major North

American and European banks. So why did "Equitable" favour NatWest?

Our experience enabled us to pro-

van Hensbergen on 071-920 5234 will be pleased to put you in touch with our Syndicated Loans Unit.

You might find it a most illuminating conversation. NATIONAL WESTMINSTER BANK PLC, REGD. OFFICE, 41 LOTHBURY, LONDON, EC2P 28P. MEMBER OF IMRO.

LONDON STOCK EXCHANGE

Early gains lost as trading increases

A STRONG start to yesterday's trading session in UK equities was undermined later by renewed bearishness on the corporate front, and then by uncertainty on Wall Street in the face of the latest news from the Gulf. Trading volume benefited from a two-way trading programme from a US-based securities house, said to be worth £100m overall but spread across the London, Tokyo and New York stock markets.

Falling crude oil prices were also helpful for the broad range of equities. However, this trend failed to unsettle share prices for the major oil companies, which steadied at the close as the market

absorbed the implications of the latest developments in the

The day started well, with both overnight Wall Street and Tokyo helping London, the trading programme boosting turnover, and trading results from British Aerospace and Prudential finding a warm

reception in the market. By late morning, the market was showing a gain of more than 23 points on the FT-SE scale. But the market came off the

top as traders turned towards a batch of less encouraging fac-tors. UK Government bonds lost early gains following the announcement of an upward revision of the UK trade deficit for the second quarter, and equity investors reacted to a bearish statement from the boardroom of BTR, one of the market's favoured conglomerates.

The early gains in equities melted away as reports reached London that Iran had called for a Holy War against

FT-A All-Share Index

the US in the Gulf, and Wall Street abandoned an initial gain and slipped lower to show a net fall of 6.43 Dow points in London trading hours.
The UK market slipped into

negative territory in the final minutes, to show a loss of 2.0 points on the day for a closing reading of 2,142.3 on the FT-SE Index. Trading volume remained relatively high even after the market turned off, reflecting some profit-taking by fund managers as well as increased intra-market maker business. The final Seaq total of 434.7m shares compared with 343.8m in the previous

the market even in the light of recent downgradings, and brought a further rash of downward revisions by City analysts. Moreover, BTR's fortunes were regarded as a shap shot of a wider economic malaise and cast a cloud over prospects for other conglomerate companies.

The reports from Iran brought a swift reaction in the multinational stocks, which are likely to be vulnerable to any reaction in other global markets before London opens for business this morning. Glazo, unchanged at mid-ses-sion, closed with a double-figure loss and ICI extended an

Describing the shares rating as demanding, Mr Zoussef Ziai at UBS Phillips & Drew reduced his full year estimate from £375m to £345m and clip-ped his dividend forecast from Legal & General rose 10 to 389p, helped by a stock short-age. The market is expecting news on Friday morning of the

shares rose 6 to 284p.
The implications of ECC's plan for a staged withdrawal from housebuilding activities were interpreted bullishly and the shares rebounded 9 to 349p. Buy recommendations in the wake of Monday's first half figures sent Morgan Crucible shares 4 higher to 233p, after 237p. Nomura Research maintained the company appeared likely to achieve modest earnings per share growth this year and in 1991, and that "prospec tive ratings are inexpensive." The verdict of Smith New Court was that "if loss minimi-sation is the name of the game for fund managers today, then Morgan should fit the bill as

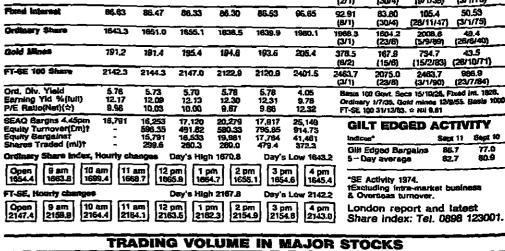

with its music businesses; "Chrysalis and EMI's chart shares have risen sharply in recent months, especially in the US, where in the first three months of the financial year their combined chart share was 18.7 per cent compared with only 9.1 per cent in 1989/ SO. At the close Thorn were 5 higher at 604p on good turn-over of 1.7m shares.

Ratners pleased the market with its figures and positive statement. BZW, for one, changed its recommendation from hold to buy and the shares firmed 7 to 230p.

Boots had a good day as Mr Paul Smiddy of Kleinwort Benson said the nervousness at the start of the week, which had been prompted by a profits downgrading from Morgan Stanley, was overdone. He said that the company's second-half performance would bring better news than the first. The

modestly valued with limited risks attached."

Setback after BTR statement

BTR fell heavily as analysts reduced their forecasts in the wake of disappointing figures and a cautious statement from

the company.
Mr Geoff Allum at County NatWest cut £150m from his estimate of full year profits to £1.05bn - lower than that from most other securities houses. He said the slowdown at BTR reflected a wider economic malaise and that he would be reassessing forecasts for other

industrial conglomerates.
He changed his recommendation on BTR from a hold to a buy, however, saying that the company was the best placed in the sector. "Only Hanson has a comparable record, but we will be looking at the forecasts there too."

Other analysts were more restrained. Some said yester-day's BTR drop of 40 to 318p in busy trade was overdone. One said that the new warrant issue (one free warrant for every 15 shares held and exercisable at 370p in 1994 and 1995) had drawn demand away

from the equity.

Mr Mike Murphy at
S.G. Warburg, who trimmed his forecast from £1.23bn to £1.13bn, said the marginal rise in the dividend to 7p was erring on the side of caution. He added that the market was interpreting BTR's signals as a warning, and rated the shares a buy for outperformance.

BAe responds

Strong half-year results from British Aerospace prompted a jump of 17 in early trading, before the shares settled 11 up at 563p after a turnover of 5r Analysis had predicted that the company would announce profits in the region of £127m. but the figure was £146m, well up on last year even if the £34m exceptional credit from the 1989 sale of BAe's stake in DAF is taken into consideration. BAe said that in spite of the

uncertainty over the situation in the Gulf, it expected full year results to be comfortably ahead of those achieved in Hoare Govett, brokers to

BAe, upgraded its end-of-year profit forecast to £385m from £340m. It added that it was still a buyer of the stock. After the interim figures were announced, Hoare hosted a seminar by BAe for institu-

a semmar by base for institu-tional clients. Investors were told that Bae was still cutting costs, and was hoping to add to the healthy performance of its

defence arm by grasping the

motor vehicle divisions.

Yorkshire favoured

opportunity to improve returns in its commercial aircraft and

Yorkshire Chemical rebounded from the year's low point as domestic and US-based investment banks issued reassuring advice. Both thought there was no real justification for the stock's recent underperformance - some 14 per cent relative to the market over the past month alone - and said that they were buyers of the shares. Yorkshire became the principal feature of the chemical sector yesterday, closing 12

higher at 328p. Shearson Lehman Brothers blamed the late summer fall in the shares on a combination of the board's caution last month. profit-taking and the oil crisis. "It looks well overdone," said Mr Martin Glen of Shearson, who added; "At these levels Yorkshire must be very attrac-tive to a raider." The stock's break-up value before June was near 650p a share,

BZW came to the same conclusion over the share price weakness and confirmed yesterday that its current stance on Yorkshire had changed from hold to buy.

Calor higher

An uptick in the share price and turnover in Calor Group prompted suspicions that SHV, the privately-owned Dutch group, had taken advantage of the announcement of Calor's interim figures to top up its stake.

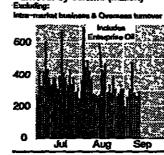

SHV holds 44 per cent of Calor and has stated its inten-tion of increasing this by 2 per cent this year. The Dutch group is thought to have bought a small amount of stock recently the stake by 2 per cent SHV would have to buy some 3.5m shares. Specialists said an order of that size would take some time to carry out.
Calor's figures proved a.

slight disappointment. Net profits of £12.7m were at the bottom end of the range, but the dividend, 6p, was slightly ahead of expectations.

Also stimulating the shares was news that Mr Folker Schukker, an SHV vice president, is to replace Mr David Mitchell as Calor's new chief executive at the end of the

Analysts noted that SHV is the major shareholder in Primagaz, the French bottled gas

1100 🖔 **Equity Shares Traded** Turnover by volume (million)

group, and that there could be an opportunity for a merger of the two groups. Specialists refused to rule out a full bid for the group, but said that on fundamentals the earnings outlook was not good when com-pared with British Gas.

Most international stocks were hit by BTR's figures and Wall Street's nervous reaction to an Iranian leader's call for a holy war against the US. Han-son lost 6 to 1994p and ICI gave up 16 at 874p. Glazo managed a rise of 11

with the market in early trad-ing before falling with the rest of the internationals. Mr Robin Gilbert at James Capel said that Glaxo had outperformed over several months, but because of US buying rather than any fundamental reason. res ended 20 down on the day at 738p.

Interim figures from Pruden-tial, the UK's biggest insurance group, took the market by surprise. Prudential quickly improved to 211p before ending the session a net 4 higher at 208p. Turnover was a respect-able 3.2m. Analysts said the "headline"

pre-tax profits figure of £126.7m was better than expected -some had pencilled in a figure of below £100m - but pointed out that this number did not include £20m worth of losses at Mercantile & General, which will be included in the second-half figures. The 13 per cent dend was as expected.

advanced 6 to 321p. Mid-term profits from Tibbett & Britten, the interna-tional transporter and distribu-

tor, were sharply higher but they only just exceeded market estimates. The board exuded confidence for the future, however, and the shares raced higher to close 17 up at 270p.
Rolls-Royce put on 5 to 198p in sympathy with British Aerospace and in anticipation of results due out today.

The announcement of a drop in profits from £6.1m to £3.6m pushed Hall Engineering down 10 to 105p. However, analysts said the figures were in line with expectations and the dividend was maintained.

Thorn EMI, badly bruised over the past two weeks after its failure to sell its lighting businesses to America's GTE, staged a good rally after Klein wort Benson issued a strong buy note on the stock. Kleinwort's Rob Collins said

the "disappointment of the failed disposal should soon be forgotten and that the shares currently standing at their year's low, are oversold and The Kleinwort analyst

APPOINTMENTS

New chief at James **Finlay**

as chairman of JAMES
FINLAY on September 1. He
remains a director. Mr R.J.K.
Muir and Mr R.G. Capper have
been appointed chairman and
deputy chairman respectively.
Mr R.J. Stone-Wigg has been
appointed as an executive appointed as an executive director.

At THE MORTGAGE CORPORATION Mr Ray Pletce has been appointed chief executive. He replaces Mr Hugh Freedberg who is leaving to join TSB Group as chief executive of the insurance and investment services division. Mr Pierce is director and commercial general mamager of TMCG and has been with the company since July 1986.

Mr Stuart Marshall has been appointed head of the commercial banking group at COUTTS & CO. Mr Malcolm Ramsey will succeed him as head of the management services division.

■ BARCLAYS BANK has appointed Mr Heather Maizels as international private banking director with responsibility for business development.

■ LM. GROUP, importers and distributors of Subaru, Isuzu

and Hyundai motor vehicles, has appointed Mr Robert J. Browning as deputy chairman of V.I., the company's Republic of Ireland subsidiary. He remains the LM. Group's director of administration.

B BALFOUR BEATTY has appointed Mr W.E. Clifford (pictured) as commercial director of Balfour Beatty Civil Engineering. He became commercial manager of the southern construction division in 1973 and a director in 1985. He was appointed to the boards of two of Balfour Beatty subsidiaries, Stent Foundations and Balvac Whitley Moran in 1988 and 1989. Balfour Beatty is a BICC companý.

BIBBY DISTRIBUTION SERVICES (HOLDINGS), the distribution and warehousing division of Liverpool-based Bibby Line Group, has

appointed Mr Andrew Palmer as managing director. Mr Palmer was previously managing director of Novacold, part of the Transport Development Group, and prior to that was operations director of Harris Distribution. At REDROW GROUP Mr

Paul Pedley, the company's has been promoted to deputy chairman.

m FERROM HOLDINGS, the UK and Dutch-based engineering and structural steel group, has made Mr Garry Frier (pictured) its deputy chief executive. He was formerly finance director. Mr Peter Cook has taken his place as finance director. He

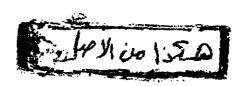

has been financial controller

since November 1983. ■ ISA INTERNATIONAL, the Bradford-based specialist

Mr Tom Weatherby, chairman of WHITECROFT, will retire from the board on October 5. Mr Peter Goold (pictured), deputy chairman and chief executive, will become executive chairman on that date. Mr John Marvin, a non-executive director and chairman of Hickson International, has been appointed deputy chairman.

Yen hits 13-month dollar high

European currencies into yea continued yesterday as Japa-nese companies built up yen holdings ahead of the financial half-year accounting period.

The dollar fell sharply, to its lowest level against the yen for 13 months, and European currencies also lost ground to the surging Japanese unit. In Tokyo the dollar opened at Y139.30 and fell to Y138.30 at the close. The trend continued the close. The trend continued in Europe, with the US currency finishing in London at Y137.65 against Y139.80 on Tuesday. Against European currencies the dollar weakened on a more modest scale. It fell to DM1.5875 from DM1.5895; to SFM1.2335 from SFF1.2390 and SFr1.3225 from SFr1.3290; and to FFr5.3175 from FFr5.3275. On Bank of England figures the dollar's index declined to

Speculation about lower US interest rates was fuelled by hopes of a compromise on the US Budget deficit. This weighed against the dollar, while the latest news from the Gulf supplied some support. Although weaker on the day the US currency finished towards the top of its European range after Ayatollah Ali Khamenei of Iran threatened a bely great to drive US forces out holy war to drive US forces out of the Gulf.

63.2 from 63.7.

Sterling was firmer overall,

but faces possible tests of confidence on economic news today and tomorrow. The martoday and tomorrow. The mar-ket will be looking at the underlying level of UK average earnings in today's employ-ment data. The year-on-year figure for July is expected to be unchanged at 10 per cent. A higher figure would be regarded as alarming, ahead of settlements in the car manusettlements in the car manu-

retail prices for August are also awaited nervously. High oil prices are expected to push the annual inflation rate up from 9.8 per cent to 10.2 economics believing there is a risk mists believing there is a risk of 10.4 per cent.

ments, high interest on foreign held sterling, and lower divi-dends on UK overseas assets because of the pound's recent advance may have contributed to the fall in the invisible sur-Overall impact on sterling was muted however. The pound rose 1.45 cents to \$1.8645. It also advanced to DM2.9600 from DM2.9425; to

ter, as the surplus on invisibles was cut sharply to £57m in the

second quarter from £1.188bn in the first. Insurance pay-

SFr24650 from SFr24575; and to FFr9.9150 from FFr9.8550, but fell to Y256.75 from Y258.75 against the strong yen. Sterling's index climbed 0.5 to 93.7.
The D-Mark fell to Y86.70 from Y87.90, but was steady within the European Monetary System The Signing of a Install.

CURRENCY RATES † European Commission Calculation

* All SOR rates are for Sep.11 **MONEY MARKETS** Slightly softer tone

THERE WAS a slightly softer tone to interest rates in London yesterday, with sentiment underpinned by a firmer pound on the foreign exchanges. Trading was very quiet as the financial markets looked ahead to tomorrow's data on UK retail prices amid fear that the annual inflation rate will rise

into double figures.
Three-month sterling interbank was quoted at 14 18 14 14 per cent against 15-14 %, while 12-month money was 14 1/2-14 % cent compared with 141/4-

14%. Short sterling futures moved within a narrow range on Liffe. A better performance by the pound led to December delivery opening higher at 85.78.

UK clearing bank base lending rate 15 per cent from October 5, 1989

This was near the day's peak however, with the contract touching 85.79 before falling

back to close at 85.71 against 85.74 previously. The Bank of England initially forecast a day-to-day credit shortage of £350m on the

money market, but revised this to £400m in the afternoon. Total help of £301m was provided. Before lunch the authorities bought £119m bills, £118m bank bills in band 1 at 14% per cent. In the afternoon another £127m bank bills were purchased in band 1 at 14% per cent. Late assistance of around £55m was also provided.

Bills maturing in official hands, repayment of late assistance and a take-up of Treasury bills drained £423m, with a rise in the note circulation absorbing £75m and bank balances below target £120m. These outweighed Exchequer transactions adding £725m to liquidity £285m to liquidity.

In Frankfurt call money was steady at the Bundesbank's 8 per cent Lombard emergency financing rate after the allocation of liquidity at this week's 28-day securities repurchase agreement tender. The Bundesbank accepted bids of DM23.1bn at rates of 7.95 to 8.10 per cent, virtually replacing an expiring pact of DM23.2bn.

Dealers interpreted the fact that the central bank met as much as 20 per cent of bids made at the lowest accepted rate of 7.95 per cent as a sign that the authorities wish to push call money below the Lombard rate.

The generous allocation of funds may also reflect a sympathetic attitude by the Bundesbank to strains developing in the system because East German banks by way of £1m Treasury bills are holding more reserves than in band 1 at 14% per cent and required with the central bank.

FT LONDON INTERBANK FIXING O.L.OO a.m. Sept 12) 3 questis US dollars The fixing rates are the arithmetic means rounded to the searest one-shateenth, of the bid and offered rates for SIDs quotes to the market by the reference basis at 11.00 a.m. each working day. Middle East statement outweighs positive factors

Wall Street

CONCERN ABOUT statements coming out of Iran about the Middle East crisis erased early share price gains yesterday morning, leaving the market modestly lower at midsession, writes Janet Bush in New York.

At 2 pm, the Dow Jones Industrial Average was 5.69 lower at 2,606.93 on thin vol-ume of 82m shares. On Tues-day, the Dow eased 2.97 to

The market had opened with a relatively positive tone. It reacted favourably to President George Bush's address to the nation which was predictably tough on Iraqi leader Saddam

There was also considerable optimism early on about agreement on a package to cut the US budget deficit. Republicans and Democrats appeared to be converging on a compromise designed to produce \$500bn in deficit cuts over the next five years, including about \$130bn in tax increases and as much as \$326bn in spending cuts. The White House said yester-day morning that it was confi-dent that a pact would be reached soon.

However, even if an agreement is reached, problems remain and financial markets are not likely to receive a sustained boost from this area. The General Accounting Office called for \$1.05 trillion in defi-

cit reduction by 1997. It said that the goal of reducing the deficit by \$50bn in fiscal 1991 and by \$500bn by 1995 were "considerably more modest than we believe necessary."

Also positive was a small decline in crude oil prices after the publication of the latest weekly report from the American Petroleum Institute which showed a relatively large build-up of US crude oil stocks. Another favourable influence was the healthy performance by the Japanese market.

However, US shares failed to hold early gains, partly recent statements from Iran, which appears to have reopened diplomatic relations with Iraq. Iran said yesterday that it was vehemently opposed to the US military presence in the Gulf.

While all these factors played a part in the market's performance, none was decisive. The market is drifting in low volume with no real conviction in either direction. "Suffering more from neglect than any real buying or selling pressure, the stock market has fluctuated in one of the narrowest ranges in recent memory during the past two weeks," said Mr Newton Zin-der, technical strategist at earson Lehman Brothers.

ments gained \$1/2 to \$29% on reports that the company has

asked Japanese semiconductor manufacturers to pay royalties of 10 per cent of production value based on a patent it Tenneco dropped \$2% to \$55% after the company said that its packaging subsidiary is

discussing buying Mills and Timberland for about \$740m from Georgia-Pacific. Kansas Gas & Electric added \$1% to \$25% after it said that it was in talks about being acquired by another company. MNC Financial added \$% to \$8 after declaring its regular quarterly dividend. It had pre-

viously been falling on

rumours that it would cut its dividend.

Canada

HIGHER oil prices and a lower Wall Street, due to uneasiness over the Gulf crisis, weakened

equities in Toronto after an early rise on Tuesday's speech by US President George Bush. The composite index fell 2.4 to 3,269.9 by midsession on volume of 10.8m shares. Inco rose C\$1/4 to C\$21% after brokers Prescott, Ball and Turben upgraded the stock from a sell to a hold. Cineplex Odeon slipped 15 cents to C\$3.50 after it said that summer receipts were not as strong as previ-

Among featured stocks was Advanced Micro Devices. which dipped \$¼ to \$5% after

Gulf comments from Iran change mood in bourses

a federal court jury ruled that

BELLICOSE comments from Iran filtered through to bourses late yesterday. Middle East specialists said that there was more than one way of interpreting these remarks, but for dealers they turned a mood of mild recovery into nervous depression, writes Our Markets FRANKFURT went sharply

lower in post-bourse telephone trade, following Tehran radio comments from the Iranian leader, Ayatollah Ali Khamenei, who bitterly attacked the US military build-up in the Gulf and said that the fight against it counted as a holy

Barlier, the DAX index had closed 20.92 higher at 1,598.34 after a midsession gain of 7.72 to 681.88 in the FAZ. Deutsche Bank was up DM9.70 at DM678.20, Siemens DM12.50 at DM618.50 and Daimler DM17.50 at DM714.50.

After hours, however, Deut-sche Bank dropped to about DM670 and Siemens to DM611, with Daimler shedding about D11.50 of its earlier gain. Mr Ulrich Muth, head of the inter-national trading desk at B Metzler in Frankfurt, said that the news had hit a market where nerves had been strained by day after day of trading at minimal volume.

There were virtually no orders in the market, said Mr Muth. Yesterday's volume fig-ure of DM4bn, up from DM2.9n on Tuesday, reflected traders' deals and scattered short cov-ering. "I have seen nothing like this over the past 10 years," he added. "We could say that the market is oversold, but we have to make sure that the cli-

ent's money is safe — and cash was the safe haven today."

PARIS ended lower following Iran's holy war remarks, after rising 2 per cent earlier in the day. The CAC 40 index shed 5.85 to 1,648.09, after retreating

in 268.275 shares, one of the biggest volumes of the day, after Salomon Brothers made a buy recommendation. The stock had fallen on Monday after a French broker downgraded its profits estimate for

Other rising stocks included Elf Gabon, the oil producer, which gained FFr90 or 5 per cent to FFr1.905 on fears of higher oil prices.

the company.

Pechiney's investment certificates jumped FFr9.50 to FFr245.50 with 158,400 traded, buoyed by higher aluminium prices. James Capel, the brokers, argued that Pechiney, which has other interests such as packaging, should be viewed as more than an aluminium stock. "Since almost half of its operating profits in 1990 are expected to come from activi-ties which traditionally enjoy higher multiples than those for aluminium, we feel that the share is heavily undervalued,"

it wrote yesterday.
Bouygues closed FFr10.50
lower at FFr488.50, after rising
FFr24 earlier to a day's high of FFr523; the construction group had announced that its La Saur unit had won a 20-year contract worth FFr2bn a year to manage Ivory Coast's elec-trical distribution system.

ZURICH balanced the Iranian comments against earlier bargain-hunting, and came out with the Crédit Suisse index up

SOUTH AFRICA

GOLD SHARES recouped some of their recent losses after a rise in bullion to about \$383 an ounce, but platinums stayed depressed amid fears of a decline in industrial demand. The JSE all-gold

from its session high of 1,687.49, in thin trading.
Peugeot rose FFr3 to FFr537

2.7 at 544.5. By midday, the volume of buy-orders had surged as investors entered the market, convinced that shares were oversold; late afternoon saw a burst of selling, and a move into reverse.

AMSTERDAM finished off its day's high after the remarks by Iran. The CBS tendency index ended 0.1 higher at 104.5, after reaching 105.6 earlier. Internatio-Müller rose F14.20 to F174 on further speculation in the

MILAN ended the September trading account in moderately active style, with turnover esti mated at something slightly higher than Tuesday's L165hn, and the Comit index 2.80 better Traders said that the session

had opened slightly weaker, but that it had turned round later with active buying of stocks in banks, insurance and telecommunications - sectors

telecommunications — sectors thought unlikely to be directly affected by rising oil prices.

Generali rose L340 to L38,100, and RAS L240 to L21,600. Banking gains were a little less pronounced, but the state-controlled food group, SME, rose nearly 2 per cent on its "anticyclical" characteristics.

Nordic bourses were mixed Nordic bourses were mixed

to lower, STOCKHOLM's Affärsvärlden General index losing 2.3 to 1,131.2. Just before the close almost 1.5m Electrolux free B shares, representing about 2 per cent of the share about 2 per cent of the share capital, changed hands at SK180, unchanged from Tuesday. OSLO mixed higher oils and lower shipping, and the all-share index fell 2.24 to

ISTANBUL's 50-share index gained 93.58 to 4,915.85 in sharply increased turnover of TL8i.3bn, up from Tuesday's

MADRID declined in quiet trade, with the general index

finishing 1.90 lower at 240.51.

Oil crisis and bank tussle boost Venezuela

Jacqueline Moore explains the reactions of emerging markets to last month's events

OGUST WAS a volatile month for the world's less developed stock markets, as well as for the which followed Iraq's invasion of Kuwait gave a very strong boost to Venezuela, a net exporter; but Taiwan, a big oil importer, was sent reeling.

The Gulf crisis has not significantly changed pecking order, however. Even before st month's moves, Venezuela had been been one of the year's top performers, knocked back to the number two position by Greece in April. August's 57 per cent rise in dollar terms helped it regain the top slot; it has jumped 268 per cent this year according to the International Finance Corporation. Taiwan, meanwhile, remained the worst performer, losing 30 per cent last month and 60 per

cent this year in dollar terms. The root of the Venezuelan been hostile stake-building in Banco de Venezuela, says Mr Tony Ewell of Corporate Broking Services, which specialises in emerging markets. The tuswas concluded two weeks

ago when Mr Orlando Castro of the Latino Americana de Seguros insurance company obtained a seat on the board of the bank, says Mr Ewell, by raising his holding to more than 20 per cent. The share price of Banco de

Venezuela, which currently

accounts for almost a quarter

of the total market capitalisation of about \$2.5bn, has risen from about 280 bolivars (\$5.70) at the end of last year to 1,100 bolivars this week, after peaking at 2,200 on August 15.
Such takeover activity has been part of the force driving the Venezuelan market this year, agrees Mr Terry Mahony agement, adding that some buying by foreign funds, together with the country's cil resources, have also lifted

The economy stands to benefit greatly from higher oil prices and increased production. Recently the Venezuelan Energy Minister ordered Petroleos de Venezuela, the state oil company, to increase output by 500,000 barrels a day to 2.49m

share prices.

Recovery in bonds spills over into equities

Tokyo

A RECOVERY in bond prices gave a strong boost to the equity market yesterday and, after a poor start, share prices bounced up in slightly more active trading, writes Michigo Nakamoto in Tokyo.

The Nikkei average closed of the start of the

611.48 ahead at 25,216.14, against a day's high of 25,288.06 and a low of 24,463.60. Winners outnumbered losers by 762 to 217, with 144 issues unchanged, and turnover rose from Tues-day's 400m shares but remained moderate at 530m. The Topix index of all listed stocks advanced 33.02 to 1,913.72 but, in London, the ISE/Nikkei 50 index slipped 8.65 to 1,442.66.

Equities were at the mercy of bond prices, falling first on weak bond futures. Fears of a further rise in interest rates were aroused again after the Bank of Japan's report on the short-term business outlook. released on Tuesday, indicated that the economy was still

expanding at a strong rate. In later trading, however, a recovery in bonds was triggered by the view that interest rates were likely to level off for the time being. Investment trusts came in with indexlinked buying, which count-ered selling by arbitrageurs unwinding positions before the September futures contract

Although the yen firmed substantially against the dollar, hitting a 13-month high during the day, this had little affect on equities. Although a strong yen in mod more for strong yen is good news for Tokyo, its present strength is mostly a result of the dollar's weakness; eventually, it is likely to arouse concern about the downturn of the US economy, said an analyst at Sanyo Securities.

Trading was dominated by speculative activity. Toyobo, the textiles company which had been targeted by a well-known speculative group, rose Y46 to Y685. The Tokyo Stock Exchange had to put a temporary halt to trading in the issue twice yesterday, due to the accumulation of orders. Toyobo was also attractive as a laggard, an analyst said. Minebea, the leading minia-

ture bearing maker, and known for its aggressive takeover style, topped the actives list with 15.3m shares traded,

but shed Y10 to Y1.070. There higher to 29,107,99. Volume was speculation that share stakes were changing hands as a result of the death of Minebea's former chairman, and a

pany was reported to have con-ducted hefty cross trades of There were also rumours that the banks that own substantial Minebea holdings were behind the gains. Several lead-ing banks had been asked by Minebea to become stable shareholders when it was faced with the prospect of being taken over. Now that those banks have huge unrealised

major Japanese securities com-

losses, they are rumoured to be putting pressure on Minebea to get its share price back up. Japan Synthetic Rubber advanced Y35 to Y885 as investors responded to news that it has marketed a new high qual-ity tyre in the US, and is devel-oping a paper battery.

In Osaka, interest in laggards triggered buying which took the OSE average 206.44 climbed to 108m shares from the 74m traded on Tuesday.

DOMESTIC considerations, some of them related to world events, affected individual markets in the Pacific Basin. MANILA fell 3.6 per cent to a 33-month low on unconfirmed reports that retail prices of petroleum and its by-products will be increased within the week. The composite index lost 25.12 to 674.13 on light selling. The Government of President Corazon Aquino has tried to avoid raising gasoline and other petroleum product prices, with threats of another coup attempt and the effects of the devastating earthquake on July 16 to consider. But local oil companies are agitating for an immediate increase in retail prices to cope with higher

TAIWAN swung back

2.2 per cent, to 3,434.72 after the state-owned Bank of Talwan cut its prime rate from 10.25 to 10 per cent. The banking sector put on 3 per cent. Investors expected more banks to follow suit and believed that this would spur the slowing local economy, but turnover remained thin.

totalling T\$20.75bn (T\$22bn). SEOUL's slight decline was blamed on torrential rains, which limited investor particlpation. The composite index eased 2.61 to 610.88. Property damages are expected to soar, and analysts predict consumer prices will surge due to agri-cultural losses and reduced industrial activities during and after the rains.
BOMBAY fell following the

previous day's record high after a broker was declared a defaulter by the BSE. The index lost 35.57 to 1,286.25. **AUSTRALIA** followed Japan

the All Ordinaries index rising 13.4 to 1,512.5 in volume up from A\$109m to A\$164m. NEW ZEALAND firmed on selective buying of blue chips but busi-ness stayed thin. The Barclays index rose 15.86 to 1,581.21. HONG KONG's Hang Seng index added 21.47 at 3,105.04 in light trading, but BANGKOK's SET index fell 23.70 to 804.46 on fears of the long-term effects of

the Gulf crisis.
